**Conservation Science** Peter Kareiva,Michelle Marvier,2017-06-20      Conservation Science: Balancing the Needs of People and Nature Peter Kareiva,Michelle Marvier,2024-07-25 Focused on protecting nature and the planet Conservation Science Balancing the Needs of People and Nature contains a heavy emphasis on highlighting strategies to better connect the practice of conservation with the needs and priorities of a growing human population to give you an overview of this important area of science      *Pandas and People* Jianguo Liu,Vanessa Hull,Wu Yang,Andrés Viña,Xiaodong Chen,Zhiyun Ouyang,Hemin Zhang,2016-01-14 Understanding the complex relationships between humans and the natural world is essential for achieving environmental sustainability and improving human well being yet many studies are unable to reveal complex interactions and hidden trends This is the first book to synthesize the findings and approaches of long term integrated research in a model coupled human and natural system and to illustrate their applications to regional national and global scales It features a classic long term interdisciplinary research project in the Wolong Nature Reserve of China which contains one of the largest wild populations of the world famous endangered giant pandas Bringing together a team of contributors from both the natural and social sciences this book explores how a long term interdisciplinary and model system approach is essential to uncover the common patterns and mechanisms of coupled systems to develop ideas and methods for studying and managing other coupled systems and ultimately to contribute to the development of theories about coupled systems for sustainability *Pandas and People* will be essential reading for scholars interested in the interface of the natural and social sciences including ecologists conservation biologists environmental scientists sustainability scientists wildlife biologists forest scientists sociologists anthropologists economists and political scientists It will also be a valuable reference for policy makers natural resource managers and graduate students      *Integrating Biological Control into Conservation Practice* Roy van Driesche,Daniel Simberloff,Bernd Blossey,Charlotte Causton,Mark Hoddle,Christian O. Marks,Kevin M. Heinz,David L. Wagner,Keith D. Warner,2016-08-01 Invasive species have a critical and growing effect upon natural areas They can modify degrade or destroy wildland ecosystem structure and function and reduce native biodiversity Landscape level solutions are needed to address these problems Conservation biologists seek to limit such damage and restore ecosystems using a variety of approaches One such approach is biological control the deliberate importation and establishment of specialized natural enemies which can address invasive species problems and which should be considered as a possible component of restoration Biological control can be an effective tool against many invasive insects and plants but it has rarely been successfully employed against other groups Safety is of paramount concern and requires that the natural enemies used be specialized and that targeted pests be drivers of ecological degradation While modern approaches allow species to be selected with a high level of security some risks do remain However as in all species introductions these should be viewed in the context of the risk of failing to reduce the impact of the invasive species This unique book identifies the

balance among these factors to show how biological control can be integrated into ecosystem restoration as practiced by conservation biologists Jointly developed by conservation biologists and biological control scientists it contains chapters on matching tools to management goals tools in action measuring and evaluating ecological outcomes of biological control introductions managing conflict over biological control and includes case studies as well as an ethical framework for integrating biological control and conservation practice Integrating Biological Control into Conservation Practice is suitable for graduate courses in invasive species management and biological control as well as for research scientists in government and non profit conservation organizations

*Green Development* W. M. Adams,2003-09-02 This revised and updated new edition retains the clear and powerful argument which characterized the original It gives a valuable analysis of the theory and practice of sustainable development and suggests that at the start of the new millennium we should think radically about the challenge of sustainability Fully revised this latest edition includes further reading chapter outlines chapter summaries and new discussion topics and explores the roots of sustainable development thinking and its evolution in the last three decades of the twentieth century the dominant ideas within mainstream sustainable development the nature and diversity of alternative ideas about sustainability the problems of environmental degradation and the environmental impacts of development strategies for building sustainability in development from above and below Offering a synthesis of theoretical ideas on

sustainability based on the industrialized economies of the North and the practical applied ideas in the South which tend to ignore First World theory this important text gives a clear discussion of theory and extensive practical insights drawn from Africa Latin America and Asia      **Designing Greenways** Paul Cawood Hellmund, Daniel Smith, 2013-03-05 How are greenways designed What situations lead to their genesis and what examples best illustrate their potential for enhancing communities and the environment Designing greenways is a key to protecting landscapes allowing wildlife to move freely and finding appropriate ways to bring people into nature This book brings together examples from ecology conservation biology aquatic ecology and recreation design to illustrate how greenways function and add value to ecosystems and human communities alike Encompassing everything from urban trail corridors to river floodplains to wilderness like linkages greenways preserve or improve the integrity of the landscape not only by stemming the loss of natural features but also by engendering new natural and social functions From 19th century parks and parkways to projects still on the drawing boards Designing Greenways is a fascinating introduction to the possibilities and pitfalls involved in these ambitious projects As towns and cities look to greenways as a new way of reconciling man and nature designers and planners will look to Designing Greenways as an invaluable compendium of best practices      **Mountain Research and Development** ,1994      Balancing Ecosystem Values ,2005 Balancing Ecosystem Values Innovative Experiments for Sustainable Forestry is a compendium of more than 40 contributions from Asia Europe and North America The theme encompasses experiments implemented at an operational scale to test ecological social or economic responses to silvicultural treatments designed to balance the complex set of objectives currently targeted in sustainable forest management Several invited and plenary papers emphasize the variety of outcomes demanded by the public as well as the essential role that these long term studies will play in allowing natural resource managers to make better informed science based decisions A broad spectrum of silvicultural treatments and systems are covered as are simulation runs with different types of models and discussion about design challenges for scaling up from stands to landscapes Diverse forest ecosystems stand structures and plant animal and fungal species are also considered The conference included 2 days in the field where participants saw several types of the comprehensive field experiments firsthand The conference concluded with a critique from state private and public land managers      *Diversity for Development* International Plant Genetic Resources Institute,1999      The Inland Architect and News Record ,1895

Navigating Collective Intelligence for Sustainable Futures González Alvarado, Tania Elena, Cabanelas Lorenzo, Pablo, 2024-11-29 Navigating collective intelligence for company resilience and sustainable development has become vital In recent years the global environment has left its mark on social practices and current economic systems This effect drew the importance of business resilience into focus The recognition of resilience as a spontaneous act in a group of individuals allows them to overcome the challenges of the environment to improve current situations Business resilience also influences decision making and business strategies and has become an essential factor for the competitiveness and performance of

public and private organizations Further research into future organizational resilience may reveal the emergence of collective intelligence as an effective tool for navigating sustainable development efforts Navigating Collective Intelligence for Sustainable Futures analyzes the role of collective intelligence in adapting businesses to external shocks and contributing to organizational resilience It examines how organizations can adapt and thrive in an increasingly volatile and changing business environment This book covers topics such as sustainable development intelligent technology and global business and is a useful resource for business owners engineers environmental scientists academicians and researchers

*Transboundary Protected Areas* Yale University,2003-05-21 Top researchers share their expertise on conservation and sustainability in areas that extend across

national borders This informative and insightful book examines strategies being used by governments and NGOs to protect wild areas that cross national borders and cultural linguistic and socioeconomic boundaries In addition to presenting case studies from five continents Transboundary Protected Areas The Viability of Regional Conservation Strategies provides several theoretical overviews that suggest viable approaches to conserving biodiversity in these difficult to protect areas From the editors Historically the borders of protected areas have been defined by convenient social political or proprietary boundaries rather than by ecological boundaries Today many scientists and practitioners are in agreement that the world s biodiversity and other natural resources can best be conserved on an ecosystem or regional scale which may or may not be consistent with political boundaries Efforts to protect land on an ecosystem scale have led to the creation of numerous transboundary protected areas also referred to as international peace parks or transfrontier conservation areas These areas which often cross linguistic socioeconomic and cultural boundaries as well as national borders represent regional conservation at its most complex While many scientists and practitioners promote eco regional approaches to conservation many also advocate pursuing conservation goals on local or community scales Conservationists therefore endeavor to achieve a seemingly incongruous mandate to pursue top down regional goals using bottom up local approaches Transboundary Protected Areas The Viability of Regional Conservation Strategies addresses the vital questions associated with this mandate Is it reasonable and realistic to approach regional conservation this way What strategies have been employed to achieve these goals and how successful have they been Who benefits from transboundary conservation and what are the costs Reflecting the information delivered at the 2001 conference of the Yale chapter of the International Society of Tropical Foresters ISTF this book provides you with the best answers available at this time The contributors include social and natural scientists resource managers policymakers and community leaders Transboundary Protected Areas The Viability of Regional Conservation Strategies brings them together for an interdisciplinary exploration of these questions and other critical issues related to conservation in and around transboundary protected areas Specific cases that are thoughtfully examined in Transboundary Protected Areas The Viability of Regional Conservation Strategies include the public reaction to the Yellowstone to Yukon Y2Y Conservation Initiative the ways in which the establishment of southern Africa s existing and proposed Transfrontier Conservation Areas TFCAs can help conserve biodiversity aid socioeconomic development and promote international peace development and conservation efforts in the Maloti Drakensberg mountains of southern Africa which straddle the borderlands between South Africa and Lesotho the cultural aspects of protected area management in Venezuela and Guyana the impact of transfrontier collaboration as evidenced by the International Gorilla Conservation Programme IGCP in the Virunga Bwindi region of Africa Uganda Rwanda and the Democratic Republic of Congo how the Nepalese have addressed the problems of poaching commercial logging illegal harvesting and smuggling of forest products and illegal trade of wildlife and wildlife products in the eastern Himalayas by implementing a transboundary biodiversity
