,2001 Vast Expanses Helen M. Rozwadowski,2018-10-15 Much of human experience can be distilled to saltwater tears
sweat and an enduring connection to the sea In *Vast Expanses* Helen M Rozwadowski weaves a cultural environmental and
geopolitical history of that relationship a journey of tides and titanic forces reaching around the globe and across geological
and evolutionary time Our ancient connections with the sea have developed and multiplied through industrialization and
globalization a trajectory that runs counter to Western depictions of the ocean as a place remote from and immune to human
influence Rozwadowski argues that knowledge about the oceans created through work and play scientific investigation and
also through human ambitions for profiting from the sea has played a central role in defining our relationship with this vast
trackless and opaque place It has helped us to exploit marine resources control ocean space extend imperial or national
power and attempt to refashion the sea into a more tractable arena for human activity But while deepening knowledge of the
ocean has animated and strengthened connections between people and the world s seas to understand this history we must
address questions of how by whom and why knowledge of the ocean was created and used and how we create and use this
knowledge today Only then can we can forge a healthier relationship with our future sea Diver ,1991
