

# Time for a PACS Rehab?

Your PACS may have met your needs when it was originally purchased, but for today's competitive environment you should consider whether it's meeting the needs of your customers.

You are not as tied to your current PACS as you might think. GE Healthcare can replace or augment your existing PACS and quickly migrate your old studies, in order to help enhance your clinical operations and overall competitiveness.

Now is the time to take action and ensure your business is well positioned to satisfy the needs of your customers and your clinical workflow.

Symptoms	Effect	Diagnosis
Different viewers for different users	Your PACS may have Web-access, but it is likely a Web-enabled approach with an appended Web server to a client/server PACS. Results are delivered both slowly and unreliably to your referring physicians, increasing their frustration.	<b>You need a PACS Rehab!</b>
Loss of referrals	Referring physician frustration has caused you to lose market share to competitors who offer a higher level of service with more modern PACS and innovative marketing programs.	
Too much hardware	Your PACS requires numerous servers and sub-systems that need to be managed by the local IT staff or even worse, by dedicated staff from your PACS vendor. This is very costly to maintain over time.	
Limited access	The promise of PACS is to do more with less, and to operate more efficiently. But with workstations that have limited or no portability, your radiologists are still virtually tied to their workstations for the majority of the power of the PACS.	
Inefficient clinical workflow	Legacy PACS that has been updated year over year is riddled with outdated code. Imagine a PACS that is completely portable, with all of the power of the diagnostic workstation available at your fingertips, wherever you are in the world?	
Can't keep up with exam volume growth	Your PACS cannot support the latest imaging modalities including the increasing exam size and study volume your institution is experiencing.	
Can't manage bottleneck	Your CDs may be proprietary or run a different viewer than the PACS. Your physicians cannot burn CDs locally and they do not support the IHE PDI standard increasing referring physician frustration.	
Inflexible integration	Your PACS cannot easily integrate to clinical applications for orthopedics, digital mammography, PET/CT, nuclear medicine, advanced visualization, and more.
