You'll start by understanding the different node inputs and outputs followed by the basic nodes you'll need throughout your geometry nodes projects. The book will show you how the node system works and enable you to put your newfound knowledge to use through exercises that involve modifying curves, meshes and more. You'll work on a range of interesting projects such as creating a procedural plant where you'll use nodes to generate the intricate details and variations of a plant in a procedural manner and a spiderweb generator to refine your skills of cleaning up a node tree. Finally, you'll build a procedural LED panel using geometry nodes to generate the look of an LED panel. By the end of this book, you'll be able to overcome any geometry node issue confidently and make complicated geometry node trees exactly how you need them. What you will learn: Discover the different node inputs and outputs that geometry nodes have to offer. Get the hang of the flow of the geometry node system. Understand the common nodes you'll be using along with their functions in the geometry node editor. Modify basic mesh primitives using the node system inside Blender. Scatter and modify objects aligned onto a curve. Become familiar with the more advanced nodes in the geometry nodes system. Link geometry and material nodes editors using named attributes. Implement your new found knowledge of nodes in real world projects. Who this book is for: If you are a CG Artist or follow modeling careers like that of an environment artist or even a CG generalist in the cinematography industry and you are looking to get into learning a node based modeling workflow using Geometry Nodes in Blender, this is the perfect book for you. You will need a basic knowledge of the fundamentals of Blender, for example, knowing the specific workflow of material nodes and being able to apply this knowledge to your projects. To get the most out of this book, you should have a basic understanding of Blender's shortcut system and some modeling experience.
