*Logistics Information Systems* Batuhan Kocaoglu,2024-08-20 In today's era of digital transformation the logistics sector is one of the most technology intensive industries This book provides a comprehensive overview of the IT infrastructure required for company operations the types of enterprise software used in logistics and current data collection technologies It addresses the terminology information flows and application contexts of the necessary software helping readers to see the big picture without being overwhelmed by technical details It explains principal methodologies for modelling and designing systems and describes the objectives of project management and system analysis not to mention why they are so essential to developing information systems It also defines critical terms before turning to sector specific hardware and software solutions for logistics operations data collection data processing and data analytics solutions In addition the book includes sections that introduce readers to programming and the core of the database piquing their interest and guiding them to a higher level of specialization Study questions are provided at the end of each chapter to test reader comprehension This book will be a helpful resource for students in logistics or professionals working in the fields of business administration foreign trade industrial engineering ERP or MIS who want to advance their knowledge and skills in the logistics industry

**Ubiquitous Computing and Technological Innovation for Universal Healthcare** Suresh Kumar, Arumugam,Ganesan, Geetha,Sekaran, Ramesh,Krishnan, Batri,Kousik, N. V.,2024-08-06 The current healthcare system faces complications including data acquisition interpretation and delivery challenges particularly in out of hospital scenarios The shortage of medical resources intensifies the demand for efficient information gathering and processing Moreover the potential of pervasive computing still needs to be explored in healthcare limiting the industry's ability to leverage innovations like artificial intelligence augmented reality and virtual reality *Ubiquitous Computing and Technological Innovation for Universal Healthcare* addresses the medical field's critical challenges It presents innovative solutions grounded in the marriage of Unmanned Aerial Vehicles UAV pervasive computing and metaverse intelligence It outlines how these UAVs redefine out of hospital care addressing the pressing need for efficient data collection and interpretation amid a global medical shortage Integrating cognitive algorithms is explored to automate diagnosis and enhance healthcare systems emergency responsiveness The book revolves around developing and integrating treatment programs leveraging UAV communication Topics such as artificial intelligence telemedicine blockchain digital twins augmented reality and virtual reality are delved into for their role in creating intelligent healthcare systems The focus on rapid identification of underlying health issues real time monitoring in the metaverse and the economic social and environmental impact of these systems adds depth to the discourse Structured as a vital resource for researchers academicians industry professionals policy makers and

system designers this book bridges the gap between theory and application      *Proceedings of 23rd International Conference on Informatics in Economy (IE 2024)* Cristian Ciurea,Paul Pocatilu,Florin Gheorghe Filip,2025-04-12 This book includes high quality research papers presented at 23rd International Conference on Informatics in Economy IE 2024 which is held in Bucharest Romania during May 2024 This book covers research results in business informatics and related computer science topics such as IoT mobile embedded and multimedia solutions e society enterprise and business solutions databases and big data artificial intelligence data mining and machine learning quantitative economics      **C++ Data Structures and Algorithms**

Wisnu Anggoro,2018-04-26 Learn how to build efficient secure and robust code in C by using data structures and algorithms the building blocks of C Key Features Use data structures such as arrays stacks trees lists and graphs with real world examples Learn the functional and reactive implementations of the traditional data structures Explore illustrations to present data structures and algorithms as well as their analysis in a clear visual manner Book Description C is a general purpose programming language which has evolved over the years and is used to develop software for many different sectors This book will be your companion as it takes you through implementing classic data structures and algorithms to help you get up and running as a confident C programmer We begin with an introduction to C data structures and algorithms while also covering essential language constructs Next we will see how to store data using linked lists arrays stacks and queues Then we will learn how to implement different sorting algorithms such as quick sort and heap sort Along with these we will dive into searching algorithms such as linear search binary search and more Our next mission will be to attain high performance by implementing algorithms to string datatypes and implementing hash structures in algorithm design We ll also analyze Brute Force algorithms Greedy algorithms and more By the end of the book you ll know how to build components that are easy to understand debug and use in different applications What you will learn Know how to use arrays and lists to get better results in complex scenarios Build enhanced applications by using hashtables dictionaries and sets Implement searching algorithms such as linear search binary search jump search exponential search and more Have a positive impact on the efficiency of applications with tree traversal Explore the design used in sorting algorithms like Heap sort Quick sort Merge sort and Radix sort Implement various common algorithms in string data types Find out how to design an algorithm for a specific task using the common algorithm paradigms Who this book is for This book is for developers who would like to learn the Data Structures and Algorithms in C Basic C programming knowledge is expected      **Mastering Objective-C** Sufyan bin Uzayr,2023 Mastering Objective C is a detailed guide for beginners that gives a modern programmer s viewpoint on Objective C It introduces the principles of Objective C and current Apple programming skills and libraries allowing the reader to make the best use of the tools available Concise and easy to understand this book covers many topics including an introduction to key concepts of language and primary toolkits as well as the Foundation and AppKit frameworks to help quickly advance with the necessary information This book explains how to structure applications properly and organize code

for optimum performance The fundamental principles explained here are helpful to beginner and intermediate users interested in learning this highly technological and diverse language

**Human-Computer Interaction** Constantine Stephanidis,Gavriel Salvendy,2024-09-28 The pervasive influence of technology continuously shapes our daily lives From smartphones to smart homes technology is revolutionizing the way we live work and interact with each other Human computer interaction HCI is a multidisciplinary research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them ensuring the seamless integration of interactive systems into our technologically driven lifestyles The book series contains six volumes providing extensive coverage of the field wherein each one addresses different theoretical and practical aspects of the HCI discipline Readers will discover a wealth of information encompassing the foundational elements state of the art review in established and emerging domains analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence as well as the emergence of diverse societal needs and application domains These books Showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence AI and the Internet of Things IoT Provide an extensive exploration of interaction design by examining a wide range of technologies interaction techniques styles and devices Discuss user experience methods and tools for the design of user friendly products and services Bridge the gap between software engineering and human computer interaction practices for usability inclusion and sustainability These volumes are an essential read for individuals interested in human computer interaction research and applications

**Math Optimization for Artificial Intelligence** Umesh Kumar Lilhore,Vishal Dutt,T. Ananth Kumar,Martin Margala,Kaamran Raahemifar,2025-04-21 The book presents powerful optimization approaches for integrating AI into daily life This book explores how heuristic and metaheuristic methodologies have revolutionized the fields of robotics and machine learning The book covers the wide range of tools and methods that have emerged as part of the AI revolution from state of the art decision making algorithms for robots to data driven machine learning models Each chapter offers a meticulous examination of the theoretical foundations and practical applications of mathematical optimization helping readers understand how these methods are transforming the field of technology This book is an invaluable resource for researchers practitioners and students It makes AI optimization accessible and comprehensible equipping the next generation of innovators with the knowledge and skills to further advance robotics and machine learning While artificial intelligence constantly evolves this book sheds light on the path ahead

**Modern Approach to C Programming** Amisha Saxena,Dr. Nancy Arya,Anil Tanwar,2024-12-19 DESCRIPTION C is a powerful and versatile programming language used for building everything from operating systems to video games This book equips you with the essential knowledge to solve problems and create efficient programs using C This book provides a comprehensive guide to C

programming starting with the fundamentals of the C language and progressing to advanced topics It begins by introducing the syntax data types operators control flow statements and functions The book then delves into arrays and strings two essential data structures in C programming Subsequently it explores advanced topics such as pointers structures unions and file handling This book will help readers have a solid understanding of C programming and be equipped to write efficient C programs By the end of this book you will be a confident C programmer ready to write effective code and solve real world problems The book provides you with the foundational skills and knowledge to approach programming challenges with a newfound sense of ease paving the way for a rewarding career as a C programmer

**KEY FEATURES** Comprehensive coverage of fundamental concepts for problem solving in C Detailed explanations of code snippets to understand the logic behind each step Adherence to industry standards and guidelines for writing efficient and maintainable C code

**WHAT YOU WILL LEARN** Apply operators and control structures to create efficient programs Develop modular programs using functions for better code management Work with arrays to store and manipulate large datasets Use pointers for dynamic memory allocation and data manipulation Handle file input output to store and retrieve program data

**WHO THIS BOOK IS FOR** This book is designed for beginners with no prior programming knowledge as well as for those who wish to improve their C programming skills It is ideal for undergraduate students educators and professionals from various disciplines such as science engineering management and technology who want to develop strong problem solving abilities using C

**TABLE OF CONTENTS**

- 1 Introduction to Computers
- 2 Overview of C
- 3 Operators
- 4 Control Statements
- 5 Functions
- 6 Arrays
- 7 Pointers and Data Files
