innumerable possibilities and contingencies for how such conflicts may play out in the coming decades Brian M Mazanec examines the worldwide development of constraining norms for cyber war and predicts how those norms will unfold in the future Employing case studies of other emerging technology weapons chemical and biological strategic bombing and nuclear weaponry Mazanec expands previous understandings of norm evolution theory offering recommendations for U S

Howard M. Hensel, 2017-09-29 Modern armed conflict has taken a variety of forms and occurs at a variety of levels raising serious questions concerning the relationship between the law of armed conflict and the reality of contemporary warfare

Many contemporary armed conflicts are fought in pursuit of unlimited objectives whereas other modern wars seek to advance limited goals While in some cases modern wars are fought by traditional armies composed of clearly identifiable soldiers often modern armed conflicts are waged by guerrilla or partisan fighters whose identities are easily confused with non combatants Terrorism is increasingly a characteristic manifestation of this contemporary warfare In the broadest sense contemporary warfare has raised often controversial and vexing questions concerning the applicability of the law of armed conflict and when applicable the interpretation of its principles and tenets This engaging volume addresses some of the contemporary normative and legal challenges and problems associated with the application of the concepts of just war the just conduct of war and the law of armed conflict to 21st century warfare **Japan and the Middle East** Satoru

Peace Operations and Restorative Justice Peter Reddy, 2016-05-13 With a bold vision and a distinctive message Reddy stipulates that international peacekeeping can be designed and implemented using the principles of restorative justice To prove this Reddy discusses the congruence of crime armed conflict and violent disorder critiquing restorative justice and its nuanced character as a suitable application to complex civil wars This book provides a comprehensive survey of peace operations and then focuses on the cases of Somalia and Bougainville The comparison between their societal contexts their conflicts peace operations and final outcomes are crucial to this argument Furthermore this shows how the constraining maximising and emergent values of restorative justice can be applied in a peacekeeping setting from the overall command level through to the behaviours of deployed peacekeepers with direct contemporary application This sharp study makes for evocative reading as it introduces the new concept of regeneration as key to any restoratively arranged peace operation Military police NGO and civilian peacekeeper practitioners as well as academic theorists can use this unique work to produce better and more lasting results for conflict ridden communities

Polarization, Populism, and the New Politics Banu Baybars, Sarphan Uzunoğlu, 2019-09-27

Populism is one of the most frequently used terms in today's political discussions. From Turkey to the United States of America, the effect of populist politicians is felt more than ever today. Indeed, it is an extremely common occurrence to come across a political commentator defining a politician as a populist in newspapers or TV shows. This volume brings together scholars from various disciplines and invites its readers to consider the role played by both conventional and new media in the rise of this political movement. Its focus is not limited to the USA nor the UK but investigates populism in countries such as Turkey and Spain. It will appeal to readers interested in classical populism and polarization studies as well as those interested in post-truth studies.

Peacebuilding in Africa Kelechi A. Kalu, George Klay Kieh Jr., 2021-08-18. *Peacebuilding in Africa: The Post Conflict State and Its Multidimensional Crises* argues that building enduring peace in post-conflict states in Africa requires comprehensive state-specific approaches that address the multidimensional crises that generated civil conflict and instabilities in these countries. Contributors examine states such as Burundi, the Democratic Republic of the Congo, Liberia, Rwanda, Sierra Leone, South Sudan, and Sudan to demonstrate that peacebuilding projects in each of these states must address the cultural, economic, political, and social root causes of their respective underlying civil conflicts. In addition, contributors prove that peacebuilding projects must be shaped by the centrality of human security, the respect for ethno-cultural diversity, the advancement of human material well-being, the protection of political rights and civil liberties, and the redesigning of the military and security architecture to ensure the safety of all citizens from both internal and external threats.

To Democratize or Not? Trials and Tribulations in the Postcolonial World Volkan Ipek, Ebru Ilter-Akarcay, 2020-07-06. This volume, a product of the first Tricontinental Conference organized by Yeditepe University, Istanbul, brings together perspectives on democracy and development in Africa, the Middle East, and Latin America. Representing local voices and insight, the contributors here respond to the dearth of comparative analysis on these three regions. In spite of the differences observed in colonial practices and postcolonial transitions, a shared disenchantment with the performance of competitive politics comes to the forefront in these geographical areas. Decades after decolonization, low-intensity democracy and the continuing potential for democratic reversals and backsliding make the study of these three regions relevant. Considering the debates on protests, social upheavals, activism, change, and continuity, this book encourages the reader to survey the various trials and tribulations of the postcolonial era.
