

CONSTRUCTIVISM (LEARNING THEORY)

DEFINITION

The constructivist learning theory explains that we learn by 'constructing' knowledge in our minds through interaction with our environments. Constructivism argues that learners have an active role in thinking things through, mulling them over, and coming to logical conclusions. We also build on our prior knowledge, like a builder constructing his skyscraper.

KEY CONCEPTS

- Learning is a cognitive process
- We learn through experiences
- We learn through social interactions
- We use prior knowledge to make sense of new information
- Learning occurs in linear stages
- Students should learn actively rather than passively

Matthews, 1998-02-28 Constructivism is one of the most influential theories in contemporary education and learning theory It has had great influence in science education The

papers in this collection represent arguably the most sustained examination of the theoretical and philosophical foundations of constructivism yet published Topics covered include orthodox epistemology and the philosophical traditions of constructivism the relationship of epistemology to learning theory the connection between philosophy and pedagogy in constructivist practice the difference between radical and social constructivism and an appraisal of their epistemology the strengths and weaknesses of the Strong Programme in the sociology of science and implications for science education The book contains an extensive bibliography Contributors include philosophers of science philosophers of education science educators and cognitive scientists The book is noteworthy for bringing this diverse range of disciplines together in the examination of a central educational topic

Psychology for the Classroom: Constructivism and Social Learning Alan Pritchard, John Woollard, 2013-05-13 Psychology for the Classroom Constructivism and Social Learning provides a lively introduction to the much debated topics of talk and group collaboration in classrooms and the development of interactive approaches to teaching The authors provide a background to research in constructivist and social learning theory offering a broad and practical analysis which focuses on contemporary issues and strategies including the use of e learning and multimedia Throughout the book theory is linked with its practical implications for everyday teaching and learning and chapters incorporate the history of constructivist and social learning theory and key thinkers pedagogical implications practical strategies for the classroom constructivist theory and e learning Case studies and vignettes demonstrating best practice are used throughout the text illustrating how monitored collaboration between learners can result in an effective learning environment where targets are met Essential reading for practising teachers and students this book is a valuable guide for those looking to provide effective teaching and learning within a constructivist framework

Faith-Based Education That Constructs HeeKap Lee, 2010-08-09 Constructivism is everywhere It is a hot issue at this time in the field of philosophy education technology and religion However can constructivism be an alternative approach in faith based education While some conclude that Jesus knew learning was an active knowledge creating process and that he always encouraged his disciples to think deeply and go beyond the surface level others would find that constructivism undercuts faith based education because of its claims to relativity For example constructivists claim that meaning is imposed on the world by us rather than existing in the world independently from us Thus they proclaim that truth is relative to particular times places and people Christians hold that truth does exist absolutely So how can there be a way forward for faith based educators who see the good in the constructivist approach In Faith Based Education that Constructs readers will find a unique approach whereby constructivism may appropriately be applied to a faith based education setting Although disagreement can occur between constructivism and faith based education this book concludes that constructivist thought and Christian faith based education are in the end congruent and harmonious in significant ways Those faith based educators who continue to hold cautionary views of radical constructivist assertions against absolute truths need not disregard all other

aspects of constructivism Constructivism Reconsidered in the Age of Social Media Chris Stabile, Jeff Ershler, 2015-12-16
 No longer relegated to just the classroom learning has become universal through the use of social media Social media embodies constructivism itself as the users engage in the development of their own meaning And constructivism is relevant to education and learning theory and technological advance can be better understood in the light of one another This volume explores particular areas influenced by constructivist thinking and social media such as student learning faculty development and pedagogical practices practical and useful ways to engage in social media and dialogue and discussions regarding the nature of learning in relation to the technology that has changed how both faculty and students experience their educational landscape This is the 144th volume of this Jossey Bass higher education series It offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers *Creating and Sustaining the Constructivist Classroom* Bruce A. Triantafyllou,2019 Essay from the year 2013 in the subject Philosophy Theoretical Realisation Science Logic Language grade 10 0 10 0 University of Macedonia language English abstract The main aim of this essay is to examine the impact of constructivism on adult education by implementing some of the constructivist approaches to e learning We observe in recent years that constructivist philosophy has a great impact on adult education Constructivism as a philosophical stream draws its content from various theories His main point is that knowledge is directly related to construct Individuals depending on their emphasis on external reality form a personal view focusing of course on the importance of social processes in the production of knowledge On the other hand we observe the adoption of a new way of learning e learning that takes place in a different environment the distance environment and not in the traditional class environment Of course it is a fact that in the context of e learning adult educators have to use some special techniques and adopt different approaches in order to successfully pass their teaching work In particular each adult learner has his own particular needs and experiences which the trainer has to recognize and take into account in the design of his teaching The philosophical and methodological changes that the trainer will adopt will therefore significantly affect his teaching **Teaching and Learning with Technology** Concetta M. Stewart,Catherine C. Schifter,Melissa E. Markaridian Selverian,2010-07-02 Today new media is both augmenting and extending the traditional classroom with a variety of technology based tools available to both students and faculty and has created new virtual classrooms for anywhere anytime availability to education Despite the enormous potential for technology to support the educational enterprise in this emerging creative economy technologies are still not yet fully integrated in the classroom and their association with educational outcomes is as yet unclear This book profiles scholarly work from around the world to examine closely the effectiveness of the newest media in education at bridging the gaps among and between teachers students and subject matter at all levels from K 12 through adult education These pieces are theory based investigations with implications for future research theory and application Contributors examine how the fields of education and new media have evolved and are continuing to evolve pedagogically and practically from predominantly instructivist with a passive one way teaching format to constructivist including teacher and learner controlled sensorially immersive and socially interactive exchanges This book will be of

interest to students and faculty in the areas of new media in education including distance learning online learning and virtual learning

Constructivist Education in an Age of Accountability David W. Kritt, 2018-01-16 This book contrasts authentic approaches to education with classroom practices based primarily on standards external to the individuals who are supposed to learn While other books tend to promote either a desperate scramble for meeting standards or determined resistance to neoliberal reforms this book fills that gap in ways that will inspire practitioners prospective teachers and teacher educators Mandates pay only lip service to constructivist and social constructivist principles while thwarting the value of both students and teachers actively creating understandings Authors in this book assert the central importance of a range of constructivist approaches to teaching learning and thinking inviting careful reflection on the goals and values of education
