*Creative Technologies for Multidisciplinary Applications* Connor, Andy M.,2016-03-29 Given that institutions of higher education have a predisposition to compartmentalize and delineate areas of study creative technology may seem oxymoronic On the contrary the very basis of western thought is found in the idea of transcendent knowledge The marriage of opposing disciplines therefore acts as a more holistic approach to education Creative Technologies for Multidisciplinary Applications acts as an inspiration to educators and researchers who wish to participate in the future of such multidisciplinary disciplines Because creative technology encompasses many applications with the realm of art gaming the humanities and digitization this book features a diverse collection of relevant research for the modern world It is a pivotal reference publication for educators students and researchers in fields related to sociology technology and the humanities

Exploring Heutagogy in Higher Education Amnon Glassner,Shlomo Back,2020-04-17 This book explores heutagogy self determined learning a new approach to teaching and learning in higher education and proposes a paradigm shift in teaching learning and the educational enterprise and ecosystem The first part of the book presents the philosophical psychological and sociological foundations of heutagogy and describes lessons learned from prior experiences of its implementation The second part presents a collaborative self study of five heutagogy courses in higher education The third discusses how the academic community can enhance the paradigm change and compares heutagogy to similar academic approaches The concluding chapter of the book explores the question of what next and suggests some possible elaborations of heutagogy At the beginning it was very difficult for me to appreciate the course s mode of learning All my life I had learned in a traditional manner Occasionally I felt that I was being thrown into deep water without a lifeguard But as the course progressed I succeeded in letting go of my deeply rooted habits and discovered a new learning approach through which I found in myself a new learner Student s reflection this book suggests a novel approach to learning and education and will become a widely read one Dr Lisa Marie Blaschke Carl von Ossietzky University of Oldenburg

**Handbook of Research on Innovations in Non-Traditional Educational Practices** Keengwe, Jared,2020-12-11 While many school districts and institutions of higher education still cling to the traditional agrarian school year with a factory model delivery of education and Carnegie units based on seat time when most people are no longer farmers factory workers or reliant on learning in a classroom there are bursts of promising practices that buck the norm by questioning the educational value of these traditions

Though researchers have investigated the potential of students learning in their own homes via personalized instruction delivered by computers rather than attending traditional institutions the status quo in education has remained stubbornly resistant to change Mixed reality simulations year round schooling grouping students by competencies instead of age and game based teaching are just a few of the educational innovations that seek to maximize learning by recognizing that innovation is essential for successfully teaching students in the modern era The Handbook of Research on Innovations in Non Traditional Educational Practices is a comprehensive reference source that examines various educational innovations how they have developed workarounds to navigate traditional systems and their potential to radically transform teaching and learning With each chapter highlighting a different educational innovation such as experiential learning game based learning online learning and inquiry based learning and their applications in all levels of education this book explores the issues and challenges these educational innovations face as well as their impact It is intended for academicians professionals administrators and researchers in education and specifically benefits academic deans vice presidents of academic affairs graduate students faculty technology leaders directors of teaching and learning centers curriculum and instructional designers policymakers principals and superintendents and teachers interested in educational change

**Language Matters** Timothy Reagan,2009-04-01 This book addresses a timely and very important topic language in education Language apparently is a very tricky business On the one hand everyone uses language and virtually everyone has strong views about language In the educational domain this seems to be especially true Language is not merely an intrinsic component of the educational process as the medium of instruction in the classroom but also serves as the mediator of social reality for students and teachers alike It plays a central role in articulating and conveying not only social cultural and empirical ideas but ideological concepts as well It is also used to make judgments about the speaker not to mention its role in maintaining differential power relations And yet in spite of this the role of language is not sufficiently recognized in classroom practice much of the time Nor is language except in fairly narrow ways really an especially central part of the curriculum in spite of its incredible importance To be sure we do spend a great deal of time and money attempting to teach students to read and write that is to provide them with basic literacy skills and we provide nominal support for foreign language education programs We also provide limited support for children coming to school who do not speak English What we do not do though is to recognize the absolute centrality of language knowledge and language use for the educated person This book seeks to address these issues from the broad perspective of critical pedagogy     **New Media and Digital**

**Pedagogy** Michael G. Strawser,2017-07-05 New Media and Digital Pedagogy Enhancing the Twenty First Century Classroom addresses the influence of new media on instruction higher education and pedagogy The contributors specifically examine the practical and theoretical implications of new media and the influence of new media on education This book emphasizes the changing landscape of education and technology and creates a foundational lens and framework for thinking through and

navigating higher education in a digital and new media driven context      Elevating Intentional Education Practice in Graduate Programs El-Amin, Abeni, 2023-01-06 Educational leaders must institutionalize implement execute and review initiatives to ensure graduate programs exceed performance metrics of educator quality educational services activities technology continuous improvement and intentional education practice Likewise leaders must recognize that stakeholder engagement is invaluable to alleviate challenges in developing assessing and improving graduate program performance Elevating Intentional Education Practice in Graduate Programs analyzes how higher education leaders implement performance improvements for graduate education and provides an interdisciplinary perspective of how issues and challenges concerning graduate program performance effectiveness impact stakeholders Covering key topics such as online education student learning organizational development and authentic leadership this reference work is ideal for researchers scholars academicians practitioners educators and students
