Constructivist Instruction Sigmund Tobias, Thomas M. Duffy, 2009-05-28 Bringing together leading thinkers from both sides of the hotly debated controversy about constructivist approaches to instruction this book presents the evidence for and against constructivism and detailed views from both sides of the controversy A distinctive feature is the dialogue built into it between the different positions

Vygotsky for Educators Yuriy V. Karpov, 2014-06-09 Lev Vygotsky's approach to children's learning and development centers on adult mediation adults engage children in age appropriate activities and promote in this context the development of new motives and tools for thinking problem solving and self regulation Although this approach has earned widespread recognition in the global scientific community English speaking educators remain relatively unfamiliar with its contemporary elaborations for practical application Yuriy V Karpov offers the first comprehensive English introduction to contemporary elaborations of Vygotsky's ideas and their practical applications from birth through adolescence He demonstrates the advantages of the Vygotskian approach over both traditional and constructivist education This volume will prove an invaluable resource for educators and students in teacher education programs as well as for everyone interested in educational and developmental psychology

*The Scholarship of Teaching and Learning in and Across Disciplines* Kathleen McKinney, 2013 Provides a state of the field review of recent SoTL scholarship

**The Scholarship of Teaching and Learning In and Across the Disciplines** Kathleen McKinney, 2013-01-21 The scholarship of teaching and learning SoTL began primarily as a discipline based movement committed to exploring the signature pedagogical and learning styles of each discipline within higher education with little exchange across disciplines As the field

has developed new questions have arisen concerning cross disciplinary comparison and learning in multidisciplinary settings This volume by a stellar group of experts provides a state of the field review of recent SoTL scholarship within a range of disciplines and offers a stimulating discussion of critical issues related to interdisciplinarity in teaching learning and SoTL research

Infusing IB Philosophy and Pedagogy into Chinese Language Teaching Mark S. K. Shum, 2015-10-30 This book not only examines what IB philosophy is it also explores the relationship between IB philosophy and Chinese language and culture and introduces a lot of useful and creative teaching pedagogies and methodologies Most importantly this book fills the gap of implementing IB philosophy and pedagogy into Chinese language teaching

Chemistry Education and Contributions from History and Philosophy of Science Mansoor Niaz, 2015-12-23 This book explores the relationship between the content of chemistry education and the history and philosophy of science HPS framework that underlies such education It discusses the need to present an image that reflects how chemistry developed and progresses It proposes that chemistry should be taught the way it is practiced by chemists as a human enterprise at the interface of scientific practice and HPS Finally it sets out to convince teachers to go beyond the traditional classroom practice and explore new teaching strategies The importance of HPS has been recognized for the science curriculum since the middle of the 20th century The need for teaching chemistry within a historical context is not difficult to understand as HPS is not far below the surface in any science classroom A review of the literature shows that the traditional chemistry classroom curricula and textbooks while dealing with concepts such as law theory model explanation hypothesis observation evidence and idealization generally ignore elements of the history and philosophy of science This book proposes that the conceptual understanding of chemistry requires knowledge and understanding of the history and philosophy of science Professor Niaz's book is most welcome coming at a time when there is an urgently felt need to upgrade the teaching of science The book is a huge aid for adding to the usual way presenting science as a series of mere facts also the necessary mandate to show how science is done and how science through its history and philosophy is part of the cultural development of humanity

Gerald Holton Mallinckrodt Professor of Physics these are valence bond VB and molecular orbital MO theories He emphasizes the importance of having rival theories and interpretations in science and its advancement He further argues that this VB MO rivalry is still alive and together the two conceptual frames serve as the tool kit for thinking and doing chemistry in creative manners The author surveys chemistry textbooks in the light of the how the books preserve or not the balance between the two theories in describing various chemical phenomena This Talmudic approach of conceptual tension is a universal characteristic of any branch of evolving wisdom As such Mansoor's book would be of great utility for chemistry teachers to examine how can they become more effective teachers by recognizing the importance of conceptual tension

*Instructional Guidance* Slava Kalyuga, 2015-05-01 The book explores a cognitive load perspective on instructional guidance Cognitive load theory is focused on instructional design implications and prescriptions that flow from human cognitive architecture and it has become one of the leading theories of instructional design According to this theoretical perspective the purpose of instructional guidance is to reduce learner potential cognitive overload by providing appropriate information in the right time and in a suitable format As the learner s level of prior knowledge is considered as the main factor influencing this decision the effect of learner prior knowledge on effectiveness of instructional methods the expertise reversal effect in cognitive load theory provides the basic framework for the book The fully guided direct instruction and minimally guided inquiry discovery or exploratory learning are often discussed in instructional psychology literature as examples of approaches with opposed degrees of guidance provided to the learners This book considers the whole range of the levels of guidance including intermediate levels and approaches the

problem of balancing learner guidance from a cognitive load perspective The significance of this approach is in applying our current knowledge of human cognitive architecture to develop an integrated instructional approach bringing together the best features and advantages of direct instruction and inquiry learning Both direct instruction and inquiry learning approaches have been around for long time and their proponents can produce evidence of their effectiveness This evidence needs to be treated within the context of appropriate learning goals in specific instructional settings for specific types of learners This book provides an unbiased theoretical framework for managing learner instructional guidance and working principles for selecting appropriate levels and methods of instructional guidance e g sequences of exploratory problems and explicit instruction forms and levels of embedded guidance and adapting methodologies optimal for learners at different levels of prior knowledge ECIE 2016 11th European Conference on Innovation and Entrepreneurship Minna Tunkkari Eskelinen,Iiris Aaltio,2016

**Making Meaning by Making Connections** Kathy L. Schuh,2016-10-20 This book documents those first links that students make between content they learn in their classrooms and their prior experiences Through six late elementary school case studies these knowledge construction links are brought to life The links of the students are often rich in describing who these individuals are where they are in their learning process and what is meaningful to them Many times these links point to what has been learned both in and out of school and the contexts when and where that learning took place The mind as rhizome metaphor was used to guide the development and interpretation of the studies while the lens of Peircian semiotics provides an interpretation for these initial links The resulting grounded theory is presented through a rich and extensive presentation of excerpts from classroom observations student interviews and a student writing activity and describes the varying types of student links how the links were prompted the relationships between what the students were learning and what they already knew and specific types of in school links The narrative includes how these links were supported or inhibited in the classroom drawing on the roles of the teachers in the classrooms and what constituted authority sources of information in those classrooms Before exploring the students linking as a process of ongoing semiosis and how this process is part of a dynamic system a study of the relationship between student knowledge

links and achievement is shared This rich narrative will be of interest to scholars and practitioners alike and includes an extensive appendix documenting the research methods
