Towards Tokyo 2020: What Will Contribute to Optimal Olympic Athlete

Performance? Toby Mündel, Glen Davison, Hideaki Soya, Narihiko Kondo, Matthew J. Barnes, 2020-07-22 *Rio, Tokyo Paralympic Games and beyond: How to Prepare Athletes with Motor Disabilities for Peaking* Pierre-Marie Leprêtre, Victoria L. Goosey-Tolfrey, Thomas W. J. Janssen, Claudio Perret, 2017-05-25 In 1960 the 9th Annual International Stoke Mandeville Games were supported for the first time by the Italian Olympic Committee Taking place six days after the Closing Ceremony

of the XVII Olympic Games the paralympic games for disabled athletes were born From Roma in 1960 to London in 2012 the Paralympic Games grew in terms of athletes number from 400 to 4 237 and now brings together more than 164 nations Perret 2015 The word Paralympic derives from the Greek preposition para beside or alongside and the word Olympic Paralympics want to be the parallel Games to the Olympics and illustrate how the two movements exist side by side Paralympics History of the Movement 2016 Now taking place after the Olympics Games the Paralympic Games are the pinnacle of the career of athletes with physical impairments and have become the second largest sport event in the world Perret 2015 Paralympics History of the Movement 2016 Gold and Gold 2011 The first statement of the vision of the International Paralympic Committee IPC i e to create the conditions for athlete empowerment through self determination Paralympics History of the Movement 2016 International Paralympic Committee 2016 shows the importance of the place of the athlete with an impairment at the heart of the Paralympic Movement The ultimate aim of the IPC is to enable Paralympic athletes to achieve sporting excellence and inspire and excite the world International Paralympic Committee 2016 The performance level of athletes with an impairment improved to a point that in the present days sport news and world sport movements focus on the potential advantage of artificial limbs among athletes with amputations and their integration in able bodied competitions Burkett 2010 However they do not represent the totality of athletes with an impairment at the Paralympic Games Athletes with other physical impairments visual deficit spinal cord injury cerebral palsy or else are eligible to compete These impairments induce typical functional and physiological e g cardiovascular thermoregulatory responses to exercise For example spinal cord injury athletes with tetraplegia or paraplegia causes thermoregulatory impairment Goosey Tolfrey et al 2008 and individuals with cerebral palsy have also demonstrated higher thermal and metabolic strain than matched controls during treadmill walking in the heat Maltais et al 2004 Thus hyperthermia among these athletes with an impairment alters their performance compared to their Olympic counterparts Bhambhani 2002 Mechanical performance analysis the description of physiological responses according to the functional impairment or else the response to training and the relationship between laboratory and field testing responses are different parts of a package introduced here to address the aim of the IPC to enable Paralympic athletes to achieve sporting excellence Paralympics History of the Movement 2016 International Paralympic Committee 2016 Paralympic Games held almost immediately following the respective Olympics in the same site Gold and Gold 2011 also have exposed athletes to different environmental conditions In the present 20 odd years three of four Summer Paralympic Games have been or will be organized in the heat with or without significant humidity Beijing 2008 Average weather in September for Beijing China 2016 Rio de Janeiro 2016 Average weather in September for Rio de Janeiro Brazil 2016 and Tokyo 2020 Average weather in September for Ota Japan 2016 It has been established that the environmental conditions not only influences the level of cognitive and exercise performance capacity in trained able bodied individuals Veneroso et al 2015 but their health status may also be affected Due to the above mentioned

impairment in thermoregulatory capacity athletes with spinal cord injury or cerebral palsy may be more susceptible to hyperthermia during exercise Goosey Tolfrey et al 2008 Maltais et al 2004 Bhambhani 2002 During the Paralympic tournament these athletes of the qualified nations were and will be exposed to heat and or humid conditions The hyperthermia induced by exercise among athletes with an impairment plus the effects of heat on core temperature will make their performance in the hot and warm conditions more challenging Some studies have addressed strategies to prevent the physiologic and psychological impairments in athletic performance induced by exercise performed in the heat Goosey Tolfrey et al 2008 Other proposed that wheelchair athletes should follow recommendations advocated for able bodied individuals to minimize their risks of heat stress during competition Bhambhani 2002 In the present issue the authors provide a descriptive approach of performance and especially the preparation of athletes with a physical impairment to optimize their exercise performance We argue that the interactions between environmental conditions and typical responses to exercise of athletes with an impairment and the equipment interactions with athlete s body should be taken into account in the preparation of Paralympic athletes in order to witness the most magnificent sporting display the Paralympic Games Finally the motto of Paralympic movement Spirit in Motion is also the philosophy of the present compendium to present new advances and research findings in the field of applied physiology and biomechanics in exercise within the context of optimize Paralympic preparation and performance of athletes presented an impairment

An Adaptive Region Growing based on Neutrosophic Set in Ultrasound Domain for Image Segmentation XUE JIANG, YANHUI GUO, HAIBIN CHEN, YAQIN ZHANG, YAO LU, Breast tumor segmentation in ultrasound is important for breast ultrasound BUS quantitative analysis and clinical diagnosis Even this topic has been studied for a long time it is still a challenging task to segment tumor in BUS accurately arising from difficulties of speckle noise and tissue background inconsistency To overcome these difficulties we formulate breast tumor segmentation as a classification problem in the neutrosophic set NS domain which has been previously studied for removing speckle noise and enhancing contrast in BUS images The similarity set score and homogeneity value for each pixel have been calculated in the NS domain to characterize each pixel of BUS image Based on that the seed regions are selected by an adaptive Otsu based thresholding method and morphology operations then an adaptive region growing approach is developed for obtaining candidate tumor regions in NS domain
