12. Using ideas from collision theory, explain the following statement.

The Haber process is an industrial process used to produce ammonia ( $\text{NH}_3$ ) for its use in fertilizers. It involves combining nitrogen gas from the air ( $\text{N}_2$ ) and hydrogen gas ( $\text{H}_2$ ) from methane in the reaction  $\text{N}_2 + 3\text{H}_2 \rightarrow 2\text{NH}_3$ . The reaction is performed inside a large steel reactor at a pressure that is 200 times higher than normal (2000 psi) which allows ammonia to be made efficiently.

## Collision Theory 161 Answer Key:

*Quantum Theory of Chemical Reactions* R. Daudel,A. Pullman,L. Salem,A. Veillard,2012-12-06 This treatise is devoted to an analysis of the present state of the quantum theory of chemical reactions It will be divided into three volumes and will contain the contributions to an international seminar organized by the editors The first one is concerned with the fundamental problems which occur when studying a gas phase reaction or a reaction for which the solvent effect is not taken into account The two first papers show how the collision theory can be used to predict the behaviour of interacting small molecules For large molecules the complete calculations are not possible We can only estimate the reaction path by calculating important areas of the potential surfaces Four papers are concerned with this important process Furthermore in one of these the electronic reorganization which occurs along the reaction path is carefully analyzed 6 papers are devoted to the discussion of general rules as aromaticity rules symmetry rules The last two papers are concerned with the electrostatic molecular potential method which is the modern way of using static indices to establish relations between structure and chemical reactivity Volume II will be devoted to a detailed analysis of the role of the solvent and volume III will present important applications as reaction mechanisms photochemistry catalysis biochemical reactions and drug design SOME RECENT DEVELOPMENTS IN THE MOLECULAR TREATMENT OF ATOM ATOM COLLISIONS Chemistry for AQA.
