It Takes a Child to Raise a Parent Janis Clark Johnston, 2013-04-04 While advice abounds from a variety of sources before parents embark on their parenting journeys the only parent preparation we actually receive comes from our family and peer stories Yet most adults do not realize that in day to day challenges of guiding our children something interesting happens As we steer our children through life we reopen our own childhood roads Just when our child most needs us we become needy ourselves as adults and parents we find that we have unresolved raising issues basic needs that were not met in our childhoods Our needs and memories echo and influence many of the parenting decisions we make even though we are unaware of those influences at times Fortunately children help parents reach their needs as much as their parents help them fulfill their own Our child ends up guiding us by connecting us to some earlier time in our life when we encountered distress We dredge up a lesson and we adapt by adhering to or changing the story that we tell ourselves about who we are We renegotiate the five basic needs that surface from our childhood memories as our youngsters pass through each of the developmental phases The self aware parent focuses on creative problem solving by focusing on one interaction at a time *It Takes a Child to Raise a Parent* offers an exploration of how our own childhood memories and needs influence and shape our parenting decisions in our adult lives Offering tips stories from a variety of families and step by step exercises Janis Johnston helps parents better understand and grasp the tools necessary to face parenting challenges head on and to explore new ways of understanding ourselves our children and our family interactions Expectant parents and current parents interested in understanding their own personality development as well as the many moods of childhood and their own children will find clear guidelines for understanding their roles in their children's lives as well as concrete suggestions for how to navigate the choppy waters of raising children

The Sonic Color Line Jennifer Lynn Stoeber, 2016-11-15 Race is a visual phenomenon the ability to see difference At least that is what conventional wisdom has led us to believe Yet *The Sonic Color Line* argues that American ideologies of white supremacy are just as dependent on what we hear voices musical taste volume as they are

on skin color or hair texture Reinforcing compelling new ideas about the relationship between race and sound with meticulous historical research Jennifer Lynn Stoever helps us to better understand how sound and listening not only register the racial politics of our world but actively produce them Through analysis of the historical traces of sounds of African American performers Stoever reveals a host of racialized aural representations operating at the level of the unseen the sonic color line and exposes the racialized listening practices she figures as the listening ear New York University Press *How Cancer Crossed the Color Line* Keith Wailoo, 2011-02-04 In the course of the 20th century cancer went from being perceived as a white woman's nemesis to a democratic disease to a fearsome threat in communities of color Drawing on film and fiction on medical and epidemiological evidence and on patients accounts Keith Wailoo tracks this transformation in cancer awareness revealing how not only awareness but cancer prevention treatment and survival have all been refracted through the lens of race Spanning more than a century the book offers a sweeping account of the forces that simultaneously defined cancer as an intensely individualized and personal experience linked to whites often categorizing people across the color line as racial types lacking similar personal dimensions Wailoo describes how theories of risk evolved with changes in women's roles with African American and new immigrant migration trends with the growth of federal cancer surveillance and with diagnostic advances racial protest and contemporary health activism The book examines such powerful and transformative social developments as the mass black migration from rural south to urban north in the 1920s and 1930s the World War II experience at home and on the war front and the quest for civil rights and equality in health in the 1950s and 60s It also explores recent controversies that illuminate the diversity of cancer challenges in America such as the high cancer rates among privileged women in Marin County California the heavy toll of prostate cancer among black men and the questions about why Vietnamese American women's cervical cancer rates are so high A pioneering study *How Cancer Crossed the Color Line* gracefully documents how race and gender became central motifs in the birth of cancer awareness how patterns and perceptions changed over time and how the war on cancer continues to be waged along the color line *The Problem of the Color Line at the Turn of the Twentieth Century* W. E. B. Du Bois, 2014-12-03 Early essays from the sociologist displaying the beginnings of his views on politics society and Black Americans status in the United States This volume assembles essential essays some published only posthumously others obscure another only recently translated by W E B Du Bois from 1894 to early 1906 They show the first formulations of some of his most famous ideas namely the veil double consciousness and the problem of the color line Moreover the deep historical sense of the formation of the modern world that informs Du Bois's thought and gave rise to his understanding of the problem of the color line is on display here Indeed the essays constitute an essential companion to Du Bois's 1903 masterpiece *The Souls of Black Folk* The collection is based on two editorial principles presenting the essays in their entirety and in strict chronological order Copious annotation affords both student and mature scholar an unprecedented grasp of the range and depth of Du Bois's everyday intellectual and scholarly

reference These essays commence at the moment of Du Bois's return to the United States from two years of graduate level study in Europe at the University of Berlin At their center is the moment of Du Bois's first full self reflexive formulation of a sense of vocation as a student and scholar in the pursuit of the human sciences in their still nascent disciplinary organization that is the institutionalization of a generalized sociology or general ethnology as they could be brought to bear on the study of the situation of the so called Negro question in the United States in all of its multiply refracting dimensions They close with Du Bois's realization that the commitments orienting his work and intellectual practice demanded that he move beyond the institutional frames for the practice of the human sciences The ideas developed in these early essays remained the fundamental matrix for the ongoing development of Du Bois's thought The essays gathered here will therefore serve as the essential reference for those seeking to understand the most profound registers of this major American thinker A seminal contribution to the history of modern thought Compiled and edited by the world's preeminent scholar of early Du Boisian thought these texts represent his most generative period when Du Bois engaged every discipline helped construct modern social science employed critical inquiry as a weapon of antiracism and political liberation and always set his sites on the entire world We know this not by the essays alone but by Nahum Dimitri Chandler's brilliant original and quite riveting introduction If you are coming to Du Bois for the first time of the 500th time this book is a must read Robin D G Kelley author of Freedom Dreams The Black Radical Imagination *Transforming the Mainline Church* Robert A.
