Combating Weapons Of Mass Destruction The Future Of International Nonproliferation Policy:

Combating Weapons of Mass Destruction Nathan E. Busch, Daniel Joyner, 2009-01-01 The spread of weapons of mass destruction poses one of the greatest threats to international peace and security in modern times the specter of nuclear chemical and biological weapons looms over relations among many countries The September 11 tragedy and other terrorist attacks have been painful warnings about gaps in nonproliferation policies and regimes specifically with regard to nonstate actors In this volume experts in nonproliferation studies examine challenges faced by the international community and propose directions for national and international policy making and lawmaking The first group of essays outlines the primary threats posed by WMD proliferation and terrorism Essays in the second section analyze existing treaties and other normative regimes including the Nuclear Non Proliferation Treaty and the Chemical Weapons and Biological Weapons Conventions and recommend ways to address the challenges to their effectiveness Essays in part three examine the shift some states have made away from nonproliferation treaties and regimes toward more forceful and proactive policies of counterproliferation such as the Proliferation Security Initiative which coordinates efforts to search and seize suspect shipments of WMD related materials

International Cooperation on WMD Nonproliferation Jeffrey W. Knopf, 2016-02-15 International efforts to prevent the spread of weapons of mass destruction WMD including nuclear biological and chemical weapons rest upon foundations provided by global treaties such as the Nuclear Non Proliferation Treaty NPT and the Chemical Weapons Convention CWC Over time however states have created a number of other mechanisms for organizing international cooperation to promote nonproliferation Examples range from regional efforts to various worldwide export control regimes and nuclear security summit meetings initiated by U S president Barack Obama Many of these additional nonproliferation arrangements are less formal and have fewer members than the global treaties International Cooperation on WMD

Nonproliferation calls attention to the emergence of international cooperation beyond the core global nonproliferation treaties. The contributors examine why these other cooperative nonproliferation mechanisms have emerged, assess their effectiveness, and ask how well the different pieces of the global nonproliferation regime complex fit together. Collectively, the essayists show that states have added new forms of international cooperation to combat WMD proliferation for multiple reasons, including the need to address new problems and the entrepreneurial activities of key state leaders. Despite the complications created by the existence of so many different cooperative arrangements, this collection shows the world is witnessing a process of building cooperation that is leading to greater levels of activity in support of norms against WMD and terrorism.

International Law and the Proliferation of Weapons of Mass Destruction Daniel H. Joyner, 2009-03-05

Proliferation of WMD technologies is by no means a new concern for the international community. Indeed, since the signing of the Nuclear Non-proliferation Treaty in 1968, tremendous energies have been expended upon diplomatic efforts to create a web of treaties and international organisations regulating the production and stockpiling of WMD sensitive materials within states, as well as their spread through the increasingly globalised channels of international trade to other states and non-state actors. However, the intervention in 2003 by Western powers in Iraq has served as an illustration of the importance of greater understanding of and attention to this area of law, as disagreements over its content and application have once again led to a potentially destabilising armed intervention by members of the United Nations into the sovereign territory of another member state. Other ongoing disputes between states regarding the character of obligations assumed under non-proliferation treaty instruments and the effect of international organisations' decisions in this area form some of the most contentious and potentially destabilising issues of foreign policy concern for many states. This book provides a comprehensive analysis of international law and organisations in the area of WMD proliferation. It will serve both as a reference for understanding the law as it currently exists in its political and economic context, as well as an analysis of areas in which amendments to existing law and organisations are needed.

The European Union's Nuclear Non-proliferation Policy Manuel Herrera, 2025-04-15

This book looks at European Union (EU) attempts to manage the risks associated with nuclear non-proliferation and assesses its performance and external challenges. The introductory section delves into current academic scholarship elucidating the concepts of contestation and performance. The second section provides an overview of the historical and institutional evolution, and the third scrutinizes the performance. The final section examines present policy with case studies on the EU's bilateral relations with Iran and India. Adopting a focus on both the development and performance of the EU's non-proliferation and disarmament policy, as well as its contestation from non-Western countries, this book provides a solid and innovative contribution to existing debates on both the EU's non-proliferation and foreign policy. The book will appeal to scholars, researchers, and practitioners of International Relations, European Union Studies, and Nuclear Non-Proliferation, as it provides an analysis of the intricacy of the EU's non-proliferation policy, offering fresh perspectives and empirical evidence.

Beyond Sand and Oil Jack Caravelli, 2011-01-20 This text provides an up to date overview of nuclear weapons in the politically fragile Middle East discussing the evolution and future of national programs as well as the current challenge posed by Iran Shortly after World War II the Middle East became a locus for nations seeking to acquire nuclear missiles and the means to deliver them to their enemies Israel was the first Libya and Iraq followed suit Pakistan now possesses a substantial number of nuclear weapons to which longtime rival India will no doubt respond The implications of the political and security dynamics of the Middle East for the United States and other nations are truly profound and sobering Beyond Sand and Oil provides a nation by nation overview of the evolution of nuclear weapons programs in what is likely the world's most politically unstable region A detailed assessment of Iran's prospects for becoming a nuclear weapons state and how Israel the Arab world and the international community will respond to that outcome is also included **Chinese and Indian**

Strategic Behavior George J. Gilboy, Eric Heginbotham, 2012-03-12 This book offers an empirical comparison of Chinese and Indian international strategic behavior It is the first study of its kind filling an important gap in the literature on rising Indian and Chinese power and American interests in Asia The book creates a framework for the systematic and objective assessment of Chinese and Indian strategic behavior in four areas 1 strategic culture 2 foreign policy and use of force 3 military modernization including defense spending military doctrine and force modernization and 4 economic strategies including international trade and energy competition The utility of democratic peace theory in predicting Chinese and Indian behavior is also examined The findings challenge many assumptions underpinning Western expectations of China and India

Disarmament under International Law John Kierulf, 2017-01-01 Russia's annexation of Crimea and involvement in the conflict in eastern Ukraine has in many respects set back post Cold War improved relations between Russia the United States and Europe The continued war in Syria threatens the security and stability of many countries in the Middle East and attacks by ISIS and other terrorist organizations are causing increased fear and instability in Iraq and in neighbouring countries In many areas negotiations on disarmament and arms control are at a standstill In Disarmament under International Law John Kierulf examines and discusses how disarmament arms control and non proliferation of both conventional weapons and weapons of mass destruction are regulated in existing treaties and conventions From his perspective as a former disarmament negotiator Kierulf explains the United Nations disarmament machinery and procedures and describes the UN's essential role in promoting disarmament Underlining the continued and serious threat posed by nuclear weapons Kierulf appeals for increased and effective international efforts to reduce their number and ultimately eliminate them Presenting information and analysis on a comprehensive range of issues Disarmament under International Law is an essential guide for anyone interested in gaining knowledge about the current state of international security The Treaty Prohibiting Nuclear Weapons Jonathan L. Threats of Force Francis Grimal, 2013 Adopting an interdisciplinary approach and drawing on the works of strategic literature and international relations theory this book examines the theoretical nature behind a threat of force in order to inform and explain why and how the normative structure operates in the way it does The core of the book addresses whether Article 2 4 is adequately suited to the current international climate and if not whether an alternative means of rethinking Article 2 4 would provide a better solution

Technology Transfers and Non-Proliferation Oliver Meier, 2013-09-05 This edited volume examines the issue of the proliferation of dual use technology and the efforts of the international community to control these technologies Efforts to stop the spread of weapons of mass destruction WMD increasingly focus on preventing the proliferation and misuse of dual use technologies information materials and equipment that can be easily applied for peaceful and hostile purposes The threat of terrorist attacks with nuclear biological or chemical weapons in particular makes it necessary to develop a sustainable non proliferation policy that effectively hinders the misuse of dual use technologies In this book leading non proliferation experts from different regions of the world reflect on the political legal and technical obstacles with an aim to finding a better balance between control and cooperation in dual use technology transfer regulations This broad approach makes it possible to compare regimes which may be structurally different but are similar in the way they attempt to regulate dual use technology transfers by balancing controls and cooperative approaches This book will be of much interest to students of weapons proliferation arms control global governance international organizations and international security

State Behavior and the Nuclear Nonproliferation Regime Jeffrey R. Fields, 2014-10-15 This is the first book length study of why states sometimes ignore oppose or undermine elements of the nuclear nonproliferation regime even as they formally support it Anchored by the Treaty on the Non Proliferation of Nuclear Weapons the nuclear nonproliferation regime is the constellation of agreements initiatives and norms that work in concert to regulate nuclear material and technology The essays gathered here show that attitudes on nonproliferation depend on a complex contingent decision calculus as states continually gauge how their actions within the regime will affect trade regional standing and other interests vital to any nation The first four essays take theoretical approaches to such topics as a framework for understanding challenges to collective action clandestine proliferation under the Bush and Obama administrations and its impact on regime legitimacy threat construction as a lens through which to view resistance to nonproliferation measures and the debate over the relationship between nuclear disarmament and nonproliferation Essays comprising the second part of the book use regional and state specific case studies to look at how U S security guarantees affect the willingness of states to support the regime question the perceived spoiler role of a vocal minority within the Non Aligned Movement challenge notions that Russia is using the regime to build a coalition hostile to the United States contrast nonproliferation strategies among Latin American countries and explain the lag in adoption of an

Additional Protocol by some Middle East and North African countries Getting countries to cooperate on nonproliferation efforts is an ongoing challenge These essays show that success must be measured not only by how many states join the effort but also by how they participate once they join **Handbook of Governance and Security** James Sperling, 2014-08-29 The Handbook is divided into four sections which examine in turn the emergence evolution and forms of security governance as well as the theoretical orientations that have so far dominated the literature networks multilateralism regimes and sy

The Interception of Vessels on the High Seas Efthymios Papastavridis, 2014-08-28 The principal aim of this book is to address the international legal questions arising from the right of visit on the high seas in the twenty first century This right is considered the most significant exception to the fundamental principle of the freedom of the high seas the freedom in peacetime to remain free of interference by ships of another flag It is this freedom that has been challenged by a recent significant increase in interceptions to counter the threats of international terrorism and WMD proliferation or to suppress transnational organised crime at sea particularly the trafficking of narcotics and smuggling of migrants The author questions whether the principle of non interference has been so significantly curtailed as to have lost its relevance in the contemporary legal order of the oceans The book begins with an historical and theoretical examination of the framework underlying interception This historical survey informs the remainder of the work which then looks at the legal framework of the right of visit contemporary challenges to the traditional right interference on the high seas for the maintenance of international peace and security interferences to maintain the bon usage of the oceans navigation and fishing piracy j ure gentium and current counter piracy operations off the coast of Somalia the problems posed by illegal unregulated and unreported fishing interdiction operations to counter drug and people trafficking and recent interception operations in the Mediterranean Sea organised by FRONTEX **Norm Dynamics in Multilateral Arms Control** Harald Muller, Carmen Wunderlich, 2013-04-01

Efforts to create or maintain rules to contain the risks stemming from an unrestrained multilateral arms race are at the core of a world order based on consensual norms rather than on a pure balance of power Whereas security cooperation is conventionally considered to be motivated primarily by interest and security based factors studies have shown that all actors use moral arguments and are deeply embedded in the normative patterns surrounding their realm of action **Norm Dynamics in Multilateral Arms Control** based on research conducted by a large PRIF team led by Harald M **Nuclear**

Non-Proliferation in International Law Jonathan L. Black-Branch, Dieter Fleck, 2015-09-24 This second Volume in the book Series on Nuclear Non Proliferation in International Law discusses the legal interpretation and implementation of verification and compliance with the Treaty of the Non Proliferation of Nuclear Weapons 1968 the Comprehensive Nuclear Test Ban Treaty 1996 and the Treaty establishing the European Atomic Energy Community EURATOM 1957 It specifically examines the question contested in recent academic writings whether the International Atomic Energy Agency IAEA is competent to verify not only the correctness but also the completeness of national declarations Topical legal issues of

verification and its technical and political limits as well as peaceful settlement of disputes and countermeasures are discussed in depth The Series on Nuclear Non Proliferation in International Law provides scholarly research articles with critical commentaries on relevant treaty law best practice and legal developments thus offering an academic analysis and information on practical legal and diplomatic developments both globally and regionally It sets a basis for a further constructive discourse on the topic at both national and international levels A Third Volume to be published in Autumn 2016 will focus on legal issues of safety and security of the use of nuclear energy for peaceful purposes Jonathan L Black Branch is Professor of International Law Royal Holloway University of London a Member of Wolfson College Oxford Chairman of the International Law Association ILA Committee on Nuclear Weapons Non Proliferation and Contemporary International Law Dieter Fleck is Former Director International Agreements Member of the Advisory Board of the Amsterdam Center for International Law ACIL Honorary President International Society for Military Law and the Law of War Rapporteur of the ILA Committee on Nuclear Weapons Non Prolife ration and Contemporary International Law European Security Governance and the European Neighbourhood after the Lisbon Treaty Christian Kaunert, Sarah Léonard, 2013-09-13 The EU has often been considered to be a weak security actor However any assessment of the EU s role in international security is underpinned by a specific understanding of security This book is based on a broad understanding of security We consider that security concerns are increasingly triggered by challenges such as terrorism climate change mass migration flows and many other non traditional security issues This book tries to capture these aspects of the EU s fast changing security policies following the entry into force of the Lisbon Treaty on 1 December 2009 There are several common themes stemming from a combined reading of the chapters Firstly the EU has sought to simultaneously pursue its security objectives and spread its values such as democracy the rule of law and human rights by encouraging reforms in its neighbourhood However it is increasingly evident that there are tensions and contradictions between these two objectives which can be illuminated and better understood by considering another strand of literature with which there has been little engagement in EU studies to date namely the literature on human security This book is the first to analyse these hugely topical developments in European security after the Lisbon Treaty It was published as a special issue of Perspectives on European Politics and Society
