FCC Record United States. Federal Communications Commission, 2018 **Information Architecture** Louis Rosenfeld, Peter Morville, Jorge Arango, 2015-09-09 Annotation The fourth edition of this guide focuses on information architecture as a set of tools and techniques for dealing with today's tough information organization problems. It's ideal for anyone involved in any aspect of design. The universal and timeless principles of information organization described in the book's first three editions still apply in our increasingly mobile world. In the fourth edition, the authors cast those principles in the context of current practice using many updated examples and illustrations. Microeconomics David Besanko, Ronald Braeutigam, 2020-05-27 Microeconomics is a classroom-tested resource for learning the key concepts, essential tools, and applications of microeconomics. This leading textbook enables students to recognize and analyze significant data patterns and trends in real markets through its integrated student-friendly approach to the subject, providing practice problems, hands-on exercises, illustrative examples, and engaging applications that ground theory firmly in the real world. Each chapter opening with a set of clearly defined learning goals based on the Bloom Taxonomy features numerous Learning by Doing (LBD) problems, mathematical and graphical data, and varied problem sets focused on current events. Now in its sixth edition, the text offers extensive new and revised content throughout. All applications reflect current data and important new developments in the field of economics, including behavioral economics, randomized controlled trials (RCTs) in policy evaluation, and design and computational-based microeconomics. Updated chapter openers designed to increase student interest cover topics including the economic impacts of climate change, U.S. household income and spending, surge pricing by Uber and Lyft, the effect of immigration on wages, and advances in robotics, automation, artificial intelligence, and more. **Getting Price Right** Gerald Smith, 2021-10-12 Winner 2022 Leonard L. Berry Marketing Book Award, American Marketing Association. How do leaders, managers, and proprietors go about the essential task of setting prices? What biases enter into this process, and why? How can a business de-bias its price setting to become more productive, strategic, and profitable? Combining perceptive insights from behavioral economics with leading-edge ideas on price management, this book offers a new approach to pricing. Gerald Smith demonstrates why understanding reframing and refining everyday pricing processes: a firm's or manager's pricing orientation results in a better long-term pricing strategy. He explores how pricing actually happens in practice and shows how to identify and remove the psychological blinders that cause suboptimal decisions and policies. Smith details how to improve pricing orientation by combining the soft behavioral skills that intuitively shape and refine pricing practice with the hard analytic skills that guide and structure pricing strategy. The result is more rational and more profitable pricing with respect to not only revenue and profitability but also employee productivity and customer satisfaction. Offering an accessible and actionable model, *Getting Price Right* is the first book to apply behavioral economics to managerial price setting. It is a must-read for corporate business leaders, thought leaders, and professionals interested in advances in pricing and for
