Road to Power Laura Colby, 2015-03-24 Follow a pioneer's journey from factory floor to CEO Road to Power is the story of how Mary Barra drove herself to the pinnacle of a company that steers the nation's wealth Beginning as a rare female electrical engineer and daughter of a General Motors die maker Barra spent more than thirty years building her career before becoming the first woman to ever lead a global automaker With 155 billion in sales and 200 000 employees GM is widely considered to be a proxy for the U S economy making Barra's position arguably the most important corporate role a woman has ever held This book describes the personal character choices and leadership style that enabled her to break through the glass ceiling When 52 year old Mary Barra was named CEO of General Motors in 2013 only people outside of the company were surprised She had done everything from working on the factory floor to overseeing manufacturing from improving union relations to paring down bureaucracy and from running human resources to helping drag the company back from its 2009 bankruptcy This book details each step of her career and the lessons she learned along the way Learn how Mary Barra's willingness to take on diverse assignments helped steer her career trajectory Examine the fine details of Barra's management style and her ability to relate to colleagues Discover the qualities and experiences Barra had that drove her to lead this male dominated profession Study the valuable lessons Barra learned at each stage in her professional life and why they stuck with her throughout her journey to the top Barra is most certainly a pioneer for women in business but she's also a living lesson as to how far the right outlook skills and drive can take you in your career Road to Power explores the talent

and the mindset that got her all the way to the top Hidden Value Charles A. O'Reilly, Jeffrey Pfeffer, 2000 The authors provide vivid detailed case studies of several organizations to illustrate how long term success comes from value driven inter related systems that align good people management with corporate strategy Industries in Europe P. S. Johnson, 2003-01-01 This book is to be recommended as a valuable reference source the self contained chapters provide well written and informative introductions to the industries covered and the authors also give helpful guidance to further reading Eleanor J Morgan The Economic Journal This important book presents an authoritative up to date examination of a number of major industries in Europe It offers valuable insights into the nature of industrial activity in Europe as well as providing comprehensive introductions to a series of key industries such as defence construction tourism and biotechnology **Car Wars: Fifty Years of Backstabbing, Infighting, And Industrial Espionage in the Global Market** Mantle Jonathan, 2012-01-05 An astonishing eye opening chronicle Publisher s Weekly of backstabbing infighting and industrial theft and espionage in the world s biggest business It makes empires it destroys economies it shapes history Welcome to the world s biggest business the automobile industry A hundred years ago there were six highly experimental cars Today there are close to 400 million cars on the planet set bumper to bumper on a six lane highway they would stretch well over 200 000 miles more than eight times around the earth With hundreds of billions of dollars at stake is it any wonder that the major car companies wage a relentless war against one another where almost anything goes Here is the story of all the schemes and deceits treacheries and shady deals in the battle for the world s car markets since the dawn of the global economy fifty years ago The first true biography of the automobile Car Wars gives us the automotive history as seen through the windshield of the car with stories so spectacular they are often hard to believe From Gianni Agnelli s deal to make Fiats in the USSR at the height of the cold war and Jose Ignacio Lopez s defection from GM to VW through Pehr Gyllenhammar s foiled attempt to merge Volvo and Renault and on to Nicolas Hayek s deal with Mercedes Benz to build the Swatchcar in 1997 Car Wars is a roller coaster ride down the freeways and the back roads of the world s premier business and an eye opening history of the world s best known and most loved cars In the Jaws of the Dragon Eamonn Fingleton, 2008-03-04 In recent years popular wisdom has held that opening American markets to Chinese goods was the best way to promote democracy in Beijing that the Communist Party s grip would quickly weaken as increasingly affluent Chinese citizens embraced American values That popular wisdom was wrong As Eamonn Fingleton shows in this devastating book instead of America changing China China is changing America Although this process of reverse convergence has been swept largely under the carpet by knee jerk globalists in the American press Americans will soon be hearing much more about it Nowhere is the pattern more obvious than in business Many top American corporations Boeing AT T the Detroit automobile companies among them openly collaborate with the Chinese Communist Party In a stunning rejection of Western values Yahoo even provided the Chinese secret police with vital evidence that resulted in a ten year jail sentence for one of its Chinese subscribers a brave young

dissident under draconian censorship laws Selling the American national interest short countless other corporations abjectly do Beijing's lobbying in Congress This book the culmination of twenty years of study also breaks new ground by revealing the secret behind China's phenomenal savings rate Top leaders literally force the Chinese people to save through a highly counterintuitive and to ordinary citizens virtually invisible policy called suppressed consumption This practice which is to economics roughly what steroids are to sport is fundamentally incompatible with Western ideas of fair global competition It is reinforced by an Orwellian system of political control that as Fingleton reveals utilizes an ancient bureaucratic tool called selective enforcement a form of blackmail that instills a silent reign of terror throughout Chinese society Most worryingly selective enforcement can readily be unleashed on any American corporation with interests in China which is to say just about every member of the Fortune 500 While the Chinese people's rising affluence is of course an occasion for wholehearted rejoicing Uncle Sam should give the Chinese power system a wide berth lest he catch his coattails in the jaws of a dragon

While America Aged Roger Lowenstein, 2008 From the bestselling author of *Buffett* and *Origins of the Crash* comes a wake up call to the pension and retirement crisis facing America and the road map for a way out **Fictions Inc.** Ralph Clare, 2014-09-11 *Fictions Inc* explores how depictions of the corporation in American literature film and popular culture have changed over time Beginning with perhaps the most famous depiction of a corporation Frank Norris's *The Octopus* Ralph Clare traces this figure as it shifts from monster to man from force to individual and from American industry to multinational Other Clare examines a variety of texts that span the second half of the twentieth century and beyond including novels by Thomas Pynchon William Gaddis Don DeLillo Richard Powers and Joshua Ferris films such as *Network* *Ghostbusters* *Gung Ho* *Office Space* and Michael Clayton and assorted artifacts of contemporary media such as television's *The Office* and the comic strips *Life Is Hell* and *Dilbert* Paying particular attention to the rise of neoliberalism the emergence of biopolitics and the legal status of corporate bodies *Fictions Inc* shows that representations of corporations have come to serve whether directly or indirectly as symbols for larger economic concerns often too vast or complex to comprehend Whether demonized or lionized the corporation embodies American anxieties about these current conditions and ongoing fears about the viability of a capitalist system *Detroit* Scott Martelle, 2012 A valuable biography sure to appeal to readers seeking to come to grips with important problems facing not just a city but a country *Kirkus* *Detroit* was established as a French settlement three quarters of a century before the founding of this nation A remote outpost built to protect trapping interests its industry took a great leap forward with the completion of the Erie Canal *Detroit* turned iron into stoves and railcars and eventually cars by the millions This vibrant commercial hub attracted businessmen and labor organizers European immigrants and African Americans from the ru *Unwanted Company* Jonathan Crystal, 2018-07-05 In the last quarter century the U S economy has been transformed by a large inflow of direct investment from abroad Foreign companies mainly from Europe and Japan have built factories and acquired U S firms at an ever increasing rate Jonathan

Crystal finds inconsistencies in how American businesses have responded to this globalization of production. U.S. firms, especially multinationals, have conflicting interests regarding investment protection. Crystal shows that many American firms under siege from overseas competitors have already expended considerable energy in obtaining trade protection, but they are competing not only with foreign imports but also with locally established foreign-owned firms. American businesses may favor stricter regulation of foreign companies that threaten their bottom line, but they also consider their own interests as global investors subject to retaliatory protection in other countries. Restrictions on foreign investment, it seems, are not so attractive when they are imposed by other countries. Unwanted Company examines the different ways in which important U.S. industries, including semiconductors, automobiles, steel, consumer electronics, telecommunications, and airlines, reacted to this new challenge. It focuses on the political responses of U.S.-owned firms to how Washington ought to regulate foreign direct investment and how it ought to treat foreign-owned firms in the United States. Some industries welcomed or at least didn't oppose foreign investment, whereas others sought restrictive and discriminatory policies. Crystal demonstrates how the nature of the domestic political environment shapes the translation of economic interests into policy preferences.
