Life Before Birth Marjorie A. England,1996 A collection of color photographs ultrasound scans and histology illustrations of normal embryonic and fetal development in utero The descriptions accompanying the photographs describe the labeled structures and serve as a link between the illustrations and as a memory aid for those familiar with embryology All of the illustrations are from human specimens many of which were prepared over 40 years ago when the surgical removal of undamaged fetuses and intact pregnant uteruses was less rare Annotation copyrighted by Book News Inc Portland OR

Disorders of Sex Development John M. Hutson,Garry L. Warne,Sonia R. Grover,2012-02-02 The rapid advances in medicine over the last 50 years have totally changed the outlook for children with disorders of sex development DSD but there is still much to learn This book crystallizes the combined experience of a leading dedicated unit over 25 years in delivering expert medical and surgical care to children with DSD in a holistic environment It documents the most recent advances in the molecular biology and embryology of sex development and describes each disorder in detail The clinical presentation and approach to diagnosis are described both for babies and for children presenting later in childhood or at adolescence The chapters on management highlight all the latest knowledge and include the shared wisdom of the authors on current controversies such as the timing of surgical treatment Finally the authors describe their short medium and long term outcomes which demonstrate the strengths of holistic team management **The Pediatric Spine I** Anthony J. Raimondi,Maurice Choux,Concezio Di Rocco,2012-12-06 It is estimated that the functionally significant body of knowledge for a given medical specialty changes radically every 8 years New specialties and sub specialization are occurring at approximately an equal rate Historically established journals have not been able either to absorb this increase in publishable material or to extend their readership to the new specialists International and national meetings symposia and seminars workshops and newsletters success fully bring to the attention of physicians within developing specialties what is occurring but generally only in demonstration form without providing historical perspective pathoanatomical correlates or extensive discussion Page and time limitations oblige the authors to present only the essence of their material Pediatric neurosurgery is an example of a specialty that has developed during the past 15 years Over this period neurosurgeons have obtained

special training in pediatric neurosurgery and then dedicated themselves primarily to its practice. Centers, Chairs, and educational programs have been established as groups of neurosurgeons in different countries throughout the world organized themselves respectively into national and international societies for pediatric neurosurgery. These events were both preceded and followed by specialized courses, national and international journals, and ever increasing clinical and investigative studies into all aspects of surgically treatable diseases of the child's nervous system.
