*Dynamic Formal Epistemology* Patrick Girard, Olivier Roy, Mathieu Marion, 2011-01-06 This volume is a collation of original contributions from the key actors of a new trend in the contemporary theory of knowledge and belief that we call dynamic epistemology It brings the works of these researchers under a single umbrella by highlighting the coherence of their current themes and by establishing connections between topics that up until now have been investigated independently It also illustrates how the new analytical toolbox unveils questions about the theory of knowledge belief preference action and rationality in a number of central axes in dynamic epistemology temporal social probabilistic and even deontic dynamics

*Debate Dynamics: How Controversy Improves Our Beliefs* Gregor Betz, 2012-08-15 Is critical argumentation an effective way to overcome disagreement And does the exchange of arguments bring opponents in a controversy closer to the truth This study provides a new perspective on these pivotal questions By means of multi agent simulations it investigates the truth and consensus conduciveness of controversial debates The book brings together research in formal epistemology and argumentation theory Aside from its consequences for discursive practice the work may have important implications for philosophy of science and the way we construe scientific rationality as well

*Kristen Segerberg on Logic of Actions* Robert Trypuz, 2013-10-22 This volume describes and analyzes in a systematic way the great contributions of the philosopher Kristen Segerberg to the study of real and doxastic actions Following an introduction which functions as a roadmap to Segerberg's works on actions the first part of the book covers relations between actions intentions and routines dynamic logic as a theory of action agency and deontic logics built upon the logics of actions The second section explores belief revision and update iterated and irrevocable beliefs change dynamic doxastic logic and hypertheories Segerberg has worked for more than thirty years to analyze the intricacies of real and doxastic actions using formal tools mostly modal dynamic logic and its semantics He has had such a significant impact on modal logic that It is hard to roam for long in modal logic without finding Kristen Segerberg's traces as Johan van Benthem notes in his chapter of this book

*Interdisciplinary Works in Logic, Epistemology, Psychology and Linguistics* Manuel Rebuschi, Martine Batt, Gerhard Heinzmann, Franck Lihoreau, Michel Musiol, Alain Trognon, 2014-06-30 This book presents comparisons of recent accounts in the formalization of natural language dynamic logics and formal semantics with informal conceptions of interaction dialogue natural logic and attribution of rationality that have been developed in both psychology and epistemology There are four parts which explore historical and systematic studies the formalization of context in epistemology the formalization of reasoning in interactive

contexts in psychology the formalization of pathological conversations Part one discusses the Erlangen School which proposed a logical analysis of science as well as an operational reconstruction of psychological concepts These first chapters provide epistemological and psychological insights into a conceptual reassessment of rational reconstruction from a pragmatic point of view The second focus is on formal epistemology where there has recently been a vigorous contribution from experts in epistemic and doxastic logics and an attempt to account for a more realistic cognitively plausible conception of knowledge The third part of this book examines the meeting point between logic and the human and social sciences and the fourth part focuses on research at the intersection between linguistics and psychology Internationally renowned scholars have contributed to this volume building on the findings and themes relevant to an interdisciplinary scientific project called DiaRaFor Dialogue Rationality Formalisms which was hosted by the MSH Lorraine Lorraine Institute for Social Sciences and Humanities from 2007 to 2011

Past and Present Interactions in Legal Reasoning and Logic Matthias Armgardt, Patrice Canivez, Sandrine Chassagnard-Pinet, 2015-05-18 This volume explores the relation between legal reasoning and logic from both a historical and a systematic perspective The topics addressed include among others conditional legal acts disjunctions in legal acts presumptions and conjectures conflicts of values Jørgensen's Dilemma the Rhetoric's Dilemma the theory of legal fictions and the categorization of contracts The unifying problematic of these contributions concerns the conditional structures and more particularly the relationship between legal theory and legal reasoning in the context of conditions The contributions in this work constitute the first results of the ANR DFG joint research project JuriLog Jurisprudence and Logic which aims at fostering the cooperation between legal scholars and philosophers On the one hand lawyers and legal scholars have an interest in emphasizing the logical character of legal reasoning In this respect the present enquiry examines the question of how logic especially newer forms of dialogical logic can be made fruitful as a significant area of philosophy for jurisprudence and legal practice On the other hand logicians find in legal reasoning a striving towards clear definitions and inference procedures that is relevant to their discipline In order to fully understand such reciprocal relationships it is necessary to bridge the gap between law logic and philosophy in contemporary academic research The essays collected in this volume all work towards this common goal The book is divided

in three sections In the first part the strong relation between Roman Law and logic is explored with respect to the analysis of disjunctive statements in legal acts The second part focuses on Leibniz s legal theory The third part finally is dedicated to current interactions between law and logic

Johan van Benthem on Logic and Information Dynamics Alexandru Baltag,Sonja Smets,2014-08-27 This book illustrates the program of Logical Informational Dynamics Rational agents exploit the information available in the world in delicate ways adopt a wide range of epistemic attitudes and in that process constantly change the world itself Logical Informational Dynamics is about logical systems putting such activities at center stage focusing on the events by which we acquire information and change attitudes Its contributions show many current logics of information and change at work often in multi agent settings where social behavior is essential and often stressing Johan van Benthem s pioneering work in establishing this program However this is not a Festschrift but a rich tapestry for a field with a wealth of strands of its own The reader will see the state of the art in such topics as information update belief change preference learning over time and

strategic interaction in games Moreover no tight boundary has been enforced and some chapters add more general mathematical or philosophical foundations or links to current trends in computer science The theme of this book lies at the interface of many disciplines Logic is the main methodology but the various chapters cross easily between mathematics computer science philosophy linguistics cognitive and social sciences while also ranging from pure theory to empirical work Accordingly the authors of this book represent a wide variety of original thinkers from different research communities And their interconnected themes challenge at the same time how we think of logic philosophy and computation Thus very much in line with van Benthem's work over many decades the volume shows how all these disciplines form a natural unity in the perspective of dynamic logicians broadly conceived exploring their new themes today And at the same time in doing so it offers a broader conception of logic with a certain grandeur moving its horizons beyond the traditional study of consequence relations
