Dyslexia Developing The Debate Key Debates In Educational Policy:

Dyslexia Julian Elliott, Rod Nicolson, 2016-05-19 Dyslexia is often presented as a clearly delineated condition that can be diagnosed on the basis of appropriate cognitive tests with corresponding forms on intervention. However, this approachable text explores the issues behind this assertion in bringing together leading figures in the field to debate dyslexia. Julian Elliott shows that understandings and usage of the dyslexia label vary substantially with little consensus or agreement and in putting forward his critique draws upon research in several disciplinary fields to demonstrate the irrationality of these arguments. Roderick I. Nicolson demonstrates that current approaches to understanding identification and support of dyslexia are catastrophically flawed in terms of their failure to consider the developmental nature of dyslexia. He develops two themes: first, that the underlying cause of dyslexia is delayed neural commitment for skills and neural circuits; and second, that the cause of the reading disability is the introduction of formal instruction before the dyslexic child's neural circuits for executive function are sufficiently developed. He argues that a more effective and cost-effective approach to identification and support involves assessment for dyslexia rather than of dyslexia. Elliott and Nicolson respond to the points each other raise before Andrew Davis investigates how far the key claims of Elliott and Nicolson can withstand close conceptual investigation and explores the inherent limitations of scientific research on this topic given the value and conceptual issues concerned. **Key**

Perspectives on Dyslexia David Armstrong, Garry Squires, 2014-09-15 This indispensable book critically sets out the skills and knowledge required by a specialist educator for students who present with dyslexia. The British Dyslexia Association Professional Criteria BDA 2012 provides an anchor throughout for this book's content. Chapters are explicitly mapped to specific professional criteria, offering the reader confidence that guidance in *Key Perspectives on Dyslexia* is underpinned by this internationally recognised professional framework. Key issues in the education and care of those affected by dyslexia are critically explained and explored in this publication using both authors' years of specialist experience in this field. As established scholars, both authors also suggest how research can inform and enrich how an educator responds to these issues. The content of this book includes detailed case studies disclosing how dyslexia presents in different individuals and which richly illuminate the issues considered by each chapter. A concise examination of reading instruction in the context of typically developing students and in relation to those who present with dyslexia. This incorporates an expert but accessible review of international policy and educational practice including influential findings from research. Detailed guidance on how to identify possible dyslexia and key issues to consider in referral and assessment of those affected, including associated models here such as Response to Intervention (RTI). Consideration of intelligence and in how this figures in relation to assessment for dyslexia, including the possible role of intellectual disability (ID). Comprehensive evaluation of the role of behaviour in relation to dyslexia with guidance on how this can be used to inform a programme of support for students with social, emotional or behavioural difficulties (SEBD). Consideration of how the professional role of a specialist educator

might travel across the English speaking world and also beyond in China or India Key Perspectives on Dyslexia is an essential text for educators and will become a landmark guide for educational practice and policy

Design Brian Hudson,Marilyn Leask,Sarah Younie,2020-11-26 This book highlights decisions governments have to make about their public education systems the options they have before them and the consequences of their decisions As well as covering issues such as values curriculum teacher training structures and so on the book addresses education planning for epidemics pandemics and disasters Education systems provide the foundations for the future wellbeing of every society yet existing systems are a point of global concern Education System Design is a response to debates in developing and developed countries about the characteristics of a high quality national education service It questions what makes a successful system of education With chapters that draw on experience in education systems around the world each one considers an element of a national education service and its role in providing a coherent and connected set of structures to ensure good education for all members of society Key topics include Existing education systems and what a future system might look like Inclusion and social justice Leadership and teacher education Policy options and the consequences of policy changes This book suggests an education system be viewed as an ecosystem with interdependencies between many different components needing to be considered when change is contemplated It is a vital book for any stakeholders in educational systems including students teachers and senior leaders It would be particularly useful to policy makers and those implementing policy changes

Understanding the Brain Towards a New Learning Science OECD,2002-09-04 This book examines how new scientific developments in understanding how the brain works can help educators and educational policy makers develop new and more efficient methods for teaching and developing educational policies [Making a Difference in Education](#) Robert Cassen,Sandra McNally,Anna Vignoles,2015-04-24 What is working in education in the UK and what isn t This book offers a highly readable guide to what the latest research says about improving young people s outcomes in pre school primary and secondary education Never has this issue been more topical as the UK attempts to compete in the global economy against countries with increasingly educated and skilled work forces The book discusses whether education policy has really been

guided by the evidence and explores why the failings of Britain's educational system have been so resistant to change as well as the success stories that have emerged. Making a Difference in Education looks at schooling from early years to age 16 and entry into Further Education with a special focus on literacy numeracy and IT. Reviewing a large body of research and paying particular attention to findings which are strong enough to guide policy, the authors examine teacher performance, school quality and accountability and the problematically large social gap that still exists in state school education today. Each chapter concludes with a summary of key findings and key policy requirements. As a comprehensive research review, Making a Difference in Education should be essential reading for faculty and students in education and social policy and of great interest to teachers and indeed to anyone who wants to know about the effectiveness of UK education policy and practice and where they should be going.

Dyslexia Morag Hunter-Carsch, 2001-05-18 This text proposes a socially interactive model of dyslexia set within a wider framework of specific learning difficulties. The model is flanked by reflective contributions from writers, researchers and teachers.
