and Diversity in the Academy Gail Crimmins, 2022-08-13 This book explores tried and tested strategies that support student and faculty engagement and inclusion in the academy. These strategies are anchored by a brief exploration of the history and effects of exclusion and deprival in higher education. However while many publications exploring academic inequality focus on the causes and impacts of structural psychological and cultural exclusion based on racism sexism classism and ableism they rarely engage in interventions to expose and combat such deprivilege. Capturing examples of inclusive practices that are as diverse as student and faculty populations these strategies can be easily translated and employed by organisations collectives and individuals to recognise and combat social and academic exclusion within higher education environments.

Neurodiversity Lawrence K. Fung, M.D., Ph.D., 2021-05-24 *Neurodiversity From Phenomenology to Neurobiology and Enhancing Technologies* addresses the totality of neurodiversity through positive explorations of invisible diversities from ADHD and savantism to autism spectrum disorder ASD and dyslexia. Edited by the director of the Stanford Neurodiversity Project the book emphasizes strengths based approaches to clinical practice and investigates interventions to improve the lives of neurodiverse individuals. Following a compelling foreword by Temple Grandin the book proceeds to address neurodiversity in four parts first an introduction that presents neurodiversity's differences in brain function and behavior as part of the normal variation of the human population second presentation of the strengths based model of neurodiversity SBMN including positive psychology neurobiology and SBMN in savantism autism ADHD and dyslexia third a

discussion of neurodiverse individuals in the real world including higher education and employment and finally a review of technologies that enhance our abilities to maximize the potential of neurodiversity including inclusive design and assessment tools that provide support for neurodiverse young adults seeking meaningful employment Neurodiversity From Phenomenology to Neurobiology and Enhancing Technologies provides clinicians educators and other professionals with cutting edge practical and positive information to understand and assist their patients students and other neurodiverse individuals to operate from a position of strength

The Oxford Handbook of Identities in Organizations Andrew D. Brown, 2020-01-16

Conceived as the meanings that individuals attach to their selves a substantial stockpile of theory related to identities accumulated across the arts social sciences and humanities over many decades continues to nourish contemporary research on self identities in organizations In times which are more reflexive narcissistic and fluid the identities of participants in organizations are increasingly less fixed and less certain making identity issues both more salient and more interesting Particular attention has been given to processes of identity construction often styled identity work Research has focused on how why and when such processes occur and their implications for organizing and individual group and organizational outcomes This has resulted in a burgeoning stream of research from discursive dramaturgical symbolic socio cognitive and psychodynamic perspectives that most often casts individuals efforts to fabricate identities as intentional relational and consequential Seemingly intractable debates centred on the nature of identities their relative stability or fluidity whether they are best regarded as coherent or fractured positive or not and how they are fabricated within relations of power combined with other conceptual issues continue to invigorate the field However these debates have also led to some scepticism regarding the future potential of identities research Yet as the chapters in this Handbook demonstrate there are considerable grounds for optimism that identity as root metaphor nexus concept and means to bridge levels of analysis has significant potential to generate multiple compelling streams of theorizing in organization and management studies
