Beaulieu,Alice Diebel,2019-04-15 This book

highlights the experiences of 14 high poverty communities in the rural South that accepted the invitation to be part of the Turning the Tide on Poverty Tide initiative While history would suggest that impoverished places have limited capacity to make good things happen Tide demonstrated otherwise This volume is a testament to the positive work that can be realized when people from all walks of life are accorded the opportunity to discuss deliberate and act on strategies designed to improve the lives of rural people and places in the South The message is clear when local residents are provided a safe space to weigh in on local issues and asked to give respectful consideration to the views of others in their community they create pathways for spurring positive changes Simply put civic engagement propels people to do more for their community and instils in them a sense of hope for what can be accomplished when local people work together This book was originally published as a special issue of the journal Community Development On-Farm Implementation of Transformative

Technologies and Practices for Sustainability Transitions in Agriculture Callum Eastwood,Julie Ingram,Alan Renwick, Simon Fielke,Paul Edwards, Margaret Ayre,2025-05-21 There is increased pressure on agri food sectors globally to transition to more sustainable food systems This is a response to ongoing challenges associated with environmental impacts food security workplace attractiveness changing knowledge and advisory systems farmer well being and technological change

Transformative technology and practices advocated by scholars and policy makers include digitalization and automation agroecological systems diversification de intensification local food systems circularity transformative value chains and land use change These changed practices ultimately need to be implemented at a farm scale but the implications will ripple through regional and global food systems The potential role of transformative agricultural technologies and practices in sustainability transitions is widely researched However greater focus is required on the real world implications at a farm system level and the positive and negative effects of change in the livelihoods of those being urged to change i e farmers farm businesses and supply chains At the farm level transformation can be a complex process that intersects land livelihoods and security of the wider food supply system As a consequence theoretical concepts of transformation to achieve more sustainable food systems can be difficult to implement for farmers due to unforeseen interactions and implications Better understanding of these experiences is needed for effective and viable transformation options to progress environmental social and economic sustainability
