Citizenship and Identity in a Multinational Commonwealth Karin Friedrich,Barbara M. Pendzich,2009 This work is an attempt to change thinking not only on the political practice and the role of the Polish Lithuanian Commonwealth in a European context both East and West but to also connect the early modern past with present notions of citizenship and participatory political systems The Routledge Companion to the Geography of International Business Gary Cook,Jennifer Johns, Frank McDonald,Jonathan Beaverstock,Naresh Pandit,2018-05-08 The fields of Economic Geography and International Business share an interest in the same phenomena whilst each provides both a differing perspective and different research methods in attempting to understand those phenomena The Routledge Companion to the Geography of International Business explores the nature and scope of inter disciplinary work between Economic Geography and International Business in explaining the central issues in the international economy Contributions written by leading specialists in each field including some chapters written by inter disciplinary teams focus on the nature of multinational firms and their strategies where they choose to locate their activities how they create and manage international networks and the key relationships between multinationals and the places where they place their operations Topics covered include the internationalisation of service industries the influence of location on the competitiveness of firms and the economic dynamism of regions and where economic activity takes place and how knowledge goods and services flow between locations The book examines the areas for fruitful inter disciplinary work between International Business and Economic Geography and sets out a road map for future joint research and is an essential resource for students and practitioners of International Business and Economic Development An Analysis of Carlo Ginzburg's The Night Battles Etienne Stockland,Luke Freeman,2017-07-05 In The Night Battles Carlo Ginzburg does more than introduce his readers to a novel group of supposed witches the Benandanti from the northern Italian province of Friulia He also invents and deploys new and creative ways of tackling his source material that allow him to move beyond their limitations Witchcraft documents are notoriously tricky sources produced by elites with fixed views they are products of questioning designed to prove or disprove guilt rather than understand the

subtleties of belief and are very often the products of torture Ginzburg placed great stress on variations in the evidence of the Benandanti over time to reveal changing patterns of belief and also focused on the concept of reading against the text essentially looking as much at what is absent from the record as at what is present in it and attempting to understand what the absences mean His work not only pioneered the creation of a new school of historical study microhistory it is also a great example of the creative thinking skills of connecting things together in an original way producing novel explanations for existing evidence and redefining an issue so as to see it in a new light

The Division of Christendom Hans Joachim Hillerbrand, 2007-01-01 In *The Division of Christendom* revered historian Hans J Hillerbrand details the events and ideas of the sixteenth century and contends that the Protestant Reformation must be seen as an interplay of religious political and economic forces in which religion played a major role Hillerbrand tells the fascinating story of the ways in which theological disagreements divided the centuries old Christian church and the roles that leading characters such as Luther Zwingli Anabaptists and Calvin played in establishing new churches even as Roman Catholicism continued to develop in its own ways The book covers all significant aspects of this period and interprets these important events in their own context while reflecting on the consequences of the Reformation for later periods and for today

Great Divergence and Great Convergence Leonid Grinin, Andrey Korotayev, 2015-05-09 This new monograph provides a stimulating new take on hotly contested topics in world modernization and the globalizing economy It begins by situating what is called the Great Divergence the social technological revolution that led European nations to outpace the early dominance of Asia in historical context over centuries This is contrasted with an equally powerful Great Convergence the recent economic and technological expansion taking place in Third World nations and characterized by narrowing inequity among nations They are seen here as two phases of an inevitable global process centuries in the making with the potential for both positive and negative results This sophisticated presentation examines Why the developing world is growing more rapidly than the developed world How this development began occurring under the Western world's radar How former colonies of major powers grew to drive the world's economy Why so many Western economists have been slow to recognize the Great Convergence The increasing risk of geopolitical instability Why the world is likely to find itself without an absolute leader after the end of the American hegemony A work of rare scope *Great Divergence and Great Convergence* gives sociologists global economists demographers and global historians a deeper understanding of the broader movement of social and economic history combined with a long view of history as it is currently being made it also offers some thrilling forecasts for global development in the forthcoming decades

Lordship and State Transformation Stephan Sander-Faes, 2024-12-17 Although state transformation continuous struggle and bargaining between rulers and their subjects producing an unpredictable variety of political structures is often overlooked the process is crucial in assessing the organizational development of early modern composite monarchies and deserves further investigation In Austria the monarchy s emergence as a great power required it to overcome several successive crises that culminated in the decades around 1700 The Habsburgs succeeded more by adjusting relations between Crown and lordships than through institution building This unusual interaction of state and non state actors resulted in an Austria that markedly deviated from the centralizing nation state exemplified by Britain or France The nascent Habsburg fiscal financial military regime transformed regional and local authority leading to armed conflict and causing disintegration of the administrative and social fabric From the mid seventeenth century onward power whether local or central or social or political would undergo enormous changes Grounded in extensive research into Czech archives and spanning an era from the Thirty Years War to the coronation of Charles VI *Lordship and State Transformation* delves into the complex transitions that characterized the first instance of a
