

# Evidence of Evolution

## Background

When Charles Darwin first proposed the idea that all new species descend from an ancestor, he performed an exhaustive amount of research to provide as much evidence as possible. Today, the major pieces of evidence for this theory can be broken down into the fossil record, embryology, comparative anatomy, and molecular biology.

## Fossils

This is a series of skulls and front leg fossils of organisms believed to be ancestors of the modern-day horse.

				
				
Equus (modern horse)	Pliohippus	Merychippus	Meshippus	Eohippus (Dawn Horse)

1. Give two similarities between each of the skulls that might lead to the conclusion that these are all related species.
2. What is the biggest change in skull anatomy that occurred from the dawn horse to the modern horse?
3. What is the biggest change in leg anatomy that occurred from the dawn horse to the modern horse?

Rogers, 2024-05-31 According to polling data most Americans doubt that evolution is a real phenomenon And it's no wonder that so many are skeptical many of today's biology courses and textbooks dwell on the mechanisms of evolution natural selection genetic drift and gene flow but say little about the evidence that evolution happens at all How do we know that species change Has there really been enough time for evolution to operate With *The Evidence for Evolution*

Alan R Rogers provides an elegant straightforward text that details the evidence for evolution Rogers covers different levels of evolution from within species changes which are much less challenging to see and believe to much larger ones say from fish to amphibian or from land mammal to whale For each case he supplies numerous lines of evidence to illustrate the changes including fossils DNA and radioactive isotopes His comprehensive treatment stresses recent advances in knowledge but also recounts the give and take between skeptical scientists who first asked how can we be sure and then marshaled scientific evidence to attain certainty The Evidence for Evolution is a valuable addition to the literature on evolution and will be essential to introductory courses in the life sciences      **The Greatest Show on Earth** Richard Dawkins,2009-09-10

Charles Darwin s masterpiece On the Origin of Species shook society to its core on publication in 1859 Darwin was only too aware of the storm his theory of evolution would provoke but he would surely have raised an incredulous eyebrow at the controversy still raging a century and a half later Evolution is accepted as scientific fact by all reputable scientists and indeed theologians yet millions of people continue to question its veracity In The Greatest Show on Earth Richard Dawkins takes on creationists including followers of Intelligent Design and all those who question the fact of evolution through natural selection Like a detective arriving on the scene of a crime he sifts through fascinating layers of scientific facts and disciplines to build a cast iron case from the living examples of natural selection in birds and insects the time clocks of trees and radioactive dating that calibrate a timescale for evolution the fossil record and the traces of our earliest ancestors to confirmation from molecular biology and genetics All of this and much more bears witness to the truth of evolution The Greatest Show on Earth comes at a critical time systematic opposition to the fact of evolution is now flourishing as never before especially in America In Britain and elsewhere in the world teachers witness insidious attempts to undermine the status of science in their classrooms Richard Dawkins provides unequivocal evidence that boldly and comprehensively rebuts such nonsense At the same time he shares with us his palpable love of the natural world and the essential role that science plays in its interpretation Written with elegance wit and passion it is hard hitting absorbing and totally convincing
