Evil In Modern Thought An Alternative History Of Philosophy Princeton Classics:

Evil in Modern Thought Susan Neiman, 2015-08-25 A compelling look at the problem of evil in modern thought from the Inquisition to global terrorism Evil threatens human reason for it challenges our hope that the world makes sense For eighteenth century Europeans the Lisbon earthquake was manifest evil Today we view evil as a matter of human cruelty and Auschwitz as its extreme incarnation Examining our understanding of evil from the Inquisition to contemporary terrorism Susan Neiman explores who we have become in the three centuries that separate us from the early Enlightenment In the process she rewrites the history of modern thought and points philosophy back to the questions that originally animated it Whether expressed in theological or secular terms evil poses a problem about the world's intelligibility It confronts philosophy with fundamental questions Can there be meaning in a world where innocents suffer Can belief in divine power or human progress survive a cataloging of evil Is evil profound or banal Neiman argues that these questions impelled modern philosophy Traditional philosophers from Leibniz to Hegel sought to defend the Creator of a world containing evil Inevitably their efforts combined with those of more literary figures like Pope Voltaire and the Marquis de Sade eroded belief in God's benevolence power and relevance until Nietzsche claimed He had been murdered They also yielded the distinction between natural and moral evil that we now take for granted Neiman turns to consider philosophy's response to the Holocaust as a final moral evil concluding that two basic stances run through modern thought One from Rousseau to Arendt insists that morality demands we make evil intelligible The other from Voltaire to Adorno insists that morality demands that we don't

Beautifully written and thoroughly engaging this book tells the history of modern philosophy as an attempt to come to terms with evil It reintroduces philosophy to anyone interested in questions of life and death good and evil suffering and sense Featuring a substantial new afterword by Neiman that raises provocative questions about Hannah Arendt's take on Adolf Eichmann and the rationale behind the Hiroshima bombing this Princeton Classics edition introduces a new generation of readers to this eloquent and thought provoking meditation on good and evil life and death and suffering and sense

Evil in Modern Thought Susan Neiman, 2015-08-25 Whether expressed in theological or secular terms evil poses a problem about the world's intelligibility It confronts philosophy with fundamental questions Can there be meaning in a world where innocents suffer Can belief in divine power or human progress survive a cataloging of evil Is evil profound or banal Neiman argues that these questions impelled modern philosophy Traditional philosophers from Leibniz to Hegel sought to defend the Creator of a world containing evil Inevitably their efforts combined with those of more literary figures like Pope Voltaire and the Marquis de Sade eroded belief in God's benevolence power and relevance until Nietzsche claimed He had been murdered They also yielded the distinction between natural and moral evil that we now take for granted Neiman turns to consider philosophy's response to the Holocaust as a final moral evil concluding that two basic stances run through modern thought One from Rousseau to Arendt insists that morality demands we make evil intelligible The other from Voltaire to Adorno

Climate Change and the Endurance of Democracy Daniel Lindvall, 2024-11-26 This book explores the challenges climate change poses to the endurance of democracy situating this theme within the context of the decline in global freedom documented since the early 21st century It discusses how disaster events have historically affected human reasoning and agency and how the climate crisis is likely to influence democratic development in the future Climate extreme events can provide opportunities for autocratic leaders to curtail rights and freedoms but they can also create critical junctures where the social and political discourse within society is reshaped and where incumbent regimes are contested The book illustrates how climate change may generate food insecurity economic recessions and deepen socioeconomic inequalities These effects may contribute to democratic backsliding but can also create new conditions for social mobilization The democratic consequences of climate change are thus not primarily determined by the forces of nature but by human responses and the social economic and political conditions of the affected country In the long term perspective however climate change will have several negative effects on democratic stability The book concludes that for human freedom and democracy to endure modern society needs to be brought into balance with nature This volume will be of great interest to students and scholars of climate governance environmental politics energy policy and global development

Essays on the Real Church Dirk J. Smit, 2024-08-15 The spirit of the Reformation is often expressed in the well known slogan that Reformed churches are always being reformed according to God's Word *ecclesia reformata semper reformanda secundum verbum Dei* Over the last century the spirit of this slogan motivated someone like Dietrich Bonhoeffer to argue that the visible form and life of the church should reflect the truth and message of the church Already in his doctoral dissertation called *Sanctorum Communio* the communion of the saints the young Bonhoeffer combined theological claims and traditions with social theory and analysis in this spirit in an innovative way to study the nature and integrity and witness of the church At the time this was a radical claim with major consequences and challenges for Protestant churches Their life which meant their order structure actions statements

convictions public presence and role was to be measured by their gospel which meant their message proclamation convictions claims They could no longer proclaim one truth yet live a different life It was this spirit which led to the well known Theological Declaration of Barmen in 1934 and to the formation of the Confessing Church in Nazi Germany Many called this a moment of truth a status confessionis It was this same spirit which later inspired the struggle in South Africa for the integrity and faithfulness of the church and for the credibility of its message proclamation and witness The contributions in this volume 52 papers essays sermons studies were all produced in this spirit Most of them have not been published before They were all occasional pieces written over several decades in different contexts and for different purposes and audiences yet they all breathe this self critical spirit of the Reformation considering whether the real church the concrete every day actual living church that people know and experience and perhaps belong to truly strives to embody the gospel itself the message which it claims and proclaims They all inquire under different circumstances and in diverse ways about different social forms of the real church from worship to congregation from denomination to ecumenical church from individual believers to movements and organisations whether and how they embody the truth of the church or not Together these contributions tell a story the story of this spirit in South African circles over several decades but also in the ecumenical church in our globalizing world They offer one small glimpse into different concrete moments in the story of this spirit in the life of this tradition and community of faith Hopefully some of these accounts may resonate with others who also shared the same spirit and still share it today in new and ongoing ways

The Routledge International Handbook of Psychoanalysis, Subjectivity, and Technology David Goodman,Matthew Clemente,2023-08-09 The Routledge International Handbook of Psychoanalysis Subjectivity and Technology uniquely provides a comprehensive overview of human subjectivity in the technological age and how psychoanalysis can help us better understand human life Presented in five parts David M Goodman and Matthew Clemente collaborate with an international community of scholars and practitioners to consider how psychoanalytic formulations can be brought to bear on the impact technology has had on the facets of human subjectivity Chapters examine how technology is reshaping our understanding of what it means to be a human subject through embodiment intimacy porn political motivation mortality communication interpersonal exchange thought attention responsibility vulnerability and more Filled with thought provoking and nuanced chapters the contributors approach technology from a diverse range of entry points but all engage through the lens of psychoanalytic theory practice and thought This book is essential for academics and students of psychoanalysis philosophy ethics media liberal arts social work and bioethics With the inclusion of timely chapters on the coronavirus pandemic and teletherapy psychoanalysts in practice and training as well as other mental health practitioners will also find this book an invaluable resource **Impasse** Roy Scranton,2025-08-05 A Next Big Idea Club Must Read for August 2025 We need a new realism in the face of global climate catastrophe Extreme heat fires floods and storms are transforming our planet Yet instead of serious responses from

world leaders we get increasing emissions divisive politics and ersatz solutions that offer more of the same more capitalism more complexity more progress The impasse we face is not only political and institutional but cognitive existential and narrative We re incapable of grasping the scale speed and impact of global warming Our brains can t make sense of how radically our world is changing And we optimistically cling to a civilizational narrative that promises a better tomorrow if we just keep doing what we re doing It s well past time Roy Scranton argues to free ourselves from our dangerous and dogmatic faith in progress Such unwarranted optimism will only accelerate our collective disintegration If we want to have any hope at all for the future it must be grounded in a recognition of human limits a view Scranton calls ethical pessimism Drawing from psychology philosophy history and politics as well as film literature and personal experience Scranton describes the challenges we face in making sense of our predicament from problems in communication to questions of justice from the inherent biases in human perception to the difficulties of empirical knowledge What emerges is a challenging but ultimately hopeful proposition if we have the courage to accept our limits we may find a way to embrace our unknowable future

Thinking about the Enlightenment Martin L. Davies, 2016-03-31 Thinking about the Enlightenment looks beyond the current parameters of studying the Enlightenment to the issues that can be understood by reflecting on the period in a broader context Each of the thirteen original chapters by an international and interdisciplinary team of contributors illustrates the problematic legacy of the Enlightenment and the continued ramifications of its thinking since the eighteenth century Together they consider whether modernity can see its roots in the intellectual revolution of the seventeenth and eighteenth centuries The collection is divided into six sections preceded by a comprehensive introduction to the field and the most recent scholarship on the period Across the sections the contributors consider modern day encounters with Enlightenment thinking including Kant s moral philosophy the conflict between reason and faith the significance of the Enlightenment of law and the gender inequality that persisted throughout the eighteenth century By examining specific encounters with the problematic results of Enlightenment concerns the contributors are able to illuminate and offer new

perspectives on topics such as human nature race politics gender and rationality Drawing from history philosophy literature and anthropology this book enables students and academics alike to take a fresh look at the Enlightenment and its legacy in the modern world *Grammar, Philosophy, and Logic* Bruce Silver, 2017-11-21 This book argues that a basic grasp of philosophy and logic can produce written and spoken material that is both grammatically correct and powerful The author analyses errors in grammar word choice phrasing and sentences that even the finest writers can fail to notice concentrating on subtle missteps and errors that can make the difference between good and excellent prose Each chapter addresses how common words and long established grammatical rules are often misused or ignored altogether including such common words as interesting possible and apparent By tackling language in this way the author provides an illuminating and practical stylistic guide that will interest students and scholars of grammar and philosophy as well as readers looking to improve their technical writing skills

Evil and Creation David Luy, Matthew Levering, George Kalantzis, 2020-12-02 My help comes from the Lord maker of heaven and earth Evil is an intruder upon a world created by God and declared good Scripture emphasizes this laments are regularly juxtaposed with declarations of God as creator But evil is not merely a problem for the doctrine of creation Rather the doctrine of creation provides a hopeful response to evil In *Evil and Creation* David J Luy Matthew Levering and George Kalantzis collect essays investigating how the doctrine of creation relates to moral and physical evil Essayists pursue philosophical and theological analyses of evil rather than neatly solving the problem of evil itself Including contributions from Constantine Campbell Paul Blowers and Paul Gavriluk this volume draws upon biblical and patristic voices to produce constructive theology considering topics ranging from vanity in Ecclesiastes and its patristic interpreters to animal suffering Readers will gain a broader appreciation of evil and how to faithfully respond to it as well as a renewed hope in God as creator and judge

Günther Anders' Philosophy of Technology Babette Babich, 2021-10-21 Gunther Anders *Philosophy of Technology* is the first comprehensive exploration of the ground breaking work of German thinker Gunther Anders Anders philosophy has become increasingly prescient in our digitised technological age as his work predicts the prevalence of social media ubiquitous surveillance and the turn to big data Anders oeuvre also explored the technologies of nuclear power and the biotech concerns for the human and transhuman condition which have become so central to current theory Babette Babich argues that Anders offers important resources on streaming digital media through his writings on radio television and film and is unusually both a comprehensive and profound thinker Anders relationship with key philosophers like Hannah Arendt and Walter Benjamin and his thinking on Goethe Nietzsche and Rilke is also explored with a focus on the deep impact he made on his peers It reflects specifically on the intersection of Anders thought Heidegger and the Frankfurt school and how influential a figure he was on the landscape of 20th century philosophy A compelling rehabilitation of a thinker with profound contemporary relevance

The Ancient Greek Roots of Human Rights Rachel Hall Sternberg, 2021-06-29 Although the era of the Enlightenment witnessed the rise of philosophical debates

around benevolent social practice the origins of European humane discourse date further back to Classical Athens The Ancient Greek Roots of Human Rights analyzes the parallel confluences of cultural factors facing ancient Greeks and eighteenth century Europeans that facilitated the creation and transmission of humane values across history Rachel Hall Sternberg argues that precursors to the concept of human rights exist in the ancient articulation of emotion though the ancient Greeks much like eighteenth century European societies often failed to live up to those values Merging the history of ideas with cultural history Sternberg examines literary themes upholding empathy and human dignity from Thucydides's and Xenophon's histories to Voltaire's *Candide* and from Greek tragic drama to the eighteenth century novel She describes shared impacts of the trauma of war the appeal to reason and the public acceptance of emotion that encouraged the birth and rebirth of humane values [Oprah Winfrey and the Glamour of Misery](#) Eva Illouz, 2003 Amy B Jordan Director of the Media and the Developing Mind Sector Annenberg Public Policy Center University of Pennsylvania **Friedrich Nietzsche and the Politics of History** Christian Emden, 2008-05-08 This book explores Friedrich Nietzsche's understanding of modern political culture and his position in the history of modern political thought Surveying Nietzsche's entire intellectual career from his years as a student in Bonn and Leipzig during the 1860s to his genealogical project of the 1880s Christian Emden contributes to a historically informed discussion of Nietzsche's response to the political predicaments of modernity and sheds new light on the intellectual and political culture in Germany as the ideals of the Enlightenment gave way to the demands of the modern nation state This is a distinguished addition to the series of *Ideas in Context* and a major reassessment of a philosopher and aphorist whose stature among post enlightenment European thinkers is now almost unrivalled

Philosophy as Frustration Bruce Silver, 2013-06-20 In *Philosophy as Frustration* Happiness Found and Feigned from Greek Antiquity to Present Bruce Silver analyzes important views of happiness from Greek antiquity into the present He argues that in many cases philosophers and positive psychologists do a poor job of defending the views of happiness they promote Too often the philosophical approaches to what constitutes happiness are at odds with themselves and with possibilities for living happily In some cases readers discover that the phrase happy human being is oxymoronic and that the most a person can expect is a life that is a measure of calm **Journeys into Darkness** James Goho, 2014-03-06 The tradition of supernatural horror fiction runs deep in Anglo American literature From the Gothic novels of the eighteenth century to such contemporary authors as Stephen King and Anne Rice writers have employed horror fiction to unearth many disquieting truths about the human condition ranging from mistreatment of women and minorities to the ever present dangers of modern city life In *Journeys into Darkness* Critical Essays on Gothic Horror James Goho analyzes many significant writers and trends in American and British horror fiction Beginning with Charles Brockden Brown's disturbing novels of terror and madness Goho proceeds to discuss the influence of Edgar Allan Poe's *The Fall of the House of Usher* on H P Lovecraft who is treated in several penetrating essays Lovecraft was a uniquely philosophical writer and Goho approaches

his work through the lens of existentialist philosopher Søren Kierkegaard while also probing Lovecraft's racism as exhibited in several tales about Native Americans Goho also discusses the Welsh writer Arthur Machen's tortured tales of suffering and evil and Algernon Blackwood's numerous stories set in the wilds of the Canadian backwoods The book concludes with a centuries spanning essay on the witchcraft theme in the American Gothic tradition and a comprehensive essay on Fritz Leiber's invention of the urban Gothic In this wide ranging study James Goho examines the varied ways in which supernatural fiction can address the deepest moral social and political concerns of the human experience Journeys into Darkness will be of interest to readers and scholars of horror fiction and to students of literary history and culture in general

Scientific Values and Civic Virtues Noretta Koertge, 2005-08-04 This volume of contributed essays a follow up to Noretta Koertge's successful book on the science wars A House Built on Sand takes an affirming positive view of the relationship between the values embodied in science and the nature of a civil society It argues that recent attacks on the probity of science undermine the possibility of rational discourse in the political arena While science has traditionally been viewed as incorporating intellectual virtues like honesty and precision of language the contributors to this volume point to additional benefits examining the idea that science can serve as a source of and inspiration for civic virtues in the need to be well informed about the way the world works in tolerating the viewpoints of others and in functioning as a fully global enterprise dedicated to the public good The contributors who include philosophers political scientists physicists biologists and engineers look at examples of scientific virtues in action and how they might be used as inspirations and practical resources for improving civic society The volume will appeal to a similarly broad audience interested in the relationship between science and society

Honor, History, and Relationship Stephen Darwall, 2013-09 Stephen Darwall expands upon his argument for a second personal framework for morality in which morality entails mutual accountability and the authority to address demands He explores the role of the framework in relation to cultural ideas of respect and honor the development of modern moral philosophy and interpersonal relations

We cannot continue like this Attie S. van Niekerk, Sytse Strijbos, 2022-02-07 The book is based on the view that the present trajectory of modern development cannot continue as it is now because it is ecologically unsustainable it continues to enlarge the gap between rich and poor and the decolonisation movement has drawn our attention again to the specific role of religion culture and value in human affairs and the need for a robust element of indigenisation and contextualisation This book is strongly focused on the context of Africa with two chapters that are written by authors from the Netherlands for the purpose of presenting a North South dialogue The book contains a reflection on approaches followed in building sustainable human communities in general and reflection on specific efforts to solve sustainability issues It seeks to integrate academic reflection and insights gained from practical involvement with sustainability issues in local communities and low income households with contributions from Theology and Natural and Social Sciences
