Life and Evolution Lorenzo Baravalle, Luciana Zaterka, 2020-04-10 This book offers to the international reader a collection of original articles of some of the most skillful historians and philosophers of biology currently working in Latin American universities During the last decades increasing attention has been paid in Latin America to the history and philosophy of biology but since many local authors prefer to write in Spanish or in Portuguese their ideas have barely crossed the boundaries of the continent This volume aims to remedy this state of things providing a good sample of this production to the English speaking readers bringing together contributions from researchers working in Brazilian Argentinean Chilean Colombian and Mexican universities The stress on the regional provenance of the authors is not intended to suggest the existence of something like a Latin American history and philosophy of biology supposedly endowed with distinctive features On the contrary the editors firmly believe that advances in this field can be achieved only by stimulating the integration in the international debate Based on this assumption the book focuses on two topics life and evolution and presents a selection of contributions addressing issues such as the history of the concept of life the philosophical reflection on life manipulation and life extension the structure and development of evolutionary theory as well as human evolution Life and Evolution Latin American Essays on the History and Philosophy of Biology will provide the international reader with a rather complete picture of the ongoing research in the history and philosophy of biology in Latin America offering a snapshot of this dynamic community It will also contribute to contextualize and develop the debate concerning life and evolution and the relation between the two phenomena **Littell's Living Age** Eliakim Littell, Robert S.
