

The background of the slide is a dark red color. It features several concentric white circles of varying sizes, some of which are solid and others are outlines. There are also several solid red circles of different sizes scattered across the background. A network of thin, white, curved lines crisscrosses the entire surface, creating a complex, web-like pattern that suggests a dynamic or interconnected structure.

Dynamic Structure Of Reality Hispanisms:

Dynamic Structure of Reality Nelson R. Orringer, 2010-10-01 Dynamic Structure of Reality makes available in English some of the most mature thought of the modern Spanish philosopher Xavier Zubiri. He first presented this material as a set of 1968 public lectures in Madrid. They were collected, edited, and published in 1989 as *Estructura din mica de la realidad*. In 1962 Zubiri had published *Sobre la esencia*. On essence, a work of metaphysics that was praised by critics with one qualification: its treatment of reality was too static. The 1968 course was devised as a response to those critics. Dynamic Structure of Reality retraces the road Hegel traveled concerning the creation of a self and how that self is realized by an interplay between spirit and nature. Like his great predecessor Jos Ortega y Gasset and like his great Jewish contemporary Emmanuel Levinas, Zubiri takes religion in all seriousness and locates its questions within the questions of modern philosophy. In harmony with science, he advances a new idea of becoming. Reality not being becomes. As reality's traits are revealed in different degrees, reality resembles God, the universal self-giver. Zubiri systematically touches on many disciplines to show the varieties of self-giving throughout the universe of structural dynamism. By focusing on the interplay between material, social, and narrative dimensions of the city, this book examines urban complexity, namely the dynamic and entangled nature of urban issues, and puts forward a notion of the city as an urban texture. Taking an innovative interdisciplinary approach, it perceives the way cities are organized as a restless stratification of materials, meanings, and uses, and deals with the interrelationships between actors, places, administrative rationalities, and artefacts. It argues that urban fabric is manufactured in this interplay between imagery and practices of all the stake holders, including planners, city managers, and city users. Illustrated by in-depth empirical studies from across Europe and Latin America, the book explores material and symbolic aspects of the urban experience. In particular, the contributors focus on the less visible ways of organizing urban spaces, such as those enacted and embodied by local news artefacts, such as signals, maps, regulations, public acts, artistic performances, sensory experience, and collective memories. The book offers an articulated discussion on these various means of spatial organisation, thereby providing insights into situations of conflict and proposing innovative ways forward for enhancing urban sociability. **Urban Plots, Organizing Cities** Claudio Coletta, 2016-02-11.
