

29 – Point Charges in Electrostatic Fields – PhET E-fields II

Purpose: Investigate the fields created by point charges when all other forces are ignored.

Apparatus: PhET Simulation Charges and Fields

Discussion: A point charge in space creates an electrostatic field, similar to a massive object creating a gravitational field. In fact, this similarity extends to the mathematical relationship between electrostatic force

$$F = k \frac{q_1 q_2}{d^2}$$

and universal gravitational force

$$F = G \frac{m_1 m_2}{d^2}$$

In this lab, familiarize yourself with how point charges create fields and how multiple fields, from multiple charges, interact.

It is worth noting that the field strength, E , can be expressed in units of N/C and V/m.

Important Formulas:

Field Strength: $E = F/q$ and $E = V/d$

Electrostatic Force: $F = k \frac{q_1 q_2}{d^2}$

$k = 9.00 \times 10^9 \text{ Nm}^2/\text{C}^2$

Procedure and Analysis, part 1:

1. Open your PhET Simulations: **Electricity, Magnets, and Circuits** → **Charges and Fields**
2. Place a single point charge in the work area and observe the field it creates with a test charge.
3. Draw the field lines (using convention, arrows) around a positive and (separately) a negative charge.

4. Draw the field lines around two nearby charges for each of the three pairs below.

5. Where, around a point charge, is the magnitude of the electrostatic force the greatest?

greatest where lines are the closest together

the least?

least where they are farthest apart

6. Where, around a point charge, is the magnitude of the electrostatic potential the greatest?

greatest closest to the point charge

7. Using a single positive point charge +1.0 nC, complete the table below. Check your work in the simulation when possible.

Distance from charge, m	Field strength, V/m	Potential at location, V
2.1 m		
0.90 m		9.0 V
		28.4 V
	1.1 V/m	
	27.0 V/m

Eye Tracking for STEM Education Research: New Perspectives Pascal Klein, Martin Rusek, Maike Schindler, 2024-04-04 A modern approach to improving education uses the components of experimental scientific research practices based on objective data dissemination of results and the use of modern technologies STEM education research is maturing and new tools and analysis techniques become available As one example eye tracking the recording of persons eye movements has been growing in popularity as it enables researchers to study learning materials effectiveness problem solving and even students approaches during experimentation Eye movements as captured using eye tracking can reveal information about a student s attention and cognition on a process level going well beyond classical product based assessment techniques such as questionnaires or tests

Collected Papers of Carl Wieman C. E. Wieman, 2008 Carl Wieman s contributions have had a major impact on defining the field of atomic physics as it exists today His ground breaking research has included precision laser spectroscopy using lasers and atoms to provide important table top tests of theories of elementary particle physics the development of techniques to cool and trap atoms using laser light particularly in inventing much simpler less expensive ways to do this the understanding of how atoms interact with one another and light at ultracold temperatures and the creation of the first BoseOCoEinstein condensation in a dilute gas and the study of the properties of this condensate In recent years he has also turned his attention to physics education and new methods and research in that area This indispensable volume presents his collected papers with annotations from the author tracing his fascinating research path and providing valuable insight about the significance of the works Sample Chapter s Introduction 197 KB Contents Precision Measurement and Parity Nonconservation Laser Cooling and Trapping BoseOCoEinstein Condensation Science Education Development of Research Technology Readership Graduates postgraduates and researchers in atomic physics laser physics and general physics

New Developments in Science and Technology Education Martin Riopel, Zacharoula Smyrnaiou, 2016-02-11 This book explores the beneficial impact of pedagogically updated practices and approaches in the teaching of science concepts as well as elaborates on future challenges and emerging issues that address Science and Technology Education By pointing out new research directions it informs educational practices and bridges the gap between research and practice providing information ideas and new perspectives The book also promotes discussions and networking among scientists and stakeholders such as researchers professors students and companies developing educational software and ICT tools The volume presents papers from the First International Conference on New Developments in Science and Technology Education 1st NDSTE that was structured around four main thematic axes Modern Pedagogies in Science and Technology Education New Technologies in Science and Technology Education Teaching and

Learning in the light of Inquiry learning Methods and Interest Attitude and Motivation in Science **Online Engineering & Internet of Things** Michael E. Auer, Danilo G. Zutin, 2017-09-14 This book discusses online engineering and virtual instrumentation typical working areas for today's engineers and inseparably connected with areas such as Internet of Things cyber physical systems collaborative networks and grids cyber cloud technologies and service architectures to name just a few It presents the outcomes of the 14th International Conference on Remote Engineering and Virtual Instrumentation REV2017 held at Columbia University in New York from 15 to 17 March 2017 The conference addressed fundamentals applications and experiences in the field of online engineering and virtual instrumentation in the light of growing interest in and need for teleworking remote services and collaborative working environments as a result of the globalization of education The book also discusses guidelines for education in university level courses for these topics **Scientific and Technical Aerospace Reports**, 1994-02 **The SAGE Encyclopedia of Educational Technology** J. Michael Spector, 2015-01-29 The SAGE Encyclopedia of Educational Technology examines information on leveraging the power of technology to support teaching and learning While using innovative technology to educate individuals is certainly not a new topic how it is approached adapted and used toward the services of achieving real gains in student performance is extremely pertinent This two volume encyclopedia explores such issues focusing on core topics and issues that will retain relevance in the face of perpetually evolving devices services and specific techniques As technology evolves and becomes even more low cost easy to use and more accessible the education sector will evolve alongside it For instance issues surrounding reasoning behind how one study has shown students retain information better in traditional print formats are a topic explored within the pages of this new encyclopedia Features A collection of 300 350 entries are organized in A to Z fashion in 2 volumes available in a choice of print or electronic formats Entries authored by key figures in the field conclude with cross references and further readings A detailed index the Reader's Guide themes and cross references combine for search and browse in the electronic version This reference encyclopedia is a reliable and precise source on educational technology and a must have reference for all academic libraries **Cyber-Physical Laboratories in Engineering and Science Education** Michael E. Auer, Abul K.M. Azad, Arthur Edwards, Ton de Jong, 2018-04-26 This volume investigates a number of issues needed to develop a modular effective versatile cost effective pedagogically embedded user friendly and sustainable online laboratory system that can deliver its true potential in the national and global arenas This allows individual researchers to develop their own modular systems with a level of creativity and innovation while at the same time ensuring continuing growth by separating the responsibility for creating online laboratories from the responsibility for overseeing the students who use them The volume first introduces the reader to several system architectures that have proven successful in many online laboratory settings The following chapters then describe real life experiences in the area of online laboratories from both technological and educational points of view The volume further collects experiences and evidence on the effective use of online labs in the

context of a diversity of pedagogical issues It also illustrates successful online laboratories to highlight best practices as case studies and describes the technological design strategies implementation details and classroom activities as well as learning from these developments Finally the volume describes the creation and deployment of commercial products tools and services for online laboratory development It also provides an idea about the developments that are on the horizon to support this area
