

Science in Early Childhood

Second edition

Science education in the early years is vital to assist young children to come to know and understand the world around them. In this second edition, *Science in Early Childhood* has been substantially updated and revised to include comprehensive coverage of the birth-to-eight age group. Drawing on the most up-to-date research, this edition presents current issues and debates that are relevant to pre-service teachers of early childhood science, both at pre-school and in the early years of schooling.

This text complements the Australian Early Years Learning Framework (EYLF) and the Australian Curriculum: Science. Each chapter helps develop knowledge of key areas of science and explains how to guide children's learning. Learning objectives and chapter overviews help readers identify key themes that will be covered, and the theory is brought to life through the use of detailed case studies and practical examples.

Written by experts in the field, *Science in Early Childhood* is essential reading for pre-service teachers.

Service Learning as Pedagogy in Early Childhood Education Kelly L. Heider, 2016-10-14 This book presents the most recent theory, research, and practice on service learning as it relates to early childhood education. It describes several service learning programs, many of which were developed to better prepare pre-service teachers for the challenges they face in today's early childhood classrooms, including class size, ever changing technology, diversity, high stakes testing, parental involvement, or the lack thereof, and shrinking budgets. The book shares stories of positive outcomes from pre-service teachers who having participated in service learning programs report a shift in their attitudes and beliefs, including an increased empathy for others, a heightened sensitivity to student differences, more democratic values, and a greater commitment to teaching. In addition, the book examines the effects

of service learning and positive outcomes for children and teacher educators as well Schools today face an increasing number of language learners the mainstreaming of special population students and working with a standards driven curriculum All of these present new challenges for teachers as they attempt to meet their students educational needs As a result of this new classroom environment and the educational needs they present teacher educators must now seek different approaches to prepare prospective teachers to meet these needs because the traditional approaches to teacher preparation such as coursework independent of fieldwork are no longer effective in equipping teachers to address these issues This book examines in detail the new approach of service learning STEM Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2014-12-31 This reference brings together an impressive array of research on the development of Science Technology Engineering and Mathematics curricula at all educational levels
