## **Evolution And Empathy The Genetic Factor In The Rise Of Humanism:**

*Evolution and Empathy* Milton E. Brener, 2015-05-12 This book applies new scientific research in the fields of biology and genetics to an empirical study of the Greco Roman civilizations and the European Renaissance These two periods were remarkable in part because of the dominance of empathy and humanism in the philosophical thought of each era Both periods were preceded by the influx of many populations and genetic lines a circumstance this book treats as not coincidental but probably causative The author cites the expression of new genetic combinations in these periods as evidence that genetic evolution can play a large part in the development of new philosophical concepts as manifested in these two periods The author explains that humanistic traits seem to rise and fall in lockstep throughout human history directly or indirectly correlating with changing genetic underpinnings

One Health Michael W. Fox, 2025-03-03 This collection of reflective critical philosophical and practical chapters represents the author's 60 years as a veterinarian ethologist and bioethicist The rising incidence of zoonotic diseases from farmed animals and wildlife in the expanding human population and so called reverse zoonoses where humans are infecting other species are existential concerns These concerns are linked with anthropogenic climate change and our impact on ecosystems which threaten biodiversity and the health and future of Homo sapiens and many other species These interconnected issues are examined in this book broadening the scope and agenda of what is currently more narrowly practiced as preventive medicine The author calls for greater emphasis on holistic preventive health care maintenance in response to the escalating costs of human and companion animal health problems the welfare of factory farmed animals and endangered status of many wild species Our species now faces a complex existential crisis that must be addressed in an interdisciplinary way because there are multiple contributing factors factors that call for the insights of science and bioethics Fearlessly tackling contentious issues and wicked problems Dr Michael W Fox offers an integrated perspective of what One Health looks like on the ground

**Transcultural Literary Studies: Politics, Theory, and Literary Analysis** Bernd Fischer, 2018-06-27 This book is a printed edition of the Special Issue Transcultural Literary Studies Politics Theory and Literary Analysis that was published in *Humanities*

*Rock Art of the Qsur and 'Amour Mountains, Algeria* Ahmed Achmati, 2023-01-06 It may be true as Paul Valery said that the painter takes his body with him but it is almost certain that artists leave some of their bodies in their art This book studies the embodied intentionality inscribed in the works of the artists of the Qsur and Amour mountains in Algeria It retraces the aesthetic gestures of these artists revealing sounds they heard tactile and kinesthetic interactions they experienced and emotions they felt as they recorded the distress and pain of some animals Combining naturalist style skilful composition and spatial features these artists often gave their art the form of installation where induced motion and parallax flow create immersive experiences Using continuous line technique they created monumental objects and intricate labyrinthine forms

*PALE SKIN, GIANTS, AND THE GREAT TRANSITION* MILTON E. BRENER, 2013-01-17 This book Milton Brener's third on the subject of UFOs and extraterrestrials

is a giant leap He delves into an analysis of much current scientific evidence that appears to add credence to claims of early hybridization of the human race It is an entirely new and novel approach but a very readable and one It is a challenge to readers to think constructively of the new and novel It revolves around the coalescence beginning about fifty thousand years ago of several significant and scientifically proven occurrences One is the beginning of the pale skin tone of Europeans Brener systematically dismantles the accepted scientific explanation for it and drives home the fact that the only other living creatures with similar skin tone are the extraterrestrials often known to many witnesses of high credibility as Nordics Unlike other ETs these Nordics look like us though some are said to be remarkably tall and also unlike others leave the contactees with very positive feelings Another major occurrence the great transition was the relatively sudden appearance of modern behavior including artistic genius timekeeping and creation of musical instruments The book is truly a tour de force

*Walking Through Walls and Other Impossibilities* Milton E Brener, 2011-06-09 The goal of the aliens among us is not the study of Earth for purely academic purposes It is something more vital to the aliens and more portentous for us The picture that emerges from much research makes sense of several aspects of the alien presence previously quite puzzling They apparently are a dying race inhabiting a dying planet They have undoubtedly mastered physical forces and phenomena of which we have not even dreamed But it has come at a terrible cost Their emotional life has been all but lost existing only as a faint remnant from a long distant past They may pity our hopelessly primitive technology but they envy us our robust emotional life Like all living things everywhere they live for the perpetuation of their genes They do not hate us nor do they seek our destruction They seek to create a race of hybrids combining their scientifically superior minds with our rich emotional makeup The ridicule of the entire subject by the government and other forces fearful of upheaval in our society has aggravated the suffering of those chosen and victimized by the aliens who apparently seek ineptly sometimes to minimize it The author combines this scholarly approach with an almost folksy narrative style to make *Walking Through Walls* a very readable and approachable treatise on the phenomena as good as any book on the subject and far more skillfully written than most including those Brener has referenced most frequently Bud Hopkins *Intruders* and Philip Corso's *The Day after Roswell* Blue Ink Review

*Deceptive Fictions* Ulrike Tancke, 2015-06-18 *Deceptive Fictions* Narrating Trauma and Violence in Contemporary Writing explores the widespread narrative concern with trauma and violence and their interactions with identity meaning ethics history memory and various other related issues in a selection of novels by prolific contemporary British and Irish writers Interrogating the strategic functions of trauma and violence the book argues that these texts can be read as counter narratives to or a backlash against still prevalent critical paradigms informed by poststructuralist and postmodern thought Trauma and violence are invoked as narrative tools to communicate the centrality of the body and of biological and material constraints on human actions This emphasis on reality and the experiential ties in with the novels consistent focus on the individual as an ethical agent and originator of meaning In so doing they signal a move in

contemporary fiction towards a textual practice that can most fruitfully be approached along the lines of an individualistic evolutionary corporeal and experiential narratology which self consciously reflects on the manipulative potentials of narrative

Wagner and Schopenhauer Milton E. Brener, 2014-04-04 Most who write about Wagner's operas claim that the works of Arthur Schopenhauer had a huge effect on them The influence Brener believes has been vastly overstated The most detailed exposition of that alleged influence is by Bryan Magee In his *Tristan Chord* Magee details the bases for what are often by others unsupported conclusions Familiar with both the important writings of Schopenhauer and the works of Wagner Brener is among the few capable of a thorough analysis and factual response to Magee's claims His conclusions backed with primary sources stands almost alone in opposition to accepted dogma *The Mankind Quarterly* Council for Social and Economic Studies (U.S.), 2007 *Choice*, 2008
