Evolution The Remarkable History Of A Scientific Theory Modern Library Chronicles:

DE EVOLUTION Jeff Frank, 2016-12-22 A large sophisticated telescope complex sits atop a dormant volcano in one of Earth's most remote locations. Some incredibly bright but fiercely independent folks operate it much of the time. They detect, map, and perform threat analysis of near-Earth objects. Shortly after the world narrowly escapes an extinction event, they start collecting pieces of a related cosmic puzzle. When they've connected enough of them, an intriguing and disturbing picture emerges. Yet the most revealing pieces don't reveal themselves until after all life on Earth already has begun marching in lockstep toward possible oblivion.

Evolution Edward John Larson, 2006 **Evolution** Edward J. Larson, 2006-08-08 I often said before starting that I had no doubt I should frequently repent of the whole undertaking. So wrote Charles Darwin aboard *The Beagle*, bound for the Galapagos Islands, and what would arguably become the greatest and most controversial discovery in scientific history. But the theory of evolution did not spring full-blown from the head of Darwin. Since the dawn of humanity, priests, philosophers, and scientists have debated the origin and development of life on earth, and with modern science, that debate shifted into high gear. In this lively, deeply erudite work, Pulitzer Prize-winning science historian Edward J. Larson takes us on a guided tour of Darwin's dangerous idea from its theoretical antecedents in the early nineteenth century to the brilliant breakthroughs of Darwin and Wallace to Watson and Crick's stunning discovery of the DNA double helix and to the triumphant neo-Darwinian synthesis and rising sociobiology today. Along the way, Larson expertly places the scientific upheaval of evolution in cultural perspective: the social and philosophical earthquake that was the French Revolution; the development in England of a laissez-faire capitalism in tune with a Darwinian ethos of survival of the fittest; the emergence of Social Darwinism and the dark science of eugenics against a backdrop of industrial revolution; the American Christian backlash against evolutionism that culminated in the famous Scopes trial; and on to today's world where religious fundamentalists litigate for the right to teach creation science alongside evolution in U.S. public schools, even as the theory itself continues to evolve in new and surprising directions. Throughout, Larson trains his spotlight on the lives and careers of the scientists, explorers, and eccentrics whose collaborations and competitions have driven the theory of evolution forward. Here are portraits of Cuvier, Lamarck, Darwin, Wallace, Haeckel, Galton, Huxley, Mendel, Morgan, Fisher, Dobzhansky, Watson, and Crick, W.D. Hamilton, E.O. Wilson, and many others. Celebrated as one of mankind's crowning scientific achievements and reviled as a threat to our deepest values, the theory of evolution has utterly transformed our view of life, religion, origins, and the theory itself, and remains controversial, especially in the United States, where 90% of adults do not subscribe to the full Darwinian vision. Replete with fresh material and new insights, *Evolution* will educate and inform while taking readers on a fascinating journey of discovery.

The Mystery of Evolutionary Mechanisms Robert F. Shedinger, 2019-06-28 Is Darwinian evolution really the most successful scientific theory ever proposed or even the best idea anyone has ever had as Daniel Dennett once put it The Mystery of Evolutionary Mechanisms provides a comprehensive critical reading of the literature of evolutionary biology from Darwin to Dobzhansky to Dawkins revealing this popular account of evolution to be a grand narrative of Darwinian triumph that greatly overstates the empirical validity of modern evolutionary theory The mechanisms driving the evolutionary process truly remain a mystery more than one hundred fifty years after Origin of Species a fact that can free religion scholars to think in more creative ways about the positive contributions religious reflection might make to our understanding of life s origin and diversity The Mystery of Evolutionary Mechanisms calls for an embrace of mystery understood not as an abdication of the scientific quest for truth but as a courageous and humble acknowledgment of the limits of human reason and an openness to a fundamentally religious orientation toward life

The Broken Promise of Agricultural Progress Cameron Muir, 2014-06-05 Food and the global agricultural system has become one of the defining public concerns of the twenty first century Ecological disorder and inequity is at the heart of our food system This thoughtful and confronting book tells the story of how the

development of modern agriculture promised ecological and social stability but instead descended into dysfunction

Contributing to knowledge in environmental cultural and agricultural histories it explores how people have tried to live in the aftermath of ecological imperialism

The Broken Promise of Agricultural Progress An environmental history journeys to the dry inland plains of Australia where European ideas and agricultural technologies clashed with a volatile and taunting country that resisted attempts to subdue and transform it for the supply of global markets Its wide ranging narrative puts gritty local detail in its global context to tell the story of how cultural anxieties about civilisation population and race shaped agriculture in the twentieth century It ranges from isolated experiment farms to nutrition science at the League of Nations from local landholders to high profile moral crusaders including an Australian apricot grower who met Franklin D Roosevelt and almost fed the world This book will be useful to undergraduates and postgraduates on courses examining international comparisons of nineteenth and twentieth century agriculture and courses studying colonial development and settler societies It will also appeal to food concerned general readers

Life on Display Karen A. Rader, Victoria E.M. Cain, 2014-10-03 Rich with archival detail and compelling characters Life on Display uses the history of biological exhibitions to analyze museums shifting roles in twentieth century American science and society Karen A Rader and Victoria E M Cain chronicle profound changes in these exhibitions and the institutions that housed them between 1910 and 1990 ultimately offering new perspectives on the history of museums science and science education Rader and Cain explain why science and natural history museums began to welcome new audiences between the 1900s and the 1920s and chronicle the turmoil that resulted from the introduction of new kinds of biological displays They describe how these displays of life changed dramatically once again in the 1930s and 1940s as museums negotiated changing often conflicting interests of scientists educators and visitors The authors then reveal how museum staffs facing intense public and scientific scrutiny experimented with wildly different definitions of life science and life science education from the 1950s through the 1980s The book concludes with a discussion of the influence that corporate sponsorship and blockbuster economics wielded over science and natural history museums in the century s last decades A vivid entertaining study of the ways science and natural history museums shaped and were shaped by understandings of science and public education in the twentieth century United States Life on Display will appeal to historians sociologists and ethnographers of American science and culture as well as museum practitioners and general readers

The Sociology of Education Jeanne H Ballantine, Jenny Stuber, 2017-03-20 The Sociology of Education A Systematic Analysis is a comprehensive and cross cultural look at the sociology of education This textbook gives a sociological analysis of education by incorporating a diverse set of theoretical approaches The authors include practical applications and current educational issues to discuss the structure and processes that make education systems work as well as the role sociologists play in both understanding and bring about change In addition to up to date examples and research the eighth edition presents three chapters on inequality in educational access and experiences where class race and ethnicity

and gender are presented as separate though intersecting vectors of educational inequality Each chapter combines qualitative and quantitative approaches and relevant theory classics and emerging research and micro and macro level perspectives

Existential Threats Lisa Vox, 2017-05-12 Americans have long been enthralled by visions of the apocalypse Will the world end through nuclear war environmental degradation and declining biodiversity Or perhaps through the second coming of Christ rapture of the faithful and arrival of the Antichrist a set of beliefs known as dispensationalist premillennialism These seemingly competing apocalyptic fantasies are not as dissimilar as we might think In fact Lisa Vox argues although these secular and religious visions of the end of the world developed independently they have converged to create the landscape of our current apocalyptic imagination In *Existential Threats* Vox assembles a wide range of media science fiction movies biblical tractates rapture fiction to develop a critical history of the apocalyptic imagination from the late 1800s to the present Apocalypticism was once solely a religious ideology Vox contends which has secularized in response to increasing technological and political threats to American safety Vox reads texts ranging from Christianity Today articles on ecology and the atomic bomb to *Dr Strangelove* and from Mary Shelley's *The Last Man* to the *Left Behind* series by Tim LaHaye and Jerry B Jenkins demonstrating along the way that conservative evangelicals have not been as resistant to science as popularly believed and that scientists and science writers have unwittingly reproduced evangelical eschatological themes and scenarios in their own works *Existential Threats* argues that American apocalypticism reflects and propagates our ongoing debates over the authority of science the place of religion uses of technology and America's evolving role in global politics
