Examen des doctrines médicales et des systèmes de nosologie François-Joseph-Victor Broussais, 1827 **Examen des doctrines médicales et des systèmes de nosologie** François Joseph Victor Broussais, 1821 Illustrated manual of operative surgery and surgical anatomy Claude Bernard, 1855 The Medical and Surgical History of the War of the Rebellion (1861-65) United States. Surgeon-General's Office, 1879 *The Medical and Surgical History of the War of the Rebellion (1861-1865)* Barnes, 1879 **A Neuro-Psychoanalytical Dialogue for Bridging Freud and the Neurosciences** Sigrid Weigel, Gerhard Scharbert, 2015-08-03 The book presents an overview of the term neuropsychanalysis and traces its historical and scientific foundations as well as its cultural implications It also turns its attention to some blind spots open questions and to what the future may hold It examines the cooperative and conflicted relationship between psychoanalysis and neuroscience Articles from different fields investigate the neurological basis of psychoanalysis as well as the psychological terms of neurology They also discuss what psychoanalysis has to offer neuroscience In addition the emerging neuro psychoanalytical dialogue is enriched here by the voice of a culturally informed history of science The book brings leading authorities on these topics into conversation with each other creating an unprecedented opportunity to better understand the language of the psyche Specific concerns include the discussion of corporeality how the body figures into psychoanalysis the meaning of the unconscious in connection with dreams unconscious fantasies and the field of epigenetics Following a historical perspective the book provides a re reading of Freud s drive theory exploring his concept of life at the threshold of science and culture as well as the relationship between various representations somatic states and the origin of drive Overall the book argues that if the different methodological approaches of psychoanalysis and neuroscience are acknowledged not only for their individual uniqueness but also as a dialectic then the resulting epistemological and methodological dialogue might open up a fascinating body of neuropsychanalytical knowledge Medical and surgical history of the civil war , 1879 **The Medico-chirurgical Review, and Journal of Practical Medicine** James Johnson, Henry James Johnson, 1823 **Examen Des Doctrines Médicales Et Des Systèmes de Nosologie, Vol. 1: Précédé de Propositions Renfermant La Substance de la Médecine Physiologique** (Cla François Joseph Victor Broussais, 2018-05-16 Excerpt from Examen des Doctrines Médicales Et des Systèmes de Nosologie Vol 1 Précédé de Propositions Renfermant la Substance de la Médecine Physiologique Les gens qui n'ont coutume de prononcer le nom d'humanité par spéculation me supposeront des intentions pareilles aux leurs ils seront appuyés par certains médecins qui ont leurs raisons pour soutenir que les théories sont indifférentes au traitement Je les attends pour leur répondre au lit des malades Il y a plus j'en appelle leur conscience s'ils ont le courage de profiter de mes avis auprès de ceux qui imploreront leurs secours Je lis dans la pensée de mes directeurs plus d'une fois ils ont senti l'insuffisance de la doctrine qu'on leur a si laborieusement inculquée difficiles habuercugds Mais ils se sont mis en avant ils ont loué ils ont critiqué ils croient leur honneur

A History of the Humanities in the Modern University Sverre Raffnsøe, 2024-03-27 This book challenges commonplace assertions that the humanities are presently undergoing a severe crisis as a result of a longstanding decline Rather than hearkening to the widespread reactive call for a last ditch defense of the humanities under attack from an ungracious world this book fundamentally reverses the perspective and makes a plea for a different affirmative approach It contends that the humanities have incessantly arrived at critical turning points since they were first constituted in a form that remains recognizable today and assumed a leading role in knowledge organization with the establishment of the modern university around 1800 Assuming a historical perspective the monograph takes the human sciences back to their rightful place in the family tree of sciences and gives due recognition to their continuously decisive role in the production of new knowledge and the creation of new fields of knowledge Situating the ongoing gemmation of the humanities in a broader context this monograph also offers an encompassing introduction to the over all development of knowledge in the last two hundred years
