Channelling Mobilities Channelling Mobilities:

Channelling Mobilities Valeska Huber,2013-08 This book examines the people using and passing by the Suez Canal to reassess the history of globalisation before 1914 Reliability of High Mobility SiGe Channel MOSFETs for Future CMOS Applications Jacopo Franco,Ben Kaczer,Guido Groeseneken,2013-10-19 Due to the ever increasing electric fields in scaled CMOS devices reliability is becoming a showstopper for further scaled technology nodes Although several groups have already demonstrated functional Si channel devices with aggressively scaled Equivalent Oxide Thickness EOT down to 5 a 10 year reliable device operation cannot be guaranteed anymore due to severe Negative Bias Temperature Instability This book focuses on the reliability of the novel Si Ge channel quantum well pMOSFET technology This technology is being considered for possible implementation in next CMOS technology nodes thanks to its benefit in terms of carrier mobility and device threshold voltage tuning We observe that it also opens a degree of freedom for device reliability optimization By properly tuning the device gate stack sufficiently reliable ultra thin EOT devices with a 10 years lifetime at operating conditions are demonstrated The extensive experimental datasets collected on a variety of processed 300mm wafers and presented here show the reliability improvement to be process and architecture independent and as such readily transferable to advanced device architectures as Tri Gate finFET devices We propose a physical model to understand the intrinsically superior reliability of the MOS system consisting of a Ge based channel and a SiO₂ HfO₂ dielectric stack The improved reliability properties here discussed strongly support Si Ge technology as a clear frontrunner for future CMOS technology nodes

Networking Operatic Italy Francesca Vella, 2022-01-26 A study of the networks of opera production and critical discourse that shaped Italian cultural identity during and after Unification Opera's role in shaping Italian identity has long fascinated both critics and scholars Whereas the romance of the Risorgimento once spurred analyses of how individual works and styles grew out of and fostered specifically Italian sensibilities and modes of address more recently scholars have discovered the ways in which opera has animated Italians social and cultural life in myriad different local contexts In *Networking Operatic Italy* Francesca Vella reexamines this much debated topic by exploring how where and why opera traveled on the mid nineteenth century peninsula and what this mobility meant for opera Italian cities and Italy alike Focusing on the 1850s to the 1870s Vella attends to opera's encounters with new technologies of transportation and communication as well as its continued dissemination through newspapers wind bands and singing human bodies Ultimately this book sheds light on the vibrancy and complexity of nineteenth century Italian operatic cultures challenging many of our assumptions about an often exoticized country

Borders and Mobility Control in and between Empires and Nation-States, 2022-10-24 In a modernist interpretation of migration controls nation states play a major role This book challenges this interpretation by showing that comprehensive migration checks and permanent border controls appeared much earlier in early modern dynastic states and empires and predated nation states by centuries The 11 contributions in this volume explore the role of early modern and modern dynastic kingdoms and empires in Europe the Middle East and Eurasia and the evolution of border controls from the 16th to the 20th century They analyse how these states interacted with other polities such as emerging nations states in Europe North America and Australia and what this means for a broader reconceptualization of mobility in Europe and beyond in the longue dur e Contributors are Tobias Brinkmann Vincent Denis Sinan Din er Josef Ehmer Irial A Glynn Sabine Jesner Olga Katsiardi Hering Leo Lucassen Ikaros Mantouvalos Leslie Page Moch Jovan Pe alj Lewis H Siegelbaum Annemarie Steidl and Megan Williams

Borders and Freedom of Movement in the Holy Roman Empire Luca Scholz, 2020-01-16 In the Holy Roman Empire no prince can forbid men passage in the common road wrote the English jurist John Selden In practice moving through one the most fractured landscapes in human history was rarely as straightforward as suggested by Selden s account of the German liberty of passage Across the Old Reich mobile populations from emperors to peasants defied attempts to channel their mobility with actions ranging from mockery to bloodshed In this study Luca Scholz charts this contentious ordering of movement through the lens of safe conduct an institution that was common throughout the early modern world but became a key framework for negotiating freedom of movement and its restriction in the Empire **Borders and Freedom of Movement in the Holy Roman Empire** draws on sources discovered in twenty archives from newly unearthed drawings to first hand accounts by peasants princes and prisoners Scholz s maps shift the focus from the border to the thoroughfare to show that controls of moving goods and people were rarely concentrated at borders before the mid eighteenth century Uncovering a forgotten chapter in the history of free movement the author presents a new look at the unstable relationship of political authority and human mobility in the heartlands of old regime Europe

The Secret Police and the Soviet System Michael David-Fox,2023-10-24 Even more than thirty years after the dissolution of the Soviet Union the role of the secret police in shaping culture and society in communist USSR has been difficult to study and defies our complete understanding In the last decade the opening of non Russian KGB archives notably in Ukraine after 2015 has allowed scholars to explore state security organizations in ways not previously possible Moving beyond well known cases of high profile espionage and repression this study is the first to showcase research from a wide range of secret police archives in former Soviet republics and the countries of the former Soviet bloc some of which are rapidly closing or becoming inaccessible once again Rather than focusing on Soviet leadership *The Secret Police and the Soviet System* integrates the secret police into studies of information technology economics art and ideology The result is a state of the art portrait of one of the world s most notorious institutions the legacies of which are directly relevant for understanding Vladimir Putin s Russia today

Security Unbound Jef Huysmans,2014-05-09 Security concerns have mushroomed Increasingly numerous areas of life are governed by security policies and technologies *Security Unbound* argues that when insecurities pervade how we relate to our neighbours how we perceive international politics how governments formulate policies at stake is not our security but our democracy Security is not in the first instance a right or value but a practice that challenges democratic institutions and actions We are familiar with emergency policies in the name of national security challenging parliamentary processes the space for political dissent and fundamental rights Yet security practice and technology pervade society heavily in very mundane ways without raising national security crises in particular through surveillance technology and the management of risks and uncertainties in many areas of life These more diffuse security practices create societies in which suspicion becomes a default way of relating and governing relations ranging from neighbourhood relations over financial transactions to cross border mobility *Security Unbound* demonstrates that governing through suspicion poses serious challenges to democratic practice Some of these challenges are familiar such as the erosion of the right to privacy others are less so such as the post human challenge to citizenship *Security unbound* provokes us to see that the democratic political

stake today is not our security but preventing insecurity from becoming the organising principle of political and social life

Flooded Pasts William Carruthers,2022-12-15 *Flooded Pasts* examines a world famous yet critically underexamined event UNESCO s International Campaign to Save the Monuments of Nubia 1960 80 to show how the project its genealogy and its aftermath not only propelled archaeology into the postwar world but also helped to recolonize it In this book William Carruthers asks how postwar decolonization took shape and what role a colonial discipline like archaeology forged in the crucible of imperialism played as the new nations asserted themselves in the face of the global Cold War As the Aswan High Dam became the centerpiece of Gamal Abdel Nasser s Egyptian revolution the Nubian campaign sought to salvage and preserve ancient temples and archaeological sites from the new barrage s floodwaters Conducted in the neighboring regions of Egyptian and Sudanese Nubia the project built on years of Nubian archaeological work conducted under British occupation and influence During that process the campaign drew on the scientific racism that guided those earlier surveys helping to consign Nubians themselves to state led resettlement and modernization programs even as UNESCO created a picturesque archaeological landscape fit for global media and tourist consumption *Flooded Pasts* describes how colonial archaeological and anthropological practices and particularly their archival and documentary manifestations created an ancient Nubia severed from the region s population As a result the Nubian campaign not only became fundamental to the creation of UNESCO s 1972 World Heritage Convention but also exposed questions about the goals of archaeology and heritage and whether the colonial origins of these fields will ever be overcome

Seeking Bread and Fortune in Port Said Lucia

Carminati, 2023-08-08 Seeking Bread and Fortune in Port Said probes migrant labor's role in shaping the history of the Suez Canal and modern Egypt. It maps the everyday life of Port Said's residents between 1859 when the town was founded as the Suez Canal's northern harbor and 1906 when a railway connected it to the rest of Egypt. Through groundbreaking research, Lucia Carminati provides a ground-level perspective on the key processes touching late nineteenth-century Egypt: heightened domestic mobility and immigration intensified urbanization, changing urban governance and growing foreign encroachment. By privileging migrants' prosaic lives, Seeking Bread and Fortune in Port Said shows how unevenness and inequality laid the groundwork for the Suez Canal's making.
