color, shape, texture, size, hardness

3. What is the effect of temperature on water in each of its states of matter?

Ice- heat above 0°C melts to liquid water- heat above 100°C turns it to water vapor , Below 0°C it freezes water vapor- temperatures below 100°C changes it to liquid

4. What are the differences between a chemical and physical change? Give an example of each.

A _____ change means there is a new substance formed or a different type of matter than there was.

a bruised apple

A _____ change means it is still the same type of matter even though it may have changed state, or shape or size or many other physical properties a chopped apple

5. Your Science project is coming up. What is the control versus the variable? What would happen if you did not have a control?

The control is used to compare to the parts you are changing. The control is usually the "normal" condition.

The variables are the parts of the experiment you are changing or testing.
