The Neglected Dimension of Global Security National Academy of Medicine, Secretariat, Commission on a Global Health Risk Framework for the Future, 2016-05-16 Since the 2014 Ebola outbreak many public and private sector leaders have seen a need for improved management of global public health emergencies The effects of the Ebola epidemic go well beyond the three hardest hit countries and beyond the health sector Education child protection commerce transportation and human rights have all suffered The consequences and lethality of Ebola have increased interest in coordinated global response to infectious threats many of which could disrupt global health and commerce far more than the recent outbreak In order to explore the potential for improving international management and response to outbreaks the National Academy of Medicine agreed to manage an international independent evidence based authoritative multistakeholder expert commission As part of this effort the Institute of Medicine convened four workshops in summer of 2015 This commission report considers the evidence supplied by these workshops and offers conclusions and actionable recommendations to guide policy makers international funders civil society organizations and the private sector

Disaster Law Yan Cui, Rajib Shaw, 2025-02-01 This book covers the broad aspects of disaster legislation governance and their implementation The book also includes in depth reviews and new data based on case studies across the globe involving multidisciplinary research In addition the book suggests specific policies and action measures to enhance the implementation of disaster legislation for the resilience of people and local governments Disaster law is the core to disaster risk management The legal framework not only provides the government an instrument to take actions before during and after a disaster but it also helps in recovery process The

legislative measures provide certain levels of guidance to different stakeholders such as national governments local governments civil societies and more importantly citizens The legal provision gives people and communities certain obligations as well as responsibilities to act during or before disasters Over the last several years there has been new disaster laws formulated in many countries and revisions have been made to adjust the existing disaster laws to be more effective Although it is important to have governance provision of disaster law its implementation is essential

Future-proofed Ilia Antenucci,2025-07-02 Efficient inclusive sustainable these are only some of the concepts through which smart cities have been marketed globally over the past fifteen years at least But what has really driven smart city projects governance and economies This book argues it is speculation not merely finance but a much broader technopolitical force seeking to calculate and shape the future Smart cities have been testbeds for new technological products governed through preemptive analytics and fuelled by high risk financial investments Drawing on case studies from Kolkata and Cape Town this book illustrates how smart city technologies speculate on the future to govern and monetise the present Today smart cities might have lost some of their hype already but their legacies are here to stay and their ethical and political implications appear more critical than ever This book offers insights into the speculative forces that undergird urban smartness and into their implications on everyday life spatial justice and citizens rights

Recovery from Disaster Ian Davis,David Alexander,2015-08-20 Disasters can dominate newspaper headlines and fill our TV screens with relief appeals but the complex long term challenge of recovery providing shelter rebuilding safe dwellings restoring livelihoods and shattered lives generally fails to attract the attention of the public and most agencies On average 650 disasters occur each year They affect more than 200 million people and cause 166 trillion of damage Climate change population growth and urbanisation are likely to intensify further the impact of natural disasters and add to reconstruction needs Recovery from Disaster explores the field and provides a concise comprehensive source of knowledge for academics planners architects engineers construction managers relief and development officials and reconstruction planners involved with all sectors of recovery including shelter and rebuilding With almost 80 years of first hand experience of disaster recovery between them Ian Davis an architect and David Alexander a geographer draw substantially from first hand experiences in a variety of recovery situations in China Haiti Italy Japan New Zealand Pakistan the Philippines and the USA The volume is further enriched by two important and unique features 21 models of disaster recovery are presented seven of which were specifically developed for the book The second feature is a survey of expert opinion about the nature of effective disaster recovery the first of its kind More than 50 responses are provided in full along with an analysis that integrates them with the theories that underpin them By providing a framework and models for future study and applications Davis and Alexander seek both to advance the field and to provide a much needed reference work for decision makers With a broad perspective derived from the authors roles held as university professors researchers trainers consultants NGO directors and advisors to governments
