Doing Good Thomas

Nazario, Kelly Quayle, 2017-01-23 When educating the minds of our youth we must not forget to educate their hearts His Holiness the 14th Dalai Lama Are young people more interested in Snapchat than actually talking to each other Is the local mall the first place families think of to go when they want to be happy Too often we get caught up in acquiring more things instead of engaging in meaningful experiences with others This can create distance between people which makes it more difficult to resolve disputes or respond compassionately when someone is in need We can better understand what another person is thinking or feeling if we can imagine being in their shoes and experience a moment in life as they see it It makes it easier to bully someone who is perceived to be different on the outside when in fact on the inside we all basically need the same things to be happy kindness acceptance purpose Through engaging classroom activities thoughtful homework assignments relevant videos and suggested projects young people are introduced to some of our most pressing global challenges As they work together on proposed solutions they begin to create for themselves a meaningful life

Piracy Cultures Manuel Castells, Gustavo Cardoso EDS, 2013-02-25 *Piracy Cultures* Editorial Introduction MANUEL CASTELLS 1

University of Southern California GUSTAVO CARDOSO Lisbon University Institute ISCTE IUL What are Piracy Cultures
Usually we look at media consumption starting from a media industry definition We look at TV radio newspapers games
Internet and media content in general all departing from the idea that the access to such content is made available through
the payment of a license fee or subscription or simply because its either paid or available for free being supported by
advertisements or under a freemium business model That is we look at content and the way people interact with it within a
given system of thought that sees content and its distribution channels as the product of relationships between media
companies organizations and individuals effectively a commercial relationship of a contractual kind with accordant rights and
obligations But what if for a moment we turned our attention to the empirical evidence of media consumption practice not
just in Asia Africa and South America but also all over Europe and North America All over the world we are witnessing a
growing number of people building media relationships outside those institutionalized sets of rules We do not intend to
discuss whether we are dealing with legal or illegal practices our launching point for this analysis is that when a very
significant proportion of the population is building its mediation through alternative channels of obtaining content such
behavior should be studied in order to deepen our knowledge of media cultures Because we need a title to characterize those
cultures in all their diversity but at the same time in their commonplaceness we propose to call it Piracy Cultures There's
Nothing Micro about a Billion Women Mary Ellen Iskenderian, 2023-09-05 Why it takes more than microloans to empower
women and promote sustainable inclusive economic growth Nearly one billion women have been completely excluded from
the formal financial system Without even a bank account in their own names they lack the basic services that most of us take
for granted secure ways to save money pay bills and get credit Exclusion from the formal financial system means they are
economic outsiders unable to benefit from or contribute to economic growth Microfinance has been hailed as an economic
lifeline for women in developing countries but as Mary Ellen Iskenderian shows in this book it takes more than microloans to
empower women and promote sustainable inclusive economic growth Iskenderian who leads a nonprofit that works to give
women access to the financial system argues that the banking industry should view these one billion unbanked women not as
charity cases but as a business opportunity a lucrative new market of small business owners heads of households and
purchasers of financial products and services Iskenderian shows how financial inclusion can be transformative for the lives of
women in developing countries describing among other things the informal moneylenders and savings clubs that women have
relied on the need for both financial and digital literacy and access as mobile phones become a means of banking and the
importance of women's property rights She goes on to make the business case for financial inclusion exploring the ways that
financial institutions are adapting to help women build wealth access capital and manage risks Banks can do the right thing
and make money while doing so and all of us can benefit *Handbook of Research on Teacher Education in the Digital Age*

Why Are Student Athletes Funding Your Future? Dr. Ernest E. Cutler, Jr.,2016-01-05 Scholarship shortfalls persist leaving NCAA scholarship student athletes to pay hundreds and sometimes thousands of dollars for additional educational expenses not covered by their

current athletic scholarships Meanwhile NCAA campuses continue to generate money from the sale of apparel and other merchandise featuring star athletes In this detailed study Ernest Cutler explores the troubling history of money changing hands with none of it going to student athletes who are for some reason considered amateurs that should not be eligible for payment He also takes a careful look about what such a system says about academic values and educational institutions as well as how the system contributes to infractions by student athletes coaches and athletic administrators This research study is not intended to disrespect the NCAA but it does seek to serve as a tool to change problematic policies that infringe upon the rights of current former and future student athletes
