Brown, Anna Krasteva, Maria Ranieri, 2016-05-01 International Advances in Education Global Initiatives for Equity and Social Justice is an international research monograph series of scholarly works that focuses primarily on empowering children adolescents and young adults from diverse educational socio cultural linguistic religious racial ethnic and socio economic settings to become non exploited non exploitive contributing members of the global community The series draws on the international community of investigators academics and community organizers that have contributed to the evidence base for developing sound educational policies practices and innovative programs to optimize the potential of all students Each themed volume includes multi disciplinary theory research and practice that provides an enriched understanding of the drivers of human potential via education to assist readers in exploring adapting and replicating innovative strategies that enable ALL students to realize their full potential Among these strategies are the integration of digital technologies DT and information and communication technologies ICT into contemporary education platforms However technology must be more than just a tool to deliver content and stimulate engagement it must become a means to broaden access to learning advance equity promote social justice and encourage social inclusion Especially reaching out to address the academic and social needs of rural impoverished marginalized and displaced populations Though the digital divide continues to hinder educational attainment for underprivileged populations ICTs are providing significant opportunities to deliver literacy and basic skills instruction to disadvantaged segments of the global population as well as engage motivate and customize learning to address local needs Nonetheless the availability of ICT is not a deterministic process Other societal cultural political and contextual factors are of fundamental importance to acceptance and integration that enables people to benefit from technology The relationship between educational access instructional delivery and ICT should be considered in more complex terms In particular digital technologies should be viewed as instructional tools that improve access to educational opportunities strengthen cultural resources promote social and economic equity and provide students with the knowledge and competencies to prepare them for a future that cannot be predicted Therefore developing ICT and media capabilities that instill citizenship and stewardship in today's students is crucial to gleaning the social and cultural advantages of a contemporary global society that encourages full and equal citizenship Citizenship education refers to two understandings of citizenship as belonging and as engagement The first is focused on national identity and valorizes the values of justice and democracy as well as language and culture as the roots bridging the personality of children to the community of solidarity and shared norms The second understanding of citizenship complements the roots with roads with the choices made by the individual with the capacity to form and develop

the child's personality into the actor and author of his/her educational professional and life projects. The adolescent prepares to become an active, committed and engaged citizen with the intellectual capacity for critical thinking that leads to responsible actions. Digital citizenship expresses the transformations of both belonging to and engaging in the information society and contributes to the development of generation Y with the aspiration to innovate and experiment to explore the possibilities of the new digital world to question authorities and instances of knowledge and power. Education addresses digital citizenship by opening more avenues for the intersection of Internet imagination and exploration. Volume 10 E-learning examines the challenges and benefits of social media on student self-identity, collaboration and academic engagement, shares promising practices associated with technology in education and e-citizenship in the 21st century and advances the discussion on blending global citizenship education and social media that raises student awareness, accountability and social justice involvement.

Promoting Active Learning through the Integration of Mobile and Ubiquitous Technologies Keengwe, Jared, 2014-08-31. Once considered disruptive to learning, technology has increasingly become an integrated and valued part of the modern classroom. In particular, mobile technologies provide the ability to encourage evocative student learning through new experiences. *Promoting Active Learning through the Integration of Mobile and Ubiquitous Technologies* showcases the widely varied ways that technology can be applied to enhance classroom learning. Closely examining and critiquing the best methods in assimilating technologies, this publication is a valuable resource for faculty, teachers, administrators, technology staff, directors of learning centers and other education technology leaders interested in incorporating new technologies within the classroom for engaging student learning. [Learning in the Cloud](#) Mark Warschauer, 2011. This comprehensive and cutting-edge book portrays a vision of how digital media can help transform schools and what kinds of curriculum, pedagogy, assessment, infrastructure and learning environments are necessary for the transformation to take place. The author and his research team spent thousands of hours observing classes and interviewing teachers and students in both successful and unsuccessful technology-rich schools throughout the United States and other countries. Featuring lessons learned as well as analysis of the most up-to-date research, they offer a welcome response to simplistic approaches that either deny the potential of technology or exaggerate its ability to reform education simply by its presence in schools. Challenging conventional wisdom about technology and education, *Learning in the Cloud* critically examines concepts such as the digital divide, 21st-century skills and guide on the side for assessing and guiding efforts to improve schools. Combines a compelling vision of technology's potential to transform learning with an insightful analysis of the curricular challenges required for meaningful change and discusses the most recent trends in media and learning such as the potential of tablets and e-reading. **The Case of the iPad** Cathy Burnett, Guy Merchant, Alyson Simpson, Maureen Walsh, 2017-07-06. This book brings together an international group of literacy studies scholars who have investigated mobile literacies in a variety of educational settings. Approaching mobility from diverse theoretical perspectives,

the book makes a significant contribution to how mobile literacies and tablets in particular are being conceptualised in literacy research The book focuses on tablets and particularly the iPad as a prime example of mobile literacies setting this within the broader context of literacy and mobility The book provides inspiration and direction for future research in mobile literacies based upon 16 chapters that investigate the relationship between tablets and literacy in diverse ways Together they address the complex and multiple forces associated with the distribution of the technologies themselves and the texts they mediate and consider how apps adults and children work together as iPads enter the mesh of practices and material arrangements that constitute the institutional setting
