As European empires crumbled in the 20th century, the power structures that had dominated the world for centuries were up for renegotiation. Yet instead of a rebirth for democracy, what emerged was a silent coup, namely the unstoppable rise of global corporate power. Exposing the origins of this epic power grab as well as its present-day consequences, *Silent Coup* is the result of two investigative journalists' reports from 30 countries around the world. It provides an explosive guide to the rise of a corporate empire that now dictates how resources are allocated, how territories are governed, and how justice is defined. *Handbook of Civic Engagement and Education* Richard Desjardins, Susan Wiksten, 2022-12-08

Underscoring the complex relationship between civic engagement and education at all stages of life, this innovative Handbook identifies the contemporary challenges and best approaches and practices to encourage civic engagement within education. **Along the Integral Margin** Stephen Campbell, 2022-08-15

In recent years, anthropologists have focused on informal, unfree, and other nonnormative labor arrangements and labeled them as noncapitalist. In *Along the Integral Margin*, Stephen Campbell pushes back against this idea and shows that these labor arrangements are, in fact, important aspects of capitalist development and that the erroneous noncapitalist label contributes to obscuring current capitalist relations. Through powerful, intimate ethnographic narratives of the lives and struggles of residents of a squatter settlement in Myanmar, Campbell challenges narrow conceptions of capitalism and asserts that nonnormative labor is not marginal but rather centrally important to Myanmar's economic development. Campbell's narrative approach brings individuals who are often marginalized in accounts of contemporary Myanmar to the forefront and raises questions about the diversity of work in capitalism. *International Studies* Scott Straus, Barry Driscoll, 2018-09-10

The challenge of teaching international studies is to help students think coherently about the multiple causes and effects of global problems. In *International Studies: Global Forces, Interactions, and Tensions*, award-winning scholars Scott Straus and Barry Driscoll give students a clear framework that pinpoints how key factors, forces, interactions, and tensions contribute to world events with both global and local consequences. The authors first show students how to look for common patterns in global issues by introducing four world-shaping forces: global markets, shifting centers of power, information and communications technologies, and global governance. They systematically trace how these forces prompt interactions among world actors and thus give rise to a set of tensions that spur key challenges. The framework enables students to ask and answer for themselves: Who is interacting? Where did such interactions develop? What policies or institutions govern them? Why are they getting certain global and local reactions? Students then apply the framework to the global problems that matter most to them: human rights abuses, economic inequality, terrorism, forced migration, pandemics, and global health responses, climate change, food security, and more. *International Studies* raises the bar
