Changing Race Clara E. Rodríguez, 2000-07 An introduction to the dynamic complexity of American ethnic life and Latino identity Latinos are the fastest growing population group in the United States Through their language and popular music Latinos are making their mark on American culture as never before As the United States becomes Latinized how will Latinos fit into America s divided racial landscape and how will they define their own racial and ethnic identity Through strikingly original historical analysis extensive personal interviews and a careful examination of census data Clara E Rodríguez shows that Latino identity is surprisingly fluid situation dependent and constantly changing She illustrates how the way Latinos are defining themselves and refusing to define themselves represents a powerful challenge to America s system of racial classification and American racism

Defining Identity and the Changing Scope of Culture in the Digital Age Novak, Alison, El-Burki, Imaani

Jamillah, 2016-05-19 Since the popularization of Internet technologies in the mid 1990s human identity and collective culture has been dramatically shaped by our continued use of digital communication platforms and engagement with the digital world. Despite a plethora of scholarship on digital technology, questions remain regarding how these technologies impact personal identity and perceptions of global culture. *Defining Identity and the Changing Scope of Culture in the Digital Age* explores a multitude of topics pertaining to selfhood, self-expression, human interaction, and perceptions of civilization and culture in an age where technology has become integrated into every facet of our everyday lives. Highlighting issues of race, ethnicity, and gender in digital culture, interpersonal and computer-mediated communication, pop culture, social media, and the digitization of knowledge, this pivotal reference publication is designed for use by scholars, psychologists, sociologists, and graduate-level students interested in the fluid and rapidly evolving norms of identity and culture through digital media. **In**

the Shadow of Race Victoria Hattam, 2007-09-15 Race in the United States has long been associated with heredity and inequality, while ethnicity has been linked to language and culture. *In the Shadow of Race* recovers the history of this entrenched distinction and the divisive politics it engenders. Victoria Hattam locates the origins of ethnicity in the New York Zionist movement of the early 1900s. In a major revision of widely held assumptions, she argues that Jewish activists identified as ethnics not as a means of assimilating and becoming white but rather as a way of defending immigrant difference as distinct from race, rooted in culture rather than body and blood. Eventually, Hattam shows, the Immigration and Naturalization Service and the Census Bureau institutionalized this distinction by classifying Latinos as an ethnic group and not a race. But immigration and the resulting population shifts of the last half century have created a political opening for reimagining the relationship between immigration and race. How to do so is the question at hand. *In the Shadow of Race* concludes by examining the recent New York and Los Angeles elections and the 2006 immigrant rallies across the country to assess the possibilities of forging a more robust alliance between immigrants and African Americans. Such an alliance is needed, Hattam argues, to more effectively redress the persistent inequalities in American life. **Essentials of Health Justice: Law,**
