color, shape, texture, size, hardness

3. What is the effect of temperature on water in each of its states of matter?

Ice- heat above 0°C melts to liquid water- heat above 100°C turns it to water vapor , Below 0°C it freezes water vapor- temperatures below 100°C changes it to liquid

4. What are the differences between a chemical and physical change? Give an example of each.

A _____ change means there is a new substance formed or a different type of matter than there was.

a bruised apple

A _____ change means it is still the same type of matter even though it may have changed state, or shape or size or many other physical properties a chopped apple

5. Your Science project is coming up. What is the control versus the variable? What would happen if you did not have a control?

The control is used to compare to the parts you are changing. The control is usually the "normal" condition.
