## Chapter 26 Us History Textbook:

*Not Another U.S. History Textbook* Adam Strube, 2024-01-15 Why on earth would two history nerds use their own free time to write another US history textbook Well that intelligent human is the right question This work breaks from the traditional memorization of who what when where and focuses on why and how The former is popular in schools due to its efficiency in quantification for testing You re either right or wrong about remembering facts But it s so boring that most students turn off their brains once they set foot in the class and that habit continues well into old age if not recognized and corrected Why and how are more subjective therefore harder to grade But with their asking people become re centered in our collective story where they belong Only then can proper context be understood and criticism and perspective be applied We believe this approach to be the missing link in our education and understanding of current issues norms and discussion points Hopefully after reading this work each reader s critical thinking will activate around all history permanently That will certainly aid humanity s evolution and communication Wait does that mean this book can be categorized as self help Argue away

Reading the Two Books of God Thomas W. Mann, 2022-09-29 Thomas W Mann is a biblical scholar and retired parish minister and the author of numerous books and articles He is particularly interested in how experiences in nature prompt theological reflection based in the Bible shaping our sense of sacred time and place and how the lectionary readings of the church year also provide a spiritual calendar for the seasons of our lives The result is a conversation inspired by poets and writers like Mary Oliver Wendell Berry and John Muir but also by philosophers and theologians ranging from Abraham Joshua Heschel to David Kelsey Along the way we enter beach time and take backpacking trips in the Sierras but also join the triumphal entry parade on Palm Sunday and listen to the stable animals on Christmas Eve We perceive the beauty of creation through the eyes of science as well as religion sensually as well as intellectually We celebrate our communion with all creatures from fungus to forests inspired with awe and reverence and with a responsibility to care for the earth so threatened by climate change

**An Artificial History of Natural Intelligence** David W. Bates, 2024-04-02 What would it mean to make a decision against the acceleration of automation and for humanity In An Artificial History of Natural Intelligence David W

Bates lays the groundwork for such a decision by rethinking the history of human cognition and its entanglements with technology. Tracing evolving lines of thought from the early modern period to the present, Bates confronts the intimate connection between autonomy and automaticity in how we have understood the capacities of the human mind. At the heart of this entanglement is a total mechanistic understanding of nature that began in the seventeenth century and saw the body as machine, the nervous system as control mechanism, and the brain as the center of cognition. Reading varied thinkers from Descartes to Kant to Turing, Bates reveals how new ideas and experiences reconfigured the ways in which the automaticity of the body could be linked with technical systems while at the same time the mind could still create the space for autonomy. The result is a new theorization of the human in which the human dependent on technology produces itself as an artificial automation that has no natural origin.
