Patent Policy and Innovation Hazel V. J. Moir, 2013-01-01

Just how inventive are inventions More to the point just how inventive are the inventions covered by patents Not very according to Hazel Moir and there is no reason to doubt her conclusions She has spent years in painstakingly analysis of dozens of business method patents in Australia and elsewhere She finds they are no more than strategic devices intended to annoy and disrupt commercial competition and confuse the market Hazel Moir is a patent expert beholden to no patent theory and no patent interests In consequence her research is fresh and inspired Her conclusion that patents describe and protect obvious combinations of old ideas and trivial variations may not be confined to business methods It is a conclusion that demands the consideration of policymakers Stuart Macdonald Aalto University Helsinki Finland This book presents a compelling attack on the patent system Thoughtfully analyzing the existing empirical literature and providing her own painstaking study of business method patents Hazel Moir explains how it is that patents have spread geographically and technologically with increasingly broad rights becoming ever easier to obtain Bravely and persuasively she recommends policymakers tackle one of the most vexing issues in patent law the quantum of new knowledge that ought to be required to make an invention worthy of protection Rochelle Dreyfuss New York University School of Law US Hazel Moir's book deserves to become a classic Between its covers one will find writing of great clarity and data that reveal the real world costs of the patent system After reading Moir's analysis one wonders what the actual social benefits of the patent system might be This is evidence based analysis at its best Peter Drahos Australian National University and Queen Mary University of London UK This book presents a compelling attack on the patent system Thoughtfully analyzing the existing empirical literature and providing her own painstaking study of business method patents Hazel Moir explains how it is that despite the intuitions of economists social scientists lawyers judges and even some inventors patents have spread geographically and technologically with increasingly broad rights becoming ever easier to obtain Bravely and persuasively she recommends policymakers tackle one of the most vexing issues in patent law the quantum of new knowledge that ought to be required to make an invention worthy of protection Rochelle Dreyfuss New York University School of Law US This empirical study uses a scientifically selected sample of patents to assess patent quality The careful evaluation of the assumptions in alternative economic theories about the generation and diffusion of new knowledge demonstrates that the height of the inventive step is critical to effective and efficient patent policy The book provides a practical introduction to the policy rules affecting the grant of patents particularly the rules making the inventive step so low It also offers insights into interactions between examiners and applicants during the patent application process Finally the book compares how the rules about inventiveness operate in the USPTO the EPO and the Australian Patent Office gives new insights into business method patenting and offers suggestions for raising the height of the inventive step Patent Policy and Innovation will appeal to academics researching in the patent field economists innovation and industry policy advisors patent policy makers NGO policy advisors and patent practitioners Oswaal NTA

Food Industries ,1928 *Studies in Business Policy* National Industrial Conference Board,1958 *Resources in Education* ,1994 Protective Practices Jessica Borge,2020-09-23 From humble beginnings wholesaling at a small tobacconist hairdresser shop in 1915 the London Rubber Company rapidly became the UK s biggest postwar producer and exporter of disposable rubber condoms A first mover and innovator the company s continuous product development and strong brands including Durex allowed it to dominate supply to the retail trade and family planning clinics leading it to intercede in the burgeoning women s market When oral contraceptives came along however the company was caught in a bind between defending condoms against the pill and claiming a segment of the new birth control market for itself In this first major study on the company Jessica Borge shows how despite the unmentionable status of condoms that inhibited advertising in the early twentieth century aggressive business practices were successfully deployed to protect the monopoly and squash competition Through close evidence based examination of LRC s first fifty years encompassing its most challenging decades the 1950s and 1960s as well as an overview of later years including the AIDS crisis Borge argues that the story of the modern disposable condom in Britain is really the story of the London Rubber Company the circumstances that befell it the struggles that beset it the causes that opposed it and the opportunities it created for itself LRC s historic intervention in and contribution to female contraceptive practices sits uneasily with existing narratives centred on women s control of reproduction but the time has come Borge argues for the condom to find its way back to the centre of these debates *Protective Practices* thereby re examines a key transitional moment in social and cultural history through the lens of this unusual case study *Studies in Business Policy* ,1959 Engineering News-record ,1905 **Global Innovation and Economic Value** Vijay Kumar,R. (IBM),1978-04-01 **Commerce Business Daily** ,2001-12-03 Evolving IP Marketplace Suzanne Michael,2011-05 This report recommends improvements to two areas of patent law policies affecting how well a patent gives notice to the public of what technology is protected and remedies for patent infringement The report provides valuable insights on how courts can reform the patent system to best serve consumers It recognizes that patents play a critical role in encouraging innovation but it also observes that some strategies by patent holders risk distorting competition and deterring innovation This is especially true for activity driven by poor patent notice and by remedies that do not align the compensation received by patent holders for infringement with the economic value of their patented inventions This is a print on demand report
