Charles Darwin Charles Darwin:

The Origin of Species Charles Darwin, 1909 First published in 1859 this landmark book on evolutionary biology was not the first to deal with the subject but it went on to become a sensation and a controversial one for many religious people who could not reconcile Darwin's science with their faith Darwin worked on the book for over 20 years before its publication The radical crux of his scientific theory was the idea of natural selection which meant that chance not a divine Creator played a great role in humanity's advancement and that individuals who weren't physically able to adapt with the greater populace died off

Charles Darwin's Natural Selection Charles Darwin, 1987-11-26 An original unpublished manuscript written before the Origin of Species which contains the references to journal articles and books that Darwin used in formulating his controversial ideas This volume has been edited and annotated and includes a cross indexing to the Origin

The Correspondence of Charles Darwin: Volume 1, 1821-1836 Charles Darwin, 1985-03-07 This volume inaugurates a complete edition of The Correspondence of Charles Darwin For the first time full authoritative texts of Darwin's letters are available edited according to modern textual editorial principles and practice The first volume of the edition contains the letters of the years 1821-1836 They begin with one written to Darwin at the age of twelve and continue through his school days at Shrewsbury his two years as a medical student at Edinburgh the undergraduate years at Cambridge and his five years of exploration and learning during the voyage of the Beagle These were Darwin's years of initiation and preparation for a life of science In the earliest letters Darwin appears already keenly interested in natural history and an avid collector of minerals plants marine invertebrates and insects especially beetles The letters of the succeeding years tell the story of the young Darwin's development up to his return to England when at the age of twenty seven he was received as a colleague by Charles Lyell Adam Sedgwick and other leading scientists who had already heard of his discoveries and observations during the Beagle voyage

Charles Darwin Tim M.
