Critical Children Richard Locke, 2013-07-16 The ten novels explored in Critical Children portray children so vividly that their names are instantly recognizable Richard Locke traces the 130 year evolution of these iconic child characters moving from Oliver Twist David Copperfield and Pip in Great Expectations to Tom Sawyer and Huckleberry Finn from Miles and Flora in The Turn of the Screw to Peter Pan and his modern American descendant Holden Caulfield and finally to Lolita and Alexander Portnoy It s remarkable writes Locke that so many classic or let s say unforgotten English and American novels

should focus on children and adolescents not as colorful minor characters but as the intense center of attention. Despite many differences of style, setting, and structure, they all enlist a particular child's story in a larger cultural narrative. In *Critical Children*, Locke describes the ways the children in these novels have been used to explore and evade large social, psychological, and moral problems. Writing as an editor, teacher, critic, and essayist, Locke demonstrates the way these great novels work, how they spring to life from their details, and how they both invite and resist interpretation and provoke rereading. Locke conveys the variety and continued vitality of these books as they shift from Victorian moral allegory to New York comic psychoanalytic monologue from a child who is an agent of redemption to one who is a narcissistic prisoner of guilt and proud rage.

This text examines the theories of juvenile crimes and the social context of delinquency, including the relevance of families, schools, and peer groups. Reorganized and thoroughly updated to reflect the most current trends and developments in juvenile delinquency, the Eighth Edition includes discussions of the history, institutional context, and societal reactions to delinquent behavior. Delinquency prevention programs and basic coverage of delinquency as it relates to the criminal justice system are also included to add context and support student comprehension.
