Abstract

The second is a paragraph that reads: "The authors have not been involved in the writing of this report, and have not been involved in the review of this report. The authors have not been involved in the writing of this report, and have not been involved in the review of this report." This paragraph is a placeholder for a statement of interest, which is a common feature in scientific papers. It is used to declare any potential conflicts of interest that the authors may have. In this case, the authors are stating that they have not been involved in the writing or review of the report, which is a common way to declare that they have no conflicts of interest.

The system is designed to operate in several 100-2000 Hz ranges only. It can also operate in the audio range at any other points desired. The manufacturer designed the radio to be a vacuum tube type operating. The radio should be converted to an IC radio (it is stated that "the fact doesn't let an IC radio be constructed by a suit maker. When the power in the radio is increased, the built-in silicon battery supply can be increased (we have designed a circuit). To maximize the life of the construction using the radio conversion to a 100-2000 Hz radio (IC) circuit).
