does not guarantee acceptance Many organizations have tried to implement something new and failed Healthcare facilities need to build implementation plans into their development of any new innovations In particular end users need to buy in and accept new system usability in order to improve compliance and employee satisfaction Our EMR is being developed in stages so our processes are constantly changing with requires fast transitions in the end user learning We have moved through the first two stages and are moving into the third stage in the next few months This project describes an implementation plan for an electronic medical record development that we have used during our first two stages The project plan has a strategic focus on end user acceptance of meaningful use guidelines that is sustainable for continued growth The elements of this plan can be applied to other types of innovative change in healthcare
