## Firearms A Global History To 17:

**Firearms** Kenneth Warren Chase, 2003-07-07 This book is a history of firearms across the world from the 1100s up to the 1700s from the time of their invention in China to the time when European firearms had become clearly superior It asks why it was the Europeans who perfected firearms when it was the Chinese who had invented them but it answers this question by looking at how firearms were used throughout the world *The Oxford World History of Empire* Peter Fibiger Bang, Christopher Alan Bayly, Walter Scheidel, 2021 This is the first world history of empire reaching from the third millennium BCE to the present By combining synthetic surveys thematic comparative essays and numerous chapters on specific empires its two volumes provide unparalleled coverage of imperialism throughout history and across continents from Asia to Europe and from Africa to the Americas Only a few decades ago empire was believed to be a thing of the past now it is clear that it has been and remains one of the most enduring forms of political organization and power We cannot understand the dynamics and resilience of empire without moving decisively beyond the study of individual cases or particular periods such as the relatively short age of European colonialism The history of empire as these volumes amply demonstrate needs to be drawn on the much broader canvas of global history Volume Two The History of Empires tracks the protean history of political domination from the very beginnings of state formation in the Bronze Age up to the present Case studies deal with the full range of the historical experience of empire from the realms of the Achaemenids and Asoka to the empires of Mali and Songhay and from ancient Rome and China to the Mughals American settler colonialism and the Soviet Union Forty five chapters detailing the history of individual empires are tied together by a set of global synthesizing surveys that structure the world history of empire into eight chronological phases *A Global History of the Nuclear Arms Race* Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime *A Global History of Warfare and Technology* Kaushik Roy, 2022-08-05 This book addresses the global history of technology warfare and state formation from the Stone Age to the

Information Age Using a combination of top down and bottom up methodologies it examines both interstate and intrastate conflicts with a focus on Eurasian technology and warfare It shows how human agency and structural factors have intertwined creating a complex web of technology and warfare It also explores the interplay between technological and non technological factors to chart the evolution of warfare from its origins to the present day arguing that the interactions between civilian and military sectors have shaped the use of technology in warfare Given its scope and depth it is a valuable resource for researchers in fields such as world history history of science and technology history of warfare and imperialism and international relations      Routledge Handbook of the Global History of Warfare Kaushik Roy,Michael W.

Charney,2024-01-23 This handbook examines key aspects of the development of the global history of warfare and the changing patterns of warfare over time Although scholarship has long eschewed a chronological narrative of the evolution of warfare that privileges the Western experience global histories of warfare have had difficulty avoiding an overemphasis on the West The present volume is a collection of themes rather than a history per se it provides important perspectives on the emergence of warfare as a global historical experience from the ancient past to the present day Drawing together numerous experts it tells a broader more inclusive story of the global human experience with wars and warfare The 35 chapters are organised in eight thematic parts Part I Origins of Warfare Part II Politics and Armed Forces in the Pre Modern Era Part III Steppe Nomads of Eurasia Part IV Naval Warfare and Piracy in the Pre Industrial World Part V The Impact of Gunpowder Part VI Transition from Industrial to Total War Part VII Wars of Decolonisation and Cold War Part VIII Postmodern New Wars These Parts offer an overview of the global experience of warfare to help readers understand how the wars and the militaries we see today have been shaped by historical developments across the globe This handbook will be of great interest to students of military history naval history strategic studies and world history in general      A Companion to World History Douglas Northrop,2014-12-15 A COMPANION TOWORLD HISTORY This new volume offers insightful reflections by both leading and emerging world historians on approaches methodologies arguments and pedagogies of a sub discipline that has continued to be in flux as well as in need of defining itself as a relevant alternative to the traditional national regional or chronological fields of inquiry Choice The focus on the practicalities of how to do world history probably gives it its edge Its thirty three chapters are grouped into sections that address how to set up research projects in world history how to teach it how to get jobs in it how to frame it and how it is done in various parts of the globe It is an actual handbook in other words as opposed to a sample of exemplary work English Historical Review A Companion to World History offers a comprehensive overview of the variety of approaches and practices utilized in the field of world and global history This state of the art collection of more than 30 insightful essays including contributions from an international cast of leading world historians and emerging scholars in the field identifies continuing areas of contention disagreement and divergence while pointing out fruitful directions for further discussion and research Themes and topics explored include the lineages and trajectories of

world history key ideas and methods employed by world historians the teaching of world history and how it draws upon and challenges traditional approaches and global approaches to writing world history By considering these interwoven issues of scholarship and pedagogy from a transnational interregional and world global scale fresh insights are gained and new challenges posed With its rich compendium of diverse viewpoints *A Companion to World History* is an essential resource for the study of the world's past

**Civilizational Discourses in Weapons Control** Ritu

Mathur, 2020-07-11 This book seeks to decolonize practices of arms control and disarmament In this endeavor it seeks to problematize our understanding of time and civilization as rhetorical resources The need for such an undertaking can be premised on the claim that while problems of modernity ethnocentrism and universalism are now a central concern within the field of international relations these ideas are scarcely debated or contested within the field of arms control and disarmament The singular focus on technological innovations and specific policy oriented agreements in practices of arms control and disarmament appears to stymie the need for such engagements This book is an invitation to explore intersecting discourses on colonialism racialism nationalism and humanitarianism within a historically grounded terrain of weapons

control An understanding of these practices is vital not to prescribe any standards of civilization or exceptionalism in weapons control but to be cognizant through critique of the dangers embedded in any effort at reconstellating the constitutional nuclear order
