detailed Index Historical Dictionary of Science Fiction in Literature M. Keith Booker, 2014-10-01 The Historical Dictionary of Science Fiction in Literature is a useful reference to the broad and burgeoning field of science fiction literature. Science fiction literature has gained immensely in critical respect and attention while maintaining a broad readership. However, despite the fact that it is a rapidly changing field, contemporary science fiction literature also maintains a strong sense of its connections to science fiction of the past, which makes a historical reference of this sort particularly valuable as a tool for understanding science fiction literature as it now exists and as it has evolved over the years. The Historical Dictionary of Science Fiction in Literature covers the history of science fiction in literature through a chronology, an introductory essay, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries, including significant people, themes, critical issues, and the most significant genres that have formed science fiction literature. This book is an excellent access point for students, researchers, and anyone wanting to know more about this subject. **A History of Virginia**

Literature Kevin J. Hayes, 2015-05-19 A History of Virginia Literature chronicles a story that has been more than four hundred years in the making. It looks at the development of literary culture in Virginia from the founding of Jamestown in 1607 to the twenty-first century. Divided into four main parts, this History examines the literature of colonial Virginia, Jeffersonian Virginia, Civil War Virginia, and modern Virginia. Individual chapters survey such literary genres as diaries, histories, letters, novels, poetry, political writings, promotional literature, science fiction, and slave narratives. Leading scholars also devote special attention to several major authors, including William Byrd of Westover, Thomas Jefferson, Ellen Glasgow, Edgar Allan Poe, and William Styron. This book is of pivotal importance to the development of American literature and of American studies more generally. *The Good Old Stuff* Gardner Dozois, 2013-12-10 Nineteen ninety-nine looms near, and yet the stars are still far away, but this anthology brings them closer with more than a dozen of the best SF adventure stories ever written. Among the gems collected here are *The New Prime* by Jack Vance, Fritz Leiber's *Moon Duel*, and *The Sky People* by Poul Anderson, along with masterpieces by less familiar names such as Murray Leinster and James H. Schmitz. With more than a dozen stories written between 1940 and 1970 from greats such as Brian W. Aldiss, Leigh Brackett, L. Sprague de Camp, and A. E. van Vogt, this anthology ranges throughout our galaxy and into the stars. Whether you're revisiting past adventures or discovering these stories for the first time, you're sure to thrill to these wonderful adventures across the vast expanse of space. **The Duplicators** Murray Leinster, 2022-03-08 Link Denham needs a job. Any job. When he's offered the position of navigator on board the leaky, rickety *Glamorgan*, he takes it without asking too many questions. The destination? A planet that has barely been contacted in two hundred years in a dystopic system isolated from the rest of the galaxy. What he thought would be a simple job quickly turns into something far more complicated as he finds himself embroiled in a complex web of treachery, double-crossing, and alien politics. And what of this infamous machine, the natives have which can replicate anything put inside? Murray Leinster was a prolific figure in pulp fiction writing, short stories, and novels across many genres. The

Duplicators is a science fiction romp in his characteristic style and a wonderful example of 1960s pulp science fiction

Space Oddities Marie Lathers, 2010-11-04 Space Oddities examines the representation of women in outer space films from 1960 to 2000 with an emphasis on films in which women are either denied or given the role of astronaut Marie Lathers traces an evolution in this representation from women as aliens and or assistant astronauts to women as astronaut wives to women as astronauts themselves Many popular films from the era are considered as are earlier films from Aelita Queen of Mars to Devil Girl From Mars and historical records literary fiction and television shows especially I Dream of Jeannie Early 1960s attempts by women pilots to enter the Space Race are considered as is the media drama surrounding the death of Christa McAuliffe In addition to its insightful film scholarship this is an important addition to current reassessments of the Space Race By applying insights from contemporary gender race and species theories to popular imaginings of women in space the status of the Space Race as a cultural construct that reproduces and or warps terrestrial gender structures is revealed
