SAFETY CHECK-OUT

After correcting the original problem, perform the following safety check before return the product to the customer.

1. Check the area of your repair for unplugged or poorly soldered connections. Check the entire board surface for solder splashes and bridges.
2. Check the keyboard wiring to ensure that no wires are "pinched" or contact high voltage sections.
3. Look for unauthorized replacement parts, particularly transformers, that were installed during a previous repair. Point them out to the customer and recommend their replacement.
4. Look for parts which, though functioning, show obvious signs of deterioration. Point them out to the customer and recommend their replacement.
5. Check the B+ voltage to see if it is the value specified.
6. Make leakage current measurements to determine that exposed parts are acceptably insulated from the supply circuit before returning the product to the customer.
