Towards a Transformative Pedagogy for Early Childhood Care and Education Naseema Shaik, Trevor Moodley, 2024-07-12 This book addresses the priorities and possibilities towards developing transformative pedagogies in post apartheid South Africa To this end the book has assembled a group of researchers who interrogated and engaged with a variety of dimensions that warrant pedagogical change in early childhood in South Africa The book focuses on young children

practitioners and leaders with intersecting discussions about envisaged systemic changes to promote transformative pedagogies. The collection highlights the importance of beliefs, ways of knowing and ways of being as framings that impact on pedagogical approaches. The book discusses the challenges that interplay between priorities and possibilities that practitioners face in a diverse and multi-cultural society like South Africa. The work uses a variety of examples to show priorities. One example is about how practitioners have limited knowledge about how music as a culturally responsive tool can be used to transform pedagogy in Early Childhood Care and Education. The book opens up dimensions as priorities that lead to thinking about possibilities that recast adults and young children as transformative agents in a dimension for transformative pedagogies.

Accessing Post-School Studies Venicia McGhie & Madge du Preez, 2017-12-01. Accessing Post-School Studies: A student's GPS to successful learning makes a valuable contribution to often problematic and pertinent South African higher education issues such as student access and success, student learning, student support and student engagement. In this regard, the authors draw on the works of higher education theorists such as Kuh, Tinto, Marton and Sijm. The book is primarily a helpful resource for South African learners in school, students at universities, life orientation teachers as well as parents of prospective university students. It will especially assist students to adapt to the university environment.

Using Evidence in Policy and Practice Ian Goldman, Mine Pabari, 2020-06-10. This book asks how governments in Africa can use evidence to improve their policies and programmes and ultimately to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS West African region and a range of sectors from education, wildlife, sanitation through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show how these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society and researchers and academics with an interest in how evidence can be used to support policy making in Africa.
