$$3x + 3 = \underline{39}$$

$$3x = 39 - 3$$

$$\underline{3x} = 36$$

$$x = \frac{36}{3} = 12$$

 high school can be as entertaining as a witty remark as engrossing as the mystery novel you can t put down in short fun As  
 veteran math educators Posamentier and Lehmann demonstrate when you realize that doing math can be enjoyable you open  
 a door into a world of unexpected insights while learning an important skill The authors illustrate the point with many easily  
 understandable examples One of these is what mathematicians call the Ruth Aaron pair 714 and 715 named after the  
 respective career home runs of Babe Ruth and Hank Aaron These two consecutive integers contain a host of interesting  
 features one of which is that their prime factors when added together have the same sum The authors also explore the  
 unusual aspects of such numbers as 11 and 18 which have intriguing properties usually overlooked by standard math  
 curriculums And to make you a better all around problem solver a variety of problems is presented that appear simple but  
 have surprisingly clever solutions If math has frustrated you over the years this delightful approach will teach you many
