## **Fire And Ashes On The Front Lines Of American Wildfire:**

Fire and Ashes John N. Maclean, 2003-06-02 An expert's report from the front lines where wildland fires keep getting hotter bigger and more dangerous to the men and women who fight them In 2002 more than seven million acres were burned at a fire fighting cost of over a billion dollars Are wilderness fires now a tragic and enduring feature of the American landscape John N Maclean author of the acclaimed *Fire on the Mountain* offers a view from the front lines combining action packed storytelling with moving insights about firefighters and informed analysis of firefighting strategy past and present Beginning with a riveting account of the worst case of arson in wildfire history the 1953 Rattlesnake Fire in Mendocino National Forest which claimed the lives of fifteen firefighters Maclean explains the mysterious dynamics of fire and the courage and techniques required to combat it One such mystery underlines the life threatening 1999 Sadler Fire in Nevada when a line of flames suddenly blew up trapping six firefighters mistakenly placed in harm's way For the final story Maclean returns to Mann Gulch the site of his father's classic *Young Men and Fire* to interview the last survivor of the worst disaster in the history of smoke jumping From it we understand why fatal fires burn for generations Offering a prescient view of the inevitable conflict between people property and nature *Fire and Ashes* presents a riveting and emotional story one that in many ways John Maclean was destined to tell

**Mudslingers** Tim Sheehy, 2023-12-12 The unique history of aerial firefighting as seen through the eyes of a pilot former Navy SEAL and current owner of one of the most successful aerial firefighting companies in the world Blending historical context and first person narrative *Mudslingers* tells the dramatic and colorful story of aerial firefighting in America as seen through the eyes of a decorated former Navy SEAL US Naval Academy graduate firefighting pilot and businessman who founded Montana based Bridger Aerospace one of the most successful aerial firefighting teams in the world Part narrative nonfiction part memoir *Mudslingers* is a riveting account of one person's journey from the battlefields of Afghanistan and Iraq to the front lines of a different but no less important battle on the home front the war against the escalating threat of wildfire From the early days of the B 17 to the modern fleets of the twenty first century Tim Sheehy will take you on a ride through the history of aerial firefighting the most hazardous and demanding aviation mission in the world *Mudslingers* is a rollicking read an enlightening journey and a call to action for anyone who believes wildfires are not only one of the greatest threats facing modern civilization but a threat that has long been underestimated misunderstood and poorly addressed despite repeated examples of bravery and innovation by those who choose to do battle with the flames Indeed save for a few historic military engagements in the twentieth century there is not a sustained aviation mission anywhere that comes close to encompassing the danger precision and unforgiving nature of aerial firefighting In telling this story Sheehy takes readers into the cockpit and into the lives of his fellow pilots past and present as they struggle with the seemingly never ending threat of wildfires One hundred percent of author proceeds from this book are donated to the Wildland Firefighter Foundation and the United Aerial Firefighters Association **The**

**Sociology of Disaster** Thomas E. *Between Two Fires* Stephen J. Pyne, 2015-10-15 From a fire policy of prevention at all costs to today s restored burning *Between Two Fires* is America s history channeled through the story of wildland fire management Stephen J Pyne tells of a fire revolution that began in the 1960s as a reaction to simple suppression and single agency hegemony and then matured into more enlightened programs of fire management It describes the counterrevolution of the 1980s that stalled the movement the revival of reform after 1994 and the fire scene that has evolved since then Pyne is uniquely qualified to tell America s fire story The author of more than a score of books he has told fire s history in the United States Australia Canada Europe and the Earth overall In his earlier life he spent fifteen seasons with the North Rim Longshots at Grand Canyon National Park In *Between Two Fires* Pyne recounts how after the Great Fires of 1910 a policy of fire suppression spread from America s founding corps of foresters into a national policy that manifested itself as a costly all out war on fire After fifty years of attempted fire suppression a revolution in thinking led to a more pluralistic strategy for fire s restoration The revolution succeeded in displacing suppression as a sole strategy but it has failed to fully integrate fire and land management and has fallen short of its goals Today the nation s backcountry and increasingly its exurban fringe are threatened by larger and more damaging burns fire agencies are scrambling for funds firefighters continue to die and the country seems unable to come to grips with the fundamentals behind a rising tide of megafires Pyne has once again constructed a history of record that will shape our next century of fire management *Between Two Fires* is a story of ideas institutions and fires It s America s story told through the nation s flames

**Battleground: Environment** Robin Morris

Collin, 2008-07-30 The environment inflames passions in people on all points of the political spectrum Controversies over such issues as the rise of cancer in industrialized countries climate change and urban sprawl have skyrocketed as we recognize the impact that humans have on the environment Many people become immersed in these controversies at a local level before they know much about the topic the nuances of many environmental conflicts are often overlooked as the media focuses on the adversarial nature of the conflict This reference resource provides students teachers librarians and citizens as a whole with the necessary first step in understanding these hot button issues Each entry identifies the issue involved who was holding various points of view or positions where and when the conflict occurred and explains the cultural social and political context and dimensions of the conflict Battleground Environment provides in depth analysis of over 100 of the most controversial topics involving the environment including childhood asthma the Kyoto Summit and Treaty smart growth the Three Gorges Dam in China and genetically modified food Entries include descriptions of public policies and discussions of the future of the controversy Each entry concludes with cross references and a short relevant bibliography suitable for student research The resource includes numerous sidebars that discuss in detail particular local controversies that illuminate the complexity of the topics discussed Blazing Heritage Hal K. Rothman, 2007-04-12 National parks played a unique role in the development of wildfire management on American public lands With a different mission and powerful meaning to the public the national parks were a psychic battleground for the contests between fire suppression and its use as a management tool Blazing Heritage tells how the national parks shaped federal fire management

**Land on Fire** Gary

Ferguson, 2017-06-21 This comprehensive book offers a fascinating overview of how those fires are fought and some conversation starters for how we might reimagine our relationship with the woods Bill McKibben author of Eaarth Making a Life on a Tough New Planet Wildfire season is burning longer and hotter affecting more and more people especially in the west Land on Fire explores the fascinating science behind this phenomenon and the ongoing research to find a solution This gripping narrative details how years of fire suppression and chronic drought have combined to make the situation so dire Award winning nature writer Gary Ferguson brings to life the extraordinary efforts of those responsible for fighting wildfires and deftly explains how nature reacts in the aftermath of flames Dramatic photographs reveal the terror and beauty of fire as well as the staggering effect it has on the landscape

**Human Factors Challenges in Emergency Management**

Christine Owen, 2017-09-29 This book provides an overview of state of the art research that has been conducted within Australia funded by the Bushfire Cooperative Research Centre The chapters source and contextualize their own research practice within the context of the international research literature Therefore while the research has occurred within Australia it will be of particular interest to scholars students and practitioners in a number of other countries particularly within the United States of America and in Europe The fire and emergency services is a particularly large industry in

Australia alone it employs 250 000 personnel yet there is very little by way of published human factors books addressing this sector directly Emergency events frequently involve problems for which there may be unanticipated consequences and highly interdependent consequential effects In short emergency events are not necessarily as containable as may be work in other domains As Karl Weick once commented emergency events do not play by the rules This means that these research chapters tell us something about a potential future world of work that is highly dynamic interdependent and for which improvisation and critical thinking and problem solving are necessary pre requisites The discussions about individual and team performance will also be pertinent to others working in similar high reliability high consequence domains The chapters connect into an integrated body of work about individual and group performance and their limitations

**Inflamed** Anne E. Belden, Paul Gullixson, Lauren A. Spates, 2023-10-31 WINNER OF THE 2023 IRE BOOK AWARD WINNER OF THE NATIONAL INDIE EXCELLENCE AWARD FOR REGIONAL NONFICTION FINALIST OF THE NATIONAL INDIE EXCELLENCE AWARD FOR AGING AND CAREGIVING NOMINEE OF THE NORTHERN CALIFORNIA BOOK AWARD The dramatic story of hundreds of senior citizens left in the path of a ferocious firestorm and what the quest for accountability reveals about the increasing risks to our most vulnerable population A harrowing saga that pits corporate pusillanimity against dogged courage under the most difficult circumstances in Belden and Gullixson s gripping espos There s cowardice in this dramatic narrative but at heart it s about ordinary people displaying extraordinary grace under extreme pressure all conveyed in intense atmospheric prose The result is a moving re creation of a nightmarish disaster that tested the character of all those in its path Kirkus starred review a powerful work of investigative journalism about a particularly vulnerable segment of the population Alongside an engrossing account of the emergency as it unfolded in Sonoma County Belden and Gullixson provide a definitive account of management s woefully inadequate response at the two sister facilities Their findings are a lesson to other care facilities here s what not to do San Francisco Chronicle Just after midnight on October 9 2017 as one of the nation s deadliest and most destructive firestorms swept over California s Wine Country hundreds of elderly residents from two posh senior living facilities were caught in its path The frailest were blind in wheelchairs or diagnosed with dementia and their community quickly transformed from a palatial complex that pledged to care for them to one that threatened to entomb them The rescue of the final 105 seniors left behind on an inflamed hillside depended not on employees but strangers whose lives intersected in a riveting tale of terror and heroism Headlines blamed caregivers for abandonment and neglect but the truth proved far more complex leading to a battle for accountability that stretched from the courtroom to the state legislature and ultimately to the ballot box Inflamed Abandonment Heroism and Outrage in Wine Country s Deadliest Firestorm is the gripping and emotional narrative detailing what happened to these seniors employees and rescuers before during and after the Tubbs Fire decimated portions of Santa Rosa including Oakmont Senior Living Villa Capri and part of Varenna at Fountaingrove Anne Belden and Paul Gullixson are professional journalists and Sonoma County residents who spent three

years recording each phase of the disaster in agonizing detail from the botched evacuation and its excruciating aftermath to the investigations lawsuits and breakdowns that followed They tell this harrowing story with a veracity and compassion only achieved by experienced reporters with local roots Their narrative revisits the horrors of 2017 but also asks the reader to look to the future and consider how their community's most vulnerable will fare as ten thousand Baby Boomers retire each day the for profit assisted living industry rapidly expands and the climate becomes more volatile If this travesty can happen at high end senior living complexes it can happen anywhere

Decision Making in Complex Environments Jan Noyes, Malcolm Cook, Yvonne Masakowshi, 2017-09-18 Many complex systems in civil and military operations are highly automated with the intention of supporting human performance in difficult cognitive tasks. The complex systems can involve teams or individuals working on real time supervisory control command or information management tasks where a number of constraints must be satisfied. Decision Making in Complex Environments addresses the role of the human, the technology and the processes in complex socio technical and technological systems. The aim of the book is to apply a multi disciplinary perspective to the examination of the human factors in complex decision making. It contains more than 30 contributions on key subjects such as military human factors, team decision making, issues, situation awareness and technology support. In addition to the major application area of military human factors, there are chapters on business, medical, governmental and aeronautical decision making. The book provides a unique blend of expertise from psychology, human factors, industry, commercial environments, the military, computer science, organizational psychology and training that should be valuable to academics and practitioners alike.

**Of Rock and Rivers** Ellen Wohl, 2009-06-08 This deeply personal collection of essays paints a progressive view of the American West as seen by a geologist. The author traces her twenty years of living and conducting research in the natural landscapes of the West as she investigates the conflict between environmental history and widely held romanticized views of the region.

Eco-Freaks John Berlau, 2006-11-26 Tree huggers may actually be squeezing the life out of the environment. In a book that is alternately alarming, enlightening, ironic and entertaining, award winning journalist John Berlau explores the myriad ways in which shortsighted environmentalism actually endangers trees, wildlife and people. In chapter after chapter, Berlau debunks myths and libels about global warming and climate change, the dangers of pesticides like DDT, trees and pollution, fuel economy and the auto industry, the threat posed by asbestos, the lifesaving role of dams and levees, plans to rewild America. Mother Nature is not a gentle person and Berlau's pointed reporting reveals the very real dangers to people and their environments when Eco Freaks prevent us from restraining her. Berlau makes a powerful case. Thinking environmentalists who read this book will be forced to revisit at least some of their most deeply held beliefs. Joel Himelfarb, Washington Times. Berlau says a lot of things that are not generally known that needed to be said. Bruce N. Ames, recipient National Medal of Science 1998, Save the Planet and Ourselves. In Eco Freaks, award winning journalist John Berlau provides a much needed and startling exposé about how the environmental movement with its radical shortsighted eco activists has actually helped amplify the dangers of natural disasters and destroyed the lives and property of millions of Americans. As Berlau writes, America is still mighty and prosperous but environmentalism is putting us on the brink of danger as well. As technology after technology that our grandparents put in place is being banned and new technologies

never even come to market we risk a public health disaster Environmentalists have promoted all sorts of doomsday scenarios about population explosions and massive cancer crises from pesticides that have been shown to be false But now because we have done away with so many useful products based on those scares we are in danger of an old fashion doomsday returning because we ve lost what protected us from the wrath of nature Indeed as we will see throughout this book public health hazards caused by environmental policies are already on the scene
